"Serving Storrs Since 1896"

VOL. XLII

Storrs, Connecticut, Thursday, April 5, 1956

No. 103

## Specific Uses For Restoration Funds Outlined By Gov.

Governor Ribicoff emphasized yesterday that the state can pay only for basic reconstruction of town roads and bridges damaged by flood. Any extras, he said, must be paid for by the towns themselves.

The governor's statement was a reply to the demands by Waterbury Mayor Edward Bergin and Ansonia Mayor William Sheasby for extra bridge work. He noted that the recent special session of the legislature set the policy of the state paying only for basic reconstruction. City officials in the Naugatuck Valley have argued that reconstructed bridges should be larger than before, to accommodate heavier traffic flow. The governor suggested that towns pay the additional costs for enlarged bridges and appeal to next year's legislature for reimbursement.

Ribicoff's observations were made at a state finance advisory committee in Hartford.

In Paris, official French informants say the government is considering requests from Israel for French arms, and would like to see the balance of power restored in the Middle East. According to these sources, the balance has been upset by the shipment of 200 fighter planes and 60 jet bombers to Egypt by the Soviet block.

About a dozen French jet fighters are said to have left France for Israel, but officials will not discuss this. Foreign minister Pineau is planning a visit to Israel.

## Community Chest Carnival

### History Shows Ingenuity Big Aid In Reaching Goal

Puffing along with a procession of floats, convertibles, horses and little boys on foot was the 1929 Willis-Knight fire engine which led the first Community Chest Carnival parade on April 27, 1949. Sponsored by Alpha Phi Omega, this year's chairman Ronald Bacon of Hartford Hall has announced that the 1956 parade on May 3 will roughly follow the route of 1949's parade from South Campus to Hawley Armory, but will consist of twice as many floats and extra attractions as the first one.

#### The Eiffel Tower

Each year since then living units have mounted everything from girls painted with gold to wooden replicas of the Eiffel Tower on the back of trucks, jeeps and whatever conveyance they can snag to compete for an award given the best float. Back in 1949 a midway and tents were set up in back of the armory after the parade that afternoon and each group on campus had a concession. Students had a chance to eat homemade fudge from "Kappa's Kandy Kitchen," throw pies at Dr. Wedberg or watch a chorus line.

Before 1949 a Community Chest drive had been going on at the University each year. The idea of a carnival as a money-raising project was suggested by the Student Senate after proceeds from the drive that year didn't meet the goal. They turned the event over to Alpha Phi Omega to sponsor.

So much money was raised that the Senate asked the service organization to run the carnival each year starting in the spring of 1950. An Ugly Man contest was begun that year with fraternities helping their candidates campaign. Money had to accompany each vote, and the man with the most money won the contest. Under chairman Hank Williams, this carnival netted \$1,550.

#### Oddities Auctioned

Theta Xi's cabin cruiser won the award for the best float in the parade of 1950. Jeanne Hochberg of Delta Zeta was crowned queen after the Sophomore Minstrel Show. Kappa Alpha Theta ran the best booth on the midway.

An "auction of oddities" was started, with Sumner Cohen, assistant director of men's housing, auctioning off his shirt and Provost Albert Waugh parting with his hat and cane. Climaxing the transactions was Tau Epsilon Phi's purchase of a fire engine.

Since then the carnivals have been inventing new gimmicks and gaining bigger profits each year. A WHUS marathon begun in 1952 had students call in record requests played in return for a contribution to the Chest.

Campus Photo—Sandy Whitman

**DREAM THAT CAME TRUE:** One of the many displays that may be seen at various times in the display windows of the Pharmacy Building is the Parke-Davis pharmaceutical company exhibit pictured above.

The display depicts a high school student dreaming of his lifelong ambition of becoming a pharmacist, a profession which works hand in hand with the physician to bring the finished prescription to the public.

## Ike Announces At Conference:

### Troops Will Not Be Called Unless Congress Approves

WASHINGTON D.C., April 4 (AP)—President Eisenhower has declared that he would never order American troops into action which could be interpreted as war without prior congressional approval. He also told his news conference, however, that the time might come when our forces would have to defend themselves in a local action.

The president seemed exasperated when a reporter asked if the Dulles statement on the Middle East meant that the United States battalion of 1,500 Marines, recently sent to the Middle East, might be ordered into war if he thought the circumstances warranted it.

For war, he said, you need money and a draft law. Actually, this country has a draft law, but the president apparently meant to underscore that Congress has to appropriate the money.

#### Uncommitted On Bill

On the farm bill issue President Eisenhower refused to say whether he would accept a return to high farm price supports for one year, as now provided in the farm bill which the Senate and House conferees are working on. He also said that there's a question whether the farm bill, as it stands now, would help the farmer.

However, he added, he's not one to hold up a bill containing some bad things, if the overall effect is good.

At the outset of his news conference, the president took note of the 7th anniversary of the North Atlantic Treaty Organization. He said NATO has done a splendid job under the authority of the United Nations.

He added that he was not going to try to interest the Wisconsin primary results. But, he said, it would be idle to say or intimate that the farmers have no problems.

#### Dog, Who Usually Rescues, Retrieved By Fireman

NEW YORK (AP)—According to tradition St. Bernard dogs are famous for their rescue missions, but at Albion, New York, one found the situation reversed.

This one fell through the ice of a quarry pond and had to be rescued by fireman.

P.S. the firemen did not carry a keg of brandy. Well that's life.

## Program Announced For Frosh Musical: Senate To Sponsor

Rehearsals are under way for the Freshman class musical comedy show to be presented on April 19 at 8 p.m. in the HUB Ballroom. "C' Ya'Round the Campus" will feature Judy Rose, Alpha Epsilon Phi, and Ron Utley, Tolland Hall, in the starring roles, with Verna Fogel, unit 7B, and Carl Larabee, Chi Phi, acting in the supporting parts. The entire cast will include 30 students.

#### Grad is composer

The music for the show was written and composed by Stanley Turteltaub, a post graduate student of sociology at the university, and a graduate of Penn State. Mr. Turteltaub is also acting as director. The dialogue was written as a collaboration of several members of the freshman council.

#### Story

The story is of a not-too typical Uconn alumnus who relates the sorry events of his university athletic career to his son. It is an original plot which is easily adapted to a great variety of good music and comedy.

#### First program

This is the first program of its type to be presented by the freshman class with the approval and sponsorship of the student senate. The freshman council feels that Mr. Turteltaub has done a fine job as far as composing and directing, and that the show should prove to be a fine production.

#### All Welcome

Everyone is welcome to attend the performance. Tickets are 50¢ and may be purchased from any member of the freshman council, or at the HUB control desk.

### Campus Meeting Tonight

A meeting of the editorial department of the Connecticut Daily Campus will take place tonight at 7 in the News Room. Attendance is required.

## Colorado Justice O. Moore Wants Court Case Photos

CHANDLER, ARIZ. April 4, (AP) not be sustained on a factual basis.

Justice Otto Moore of the Colorado Supreme Court says the ban on photographic coverage of court proceedings will not survive when put to the final test of constitutionality.

Justice Moore, whose recommendation that cameras be allowed in courts was adopted recently by the Colorado Supreme Court, spoke at the National Press Photographers Association convention last night in Chandler, Ariz.

#### Changes Severity

"I have no hesitancy in saying that canon 35 of the American Bar Association's canons of Judicial ethics, which, without exception, bans all camera and direct radio coverage of newsworthy events in judicial proceedings, is overcharged with severity and that it cannot be sustained on a factual basis."

The judge also felt that "one of the basic rights of citizens in this land is to protect against imposition, by agencies of government, of oppressive and unreasonable restraints upon freedom of action. The press photographer is protesting. He should keep at it."

#### Receives Award

Justice Moore said "no unreasonable or unnecessary restriction against a legitimate media for distribution of information to the public should go unchallenged."

The Photographers' Association awarded Justice Moore its Joseph A. Sprague Memorial. He was cited for his open mindedness in reception of evidence supporting the news photographer's right to report court proceedings.

## Series Starts For Girls Only

A lecture "For Girls Only," companion lecture to the series "For Boys Only," will be held tonight at 8 in Hub 101-102 with Dr. John Rankin of the Zoology department as guest speaker. Dr. Donald Kent of the Sociology department will address the women at the April 12 lecture.

A third in the men's series will also be held tonight at 7:30 in the Hub Ballroom, with Dr. James Sakoda of the Psychology department speaking on the "Psychological Aspects in Courtship." This lecture is being held by popular demand, since the first two in the series were well received and attended. In two previous lectures, Dr. Rankin and Dr. Kent spoke on the biological and sociological aspects of courtship.

The lectures, dealing with the various phases and aspects of courtship, are under the direction of Barbara Mossey, Delta Zeta, and Frank Brinkerhoff, Quad II.

## Funeral Of Roy Guyer Is Tomorrow At 2 p.m.

Funeral services for the late Roy J. Guyer will take place tomorrow afternoon at 2 at the Storrs Congregational Church. Burial will be in the Storrs Cemetery.

The Potter Funeral Home, 456 Jackson St., Willimantic, will be open today between 3 and 5 and 7 and 9 for those who wish to pay their respects.

## Athletics For All; Symbol Of Guyer

The dark curtain of a tragic death closed on the remarkably unselfish career of Roy J. Guyer this week. For 36 years, the square-shouldered professor of physical education embodied a vigorous philosophy that denied no one the opportunity to compete in athletics. To Roy Guyer an active athletic life was the only life. Sports were not a privilege reserved for a talented group of varsity men, nor were intercollegiate athletics a male monopoly. Despite all his years as a varsity coach in six sports, it was his success with girl's intercollegiate archery that gave him the greatest amount of satisfaction. Guyer and his girls won 23 consecutive national titles. From 1919 to 1954 Guyer lived as full a life as any man devoted to his work could live. He suffered the usual barbs of criticism for a losing season from the self-appointed judges of intercollegiate sports. It was not winning that spurred Roy Guyer to dedicate his life to athletics. He was a member of that slowly dying race of coaches that placed the individual first and a winning season second. The emphasis was always on physical education and character building. Guyer won his share of games and made thousands of friends in the process. The resolute former Lebanon college athletic great coached and advised Connecticut men and then their sons and since his retirement has passed on his advice and principles to their grandchildren. The huge intramural program was built by Guyer and turned over to his close friend Bob Kennedy.

After nearly four decades of hard work Roy Guyer quietly retired from the University staff. The spirit of his accomplishments and his sincere love of people were left indelibly stamped in the make-up of the athletic program at Connecticut. Even in retirement the man, who was referred to by the student body as "The Guyer" could not sit still and enjoy the rewards of a full and happy life without taking some part in athletics. The urge to instruct new generations in the principle of leadership training was too great for "the Grand Old Man of Coaching" to suppress. Nearly seventy, and in rapidly failing health, Roy Guyer continued his service to youth. His equipment was donated to the Storrs grammar school, where he spent the last days of his career teaching the children of the school the ideals that had become a part of him. When his body that had once led a football team on the field against the great Jim Thorpe could no longer allow him to carry on what had been his mission in life, there was no longer any reason for him to live.

President Jorgensen summed up the Guyer's life in a statement on his career, "Roy Guyer will remain in the memory of hundreds, perhaps thousands of men and women in the state, who have benefitted by his advice and tutelage."

The memory of Roy J. Guyer will live on too in the person of every intramural player who sets foot on the court they named after him. The legend of the man who went from college football coach to grammar school instructor with no thought of himself is astonishing. The story is a brilliant object lesson in an era of greediness in college sports. At Connecticut his name will always mean physical fitness, fair play and sportsmanship.

## Pharmacy Students See Drug Companies

All aboard! Train ready to leave. These were the words of the conductor heard by 52 senior pharmacy students as they started their annual visitation to various pharmacy manufacturing plants around the country Saturday, March 17.

This trip was initiated eight years ago by Professor Nicholas W. Fenney, instructor in Pharmacy Dispensing at the University, who thought it important that pharmacy seniors get the opportunity to see how those 'little pills and capsules' are manufactured as well as gaining an insight into pharmacy manufacturing as a career. So in 1948 the visitation trips were started and have now become so popular that many students in pharmacy can not wait until their senior year to participate in them, being the zenith in the four year curriculum at Uconn.

These trips are made available to pharmacy seniors through the graciousness of the pharmacy plants visited at no small expense to them. They arrange a program for the students which includes everything from tours through their plants in the educational vein to theatre and movie passes in the more social vein.

### Kalamazoo and Parke Davis Too

This year's trip included visits to the Parke Davis Company in Detroit and the Upjohn Company in Kalamazoo, Michigan. The return trip found the seniors stopping off in New York to visit the Lederle Company in Pearl River. The trips are now set up on an alternating year basis with next year's seniors visiting the Eli Lilly Company in Indianapolis, Indiana; Abbott Laboratories, Chicago, Illinois, and the Sterling-Winthrop Company in New York City.

The trip started when the group left Grand Central Station in New York at 6:30 p.m. Saturday, March 17. They arrived in Detroit at 7:30 Sunday morning and were greeted with Parke Davis buses which drove them to the Sheraton-Cadillac Hotel. Nothing in the way of a formal program was arranged for Sunday, with Parke Davis knowing the students would enjoy visiting and sightseeing in metropolitan Detroit.

Monday morning found the rested group out of bed at 7:30 ready to eat breakfast at the Parke Davis cafeteria followed by a tour of the plant which included the manufacture of pills, capsules, tablets and many other pharmaceuticals. The students found it amazing to see the various medications being manufactured as well as the aseptic and spotless conditions prevalent in the manufacturing processes.

Tuesday morning brought with it a tour of the research facilities of Parke-Davis followed by an afternoon luncheon at the plant's cafeteria.

### Backdoors and Sterile Solutions

Tuesday afternoon at 4:30 brought a close to the senior's stay in Detroit and they then boarded a train for Kalamazoo which is 120 miles from Detroit. After passing the scenic Michigan country side which included a backdoor view of the University of Michigan, the train came to a halt in the Kalamazoo Railroad station. Kalamazoo is a town of 100,00 people and is the home of the Upjohn Company.

The Upjohn plant, newer than the Parke-Davis one, was built in 1950 and is one of the most modern of pharmaceutical manufacturing plants in the United States. Everything here, as in Parke-Davis, is a symbol of cleanliness in manufacturing. Sterile solutions are prepared in rooms, where before entering the lab technicians have to don sterile clothing and can not reenter the room upon leaving until they change again into new sterile clothing.

### Medication and Remembrances

Upjohn, the home of Unicap Vitamins, Kapectate and many other well known pharmaceuticals, was the perfect example of the present manufacturing processes now in use in many plants which use the latest in manufacturing machinery and labor and money saving devices to bring to the public the best medication at the lowest possible price.

Following their stay in Kalamazoo the students then departed by train to New York City and Grand Central Station. After an 18 hour trip through parts of Michigan, Canada and upper New York the train again pulled to a stop at the origin of the trip.

The last stop was Lederle Laboratories, a division of the American Cyanamid Company. Like Upjohn it had a relatively new plant structure containing many modern and up to date pieces of machinery. Under their roof in the higher altitudes of Pearl River many well known products are manufactured including the antibiotics Aureomycin and Achromycin. Methods of manufacturing have become so progressively improved that where as these products were produced by the pound they are now manufactured by the ton.

## Glimpse Of Pharmacy Industry

By ERIC BISIGHINI

Photographer Frank Meszaros, a senior pharmacy student from Phi Delta Chi, brought back the following shots of the Upjohn Company of Kalamazoo. Due to Government security regulations, many phases of the plant's operations were not allowed to be photographed.

SYRUPS, ELIXIRS, SUGAR AND WATER are dealt with in these vats which have a capacity of many thousand gallons. The overhead lighting provides daylight illumination. The spotless floors are swept daily as part of the high standards of sanitation maintained throughout the plant.

EVERYTHING BUT A SWIMMING POOL in the way of recreation facilities provide Upjohn employees with ideal working conditions. The lounge at the right is equipped in Waldorf Astoria luxury. Beyond the ping pong tables lie a series of shuffleboard courts for those less athletic individuals. Outside are facilities for everything from badminton to croquet. The cafeteria is non profit and designed to cater to the needs of the employees.

MACHINES REPLACE PEOPLE in many of the processes at Upjohn. The machine shoots pills into the bottles at the rate of two to five thousand a minute. The blond is stationed here merely to see that the machine doesn't malfunction and propel millions of pills about the room.

## Students' Money Finds Way Out Of Pockets Fast

The microscopic amount of the more than-\$30 billion in circulation throughout the United States that finds its way into the pockets of Uconn students seems to find its way out even faster.

A recent query into the financial affairs of Uconn students revealed that students at Uconn are no exception to the almost universal problem of obtaining money.

The degree of the problem, of course, varies from person to person. For some it means working on weekends. For others it means tactfully squeezing money out of parents. Still others—the minority to be sure—have merely to wait for Monday's mail.

The reactions of financially well off students to monetary matters were as diverse. One student said that the only problem he has is balancing the ledger he keeps. Another student seemingly quite disturbed said that his only problem is finding a place to keep his money; when asked why he didn't use the student bank he replied that he already consumes too much time standing in other lines.

New Summer School Courses:

Prospective Teachers Study Gifted, Retarded Children

The exceptional child—the mentally retarded and the intellectually gifted—will be the topic of various new courses which this year's summer school at the University of Connecticut will be offering as a result of the growing demand for training of teachers in this field.

For the regular summer session, which will run from June 25 through August 3, the Summer Session Office has made arrangements for the registration of about twelve hundred undergraduate and graduate students, and housing and classroom facilities at Storrs will be in full use during this period.

Students in residence may register before May 11. Other summer

session students may register up to June 25. Applications are available at the Summer Session Office located in the continuing Education Center, Room A.

Courses in more than forty fields of study are to be given at the main campus at Storrs, at the Waterbury Branch and at the Hartford Branch. There will also be eleven workshops, ten of which will be held at Storrs.

In addition to the graduate and undergraduate programs, various conferences, workshops, clinics and short courses will engage an additional ten thousand persons.

Interested students are urged to register now to assure the opportunity of enrolling for the course of their choice.

Sorority Rushing

An open bid period for all women interested in rushing sororities will be conducted today from 1-5 p.m. in the HUB Lobby.

Orthodox Pastor Will Present Books To Library

The Very Reverend V. A. Kas-kiw, pastor of St. Peter and St. Paul Ukrainian Orthodox Church in Willimantic will present two books, "The Cathedral of St. Sofia" and "Love Ukraine" to the University tonight at a coffee in St. Marks Chapel. A vesper service starting at 8 p.m. will precede the presentation of the two books to Paul Alcorn University librarian. The books were obtained through the auspices of the Ukrainian Orthodox Church in Willimantic.

Assisting in the vesper service will be Rev. Peter Kowalchuk, pastor of St. Mary's Ukrainian Orthodox Church in New Britain, and Missionary speaker Very Reverend Stephen Holutiak, pastor of St. Michael's Ukrainian Orthodox Church in Woonsocket, Rhode Island, who will give the sermon. The choir, which will sing a cappella in the traditional Byzantine style, will be conducted by Anatole Radko. Following the service a coffee will be held under the direction of Virginia Lity, Spanish House, social chairman of the Orthodox Club.

Testing For Brucellosis, Now Compulsory By Law

All commercial herds in Connecticut have now entered the University of Connecticut testing program for the disease, brucellosis. Compulsory as of the beginning of this month dairy farmers throughout the state will take part in the program conducted at the Storrs Agricultural Experiment Station.

have been involved in the testing. Dr. Edwin F. Stula, extension veterinarian at the University of Connecticut, compares the 1956 figure with the 59,000 Connecticut animals tested for brucellosis in 1954. In 1950 only a little more than 18,500 cattle were tested for the disease.

Last year about 3,000 of the state's 3,700 commercial dairy herds were tested. Of these about 2,700 were found brucellosis free. About 300 herds were found to contain a small percentage of infected animals.

Wildroot Cream-Oil gives you confidence

## Down In Front

### Intramural Play Sidelines Promising Uconn Athletes

with BOB SOKEL, Asst. Sports Editor

#### "HOOKER OUT" .....

How many fans realize the number of outstanding Uconn athletes who are lost to their teams for the season because of injuries sustained in intramural play?

With the opening of the local baseball season almost upon them, coach J. O. Christian was recently discussing this matter after he had lost Jim "Hooker" McMahon through an injury. McMahon was expected to be one of the mainstays of this year's varsity and his versatility is exemplified by his equal prowess at both first base and the outfield. However, just what use he may be to the squad is presently very much in doubt.

After a strenuous baseball workout in the afternoon, McMahon sustained a twisted knee playing basketball for his house team that night in the wind up of intramural play prior to the *Campus Invitational Tournament*. The injury may prove very costly to himself as well as the baseball team since coach Christian regards McMahon as standing a good chance for a professional career after graduation.

Although the most recent athlete who has been sidelined in this manner, McMahon has many predecessors. Coach Christian recalls at least five of his ball players in the past ten years who gave up possible baseball careers as the result of being intramural casualties.

The last such injury occurred in 1951 when Joe Dunn had to sit out the season because of a twisted knee injured in the same way as McMahon. Dunn was one of the most outstanding catchers that Connecticut has had in recent years and had aspirations of a major league career. However, his catching suffered from the injury because of his inability to squat and he was forced to switch to the mound. Despite turning in good pitching which included a win over Yale, he was not good enough for a professional career as a pitcher which he might have had as a catcher.

Another top prospect was Bob Eno who sat out the 1948 season because of a broken wrist likewise received in intramural play. Eno was an outstanding third baseman who could do everything well and was counted on to pace the Husky attack that season. The other players lost in this manner were not as outstanding as these mentioned above but were regular performers whose loss was severely felt.

If a check were made of such accidents in other sports, we're sure that the list would be surprisingly long of Connecticut athletes who hurt themselves as well as their teams because they were the "one in a thousand, who would be sidelined by an injury in a 'mural game.'"

#### Dinner at Whitney Hall

The annual winter sports banquet will be held tonight at Whitney Dining Hall instead of the Main Dining Hall as reported in yesterday's *Daily Campus*. The dinner will begin at 6:30 p.m.

The name of the intramural basketball squad is "Carp'n Cass" rather than "Karp'n Cas" or "Carp'n Kass" or "Karp'n Kas" as garbled in recent issues of the paper.

Due to erroneous information given out by Eta Lambda Sigma fraternity, the name of Hooker McMahon was listed in Tuesday's issue as the high scorer in the "X-House" -TKE Tigers game. McMahon was on crutches from a knee injury and did not appear in the line-up.

# It's AZO and "X House" In The Finals Of CIT Tonight

By JOE CAVANAUGH

The bubble is "bust." Those who envisioned the final game in the CIT tournament between the two teams of Eta Lambda Sigma can forget about it.

Second seeded "X House" romped to an easy win over Theta Chi in the semi finals but Carp'n Cass the talented comedy team from the same house was knocked off by a hustling, shorter team from Alpha Theta Omega, 61-57. The Alphas were ranked 30th when the tourney began.

Tonight, the Alphas face last year's champs, the "X" House, in the final and deciding game of the tournament. "X House" will be out to avenge the loss suffered by their brothers last night. Commenting on his team's chances tonight against second ranked "X House" Alpha coach Eliot Bohrer commented that "It will be a rough game, and we will fight them to the wire."

Lou Randall, a troublesome bundle of dynamite, scored 26 points for the Alphas, and was also the man who threw in a jump shot with two seconds to go in the regulation game tying the score.

In the three minute overtime that followed, Jay Beden scored six points on four foul shots and a driving layup. Leo Lesinsky, a rough and tough center, did his best to keep Carp'n Cass in the ball game, but his four points were not enough in the overtime.

In the second game played, "X House" won by 14 points, but not before they had the breath of old man upset staring them in the face at the end of the first half. Theta Chi was only down one point as the half ended.

Harvey Wenz took care of matters in the second half as he scored

ten of the 22 points in the second stanza. Bobby Ashmore last year's most valuable player, scored 13 for the winners. Otto Machowski contributed 11 for Theta Chi. A capacity houses is expected tonight for the finals which will pit AZO against the "X House" for the championship cup at 8:30 p.m. Carp'n Cass will face Theta Chi in a consolation game prior to the championship game. Trophies for the winner, the runnerup, the most valuable player, and the All-star team will be presented by the Daily Campus.

## BOEING AIRPLANE COMPANY

WILL CONDUCT PERSONAL INTERVIEWS ON CAMPUS

### APRIL 6, 1956

Boeing has many positions open for graduating and graduate students. These opportunities are in all branches of Engineering (AE, CE, EE, ME and related fields). Also needed are Physicists and Mathematicians with advanced degrees.

Fields of activity include Design, Research and Production. Your choice of location: Seattle, Washington or Wichita, Kansas.

Personal interviews will cover the details of openings, the nature of assignments, Company projects currently in work, and miscellaneous information about the Company.

Come and learn about the excellent opportunities with an outstanding Engineering organization—designers and builders of the B-47 and B-52 Multi-Jet Bombers; America's first Jet Transport, the 707; and the Bomarc IM-99 Pilotless Aircraft.

For personal interview appointments—consult your

**GRID CAPTAINS FOR 1956:** Head football coach Bob Ingalls has announced the selection of Norm Gerber (left) and Lou Mooradian (right) as co-captains of the 1956 football squad. Gerber is a junior and Mooradian is a sophomore. They replace 1955 captain Buddy Amendola, who was graduated this February. Both men are line-men. Gerber is tackle and Mooradian is a guard.

A transfer student from Columbia, Mooradian was a starter in his first season as a Uconn last fall. As a high school player at Haverhill High the 5-11, 195-pounder was named to an all-state position from his performance.

Gerber was a stand out this past fall at his tackle post. The 6-1, 205-pound lineman was named the best player at the Yale bowl in the Uconn-Yale game last fall. Married with a sixteen-week old daughter, Gerber is native of Turner Falls, Mass.

## Why the Prime Minister of Japan reads The Reader's Digest

"In this age of stresses, the work of The Reader's Digest, of which I am an avid reader, is of great signi. The Digest publishes the same articles simultaneously in all parts of the civilized world, and, by so doing, it deepens the mutual feelings of concern and good will among different peoples. I earnestly wish for its further development in this difficult world." Ichiro Hatoyama, Prime Minister of Japan

## In April Reader's Digest don't miss:

**CONDENSATION FROM \$3.50 BOOK: "DELIVER US FROM EVIL."** Fleeing the Reds, the Vietnamese came: old women with collarbones shattered by rifle butts, children with sticks driven into their ears. Courageous exploits of a young Navy doctor who won the love and admiration of people who expected only death at the hands of an American.

**WHAT ABOUT THE DEAD SEA SCROLLS?** How the discovery of these now-famous documents (fragments of the earliest-known version of the Bible) throws new light on the origins of Christianity.

**AN EASTER SERMON.** Here, in a condensation from Peter Marshall's sermon "Because He Rose," is Easter's stirring message of hope, as interpreted by the beloved chaplain.

**APPROVED KILLING IN MISSISSIPPI.** A Negro boy, Emmett Till, was abducted by two white men and shot—yet the jury found them not guilty. Facts the jury never heard in the "Wolf-Whistle Murder."

Get April Reader's Digest

40 articles of lasting interest, including the best from leading magazines and current books, condensed to save your time.

# Large Turnout Greets Start Of Frosh Baseball Practice

The big scramble for positions on the freshman baseball team is on. Nearly forty eager frosh candidates greeted Nick Rodis Tuesday as the new freshman baseball coach opened his first practice session of the spring. Rodis, who has coached first year football and basketball for the past two seasons, will make his debut April 24 as a baseball coach at Uconn. Rodis moved into the position this year when former frosh coach Larry Panciera was promoted to the position of assistant varsity coach under J. O. Christian.

## Pritchard Is Bright Spot In Uconn Track Outlook

By MARK HAWTHORNE

A bright spot in the otherwise gloomy outlook for Uconn's chances in the field events of the onrushing outdoor track season is the Huskies' pole vaulting co-captain, Dave Pritchard.

Pritchard's value to the team was dramatically shown in the Huskies' last indoor track meet on March 17 against Rhode Island. He placed second in the pole vault, worth three points, which represented three-quarters of Uconn's field event points.

### Other Performances

Besides the second in the Rhode Island tilt, Pritchard was first against Umass and Northeastern, and tied for second and third respectively, in the MIT and University of Maine meets. He also did well in his first three years of competition at Uconn, and was awarded varsity letters for the past two years.

### Holder Of Uconn Records

The Putnam High School graduate holds the Uconn indoor and outdoor pole vault records, which are currently 12 feet. He expects to better this height this year, his last at Uconn.

### Accounting Major

An advanced Army ROTC student, Pritchard is the Treasurer of the Scabbard and Blade, and a member of the Varsity "C" Club and the American Finance Association. He is a Senior in the School of Business Administration, and is majoring in accounting.

The Connecticut freshmen will play an eight game schedule starting with their home opener against the Yale frosh on April 24. Other teams on the slate are Umass, Rhode Island, Springfield and Wesleyan. Although it is too soon to know just how much real diamond talent will show up among the newcomers, Coach Rodis, feels that the turnout looks promising. Rodis has mentioned Pete Lamb from Housatonic Valley and Dan Doiron of Naugatuck as outstanding pitching prospects. Four other prime diamond possibilities who are presently involved in spring football are shortstop Nick Briante, third baseman Larry Day, outfielder Lou King and catcher Glen McClellan.

The call is still out for candidates and the freshmen may be found practicing in the Guyer Gym Mondays and Tuesdays at 3:30 p.m. and in the field house Wednesday through Friday at 5 p.m. Coach Rodis is also looking for a freshman manager.

## ENGINEERS, SCIENTISTS, PHYSICISTS, APPLIED MATHEMATICIANS important on-campus Interviews soon!

North American Representatives  
Will Be Here

You'll learn first hand about the advantages  
and opportunities in choosing a career with  
a future at North American. Here engineers  
and scientists are now discovering new  
frontiers in four exciting new fields

### AUTONETICS

A Division of North American Aviation, Inc.

In the field of ELECTRO-MECHANICAL ENGINEERING—producing new missile guidance systems, fire and flight control systems, computers and recorders.

### ROCKETDYNE

A Division of North American Aviation, Inc.

In the field of ROCKET PROPULSION—the largest producer of large liquid-propellant rocket engines, more powerful propellants and turbines.

### ATOMICS INTERNATIONAL

A Division of North American Aviation, Inc.

Peaceful application of ATOMIC ENERGY in any phase of reactor development, either for research or power production.

### MISSILE DEVELOPMENT ENGINEERING

Engineering and developing Long-Range MISSILES—Intercontinental MISSILES... flying at hypersonic speeds.

Contact your placement office today. Make an appointment to see  
North American representative, Mr. R. W. HAUKE on April 11.

Or, write Engineering Personnel Director, Dept. 991-20 Col.,  
North American Aviation, Inc., Downey, California.

ENGINEERING AHEAD FOR A BETTER TOMORROW

# NORTH AMERICAN AVIATION, INC.

## Informal Jazz Fest Sunday

Jazz enthusiasts at the University will get a taste of some local jazz talent at an informal session scheduled for this Sunday afternoon at 2 p.m. in the main lobby of the HUB.

Lou Rouschon and the Blue Knights will form the nuclei of the student jazz band sponsored by the Student Union Social Committee. Chairman of the event Edward Mullen, Project E-4B stated that students who play musical instruments are encouraged to attend and bring their instruments so that they may participate in the jazz fest.

The Blue Knights, a student group from Beta Sigma Gamma, will serve as the basic musical unit during the afternoon.

The social committee hopes that many "student-would-be jazz players will attend the jazz session and help to rock the HUB with an afternoon of red hot jazz."

## Harvard Sigma Xi Lecturer To Speak On Earth Waves

The man responsible for the development of the three-component portable seismograph for recording vibrations from explosions and industrial sources which was used at the atomic bomb test in New Mexico in 1945 will speak tonight at 8 in Home Economics 123.

Dr. L. Don Leet, professor of geology at Harvard, will discuss "Use and Abuse of Earth Waves." Dr. Leet is the national lecturer for the Society of the Sigma Xi.

He is also the author of several books and articles including "Causes of Catastrophe," a popular book on earthquakes, volcanoes, hurricanes, and tidal waves.

The professor is presenting his talk before 11 Sigma Xi chapters in the east during April and May. Thursday night's lecture will be the only one held in the state of Connecticut. The lecture is open to the public.

## Cancer Is Subject Of Talk Tonight

Dr. J. Ottenheimer, chief of surgery at the Windham Memorial Community Hospital in Willimantic, will give a talk tonight at 8:15 in Aquinas Hall on the subject of cancer. The meeting has been arranged for and is sponsored by the

Aquinas Women's Guild.

A film, "Breast Self-examination," will be shown and a discussion for the interest of women of all ages will follow.

Tonight's session is being offered as a public service to give the community an opportunity to become informed about the latest findings in cancer with the emphasis on early detection, treatment and cure.

Dr. Ottenheimer, an authority on cancer, is president of the Connecticut Chapter of the American Cancer Society and a member of the Cancer Committee of the American College of surgeons.

## Seniors To Order Gowns By Mail From Company

Dr. Stanley E. Wedberg, chairman of the Senior Class Commencement Committee, noted yesterday that a number of seniors have failed to receive instructions on orders for caps and gowns. He therefore requests that seniors who have failed to do so should send to the C. E. Ward Company attention of Clifford Luce, Shrewsbury, Mass., \$2.50 to cover the fee for a Bachelor's cap and gown along with three cards giving pertinent information. These cards are available at Dr. Wedberg's office, Beach Hall 327.

## Activities

### Fencing Club

There will be a meeting business of the Fencing Club tonight at 7 in HUB 103.

### Orthodox Club

The Very Rev. Vladimir Kaskiw will officiate at an evening vespers service for the Orthodox Club tonight at 8 in St. Mark's Chapel. A coffee will be conducted following the service in the Chapel Lounge.

### Tassels Honorary

A meeting of Tassels Honorary will be conducted tonight at 6:30 in HUB 214.

### Husky Network

All announcers and control operators on the WHUS staff will meet tonight at 7 in HUB 202.
