

NEWS AND GOSSIP.

Mr. Frank Booth is home on a visit. Miss Nettie Parsons has returned from her visit at Walpole, N. H. The schools in District No. 1 will commence Monday, September 5th. The sudden rise in the price of grain is not very pleasing to consumers. Mr. J. P. Gray and family have returned from their trip up the St. Lawrence. Miss Ella Barnes of Warehouse Point has been visiting the past week at Mrs. Juliet Parsons'. A sturgeon weighing one hundred and seventy pounds was caught the other day in the canal near Enfield Bridge by Herman Curtis. Miss Carrie Glidden of Mansfield Center has been spending a few days with her sister, Mrs. F. J. Sheldon. She will visit Bridgeport before she returns home. Miss Belle Brown of New York, a member of the choir of Dr. White's church, assists, with her voice, the Congregational church choir of this place. She is visiting at Miss Laura Allen's. Mr. J. N. Allen has enjoyed a trip to Saratoga and the mountains of New Hampshire and Vermont. The large dairy farms of northern New England and the excellent way in which they are managed was very pleasing to Mr. Allen. Albert E. Clark has gone on an excursion without consulting with his friends. Mr. C. called on Selectmen Allen last Friday noon and informed him that he felt it necessary that he should be taken to the insane retreat at Middletown, where he has been several times within the last five years. Mr. Allen thought that a change might be of benefit to him and sent him to the town farm. Clark stayed over night at the farm and the next morning asked Mr. Moody for some of his clothes. Mr. Moody said he would get them for him as soon as the chores were done. When Mr. M. was ready, Clark was among the missing and has not been seen since. HAZARDVILLE. The schools commence next Monday. Henry Chapin is building an addition to his tobacco shed. The young people had a splendid time at their picnic at Shaker Pond last Thursday. The large packing house at the foot of the hill on the Enfield road is being re-singled. Mr. George Russell, a former resident of Hazardville, has been visiting his sister who has been quite sick. Charles Luce and William Prickett are spending their vacation in visiting Chicago and other Western cities. The Hazard Powder Company are re-igning large quantities of maple and other wood and are shipping powder near-ly.

however, except those under the special supervision of his Satanic Majesty. Old South St. to the number of thirty-one, wended its way to the school-meeting, on Saturday night, and recast its vote in a manner suited to the solemn occasion. Capt. Hamilton received twenty-seven votes, Mr. Alfred Spencer two, and Mr. A. F. Austin one. It is decided to let the Captain have it, until it is found out that there was some illegality about the meeting. POQUONNOCK. Thomas Tracy takes a vacation of a few days at the seaside. Sunday evening another opportunity was offered to witness the blossoming of a night blooming cereus, and still there is more to follow. Four other buds will claim attention at about the same time. The plant is the property of Miss Lizzie Barrett. The Tunxis Worsted Co. gave its employees a free ride to Southwick on Saturday. Thirteen large busses were used in the transportation. The Windsor Cornet band did escort duty. Tuesday the Supt., S. L. Smith, took the Sabbath-school to the same place. RAINBOW. Our street is receiving a fresh coat of gravel. Mr. G. W. Hodge and wife are taking a vacation near Boston, Mass. E. L. Vibbert, wife and daughter are residing at Westbrook, Conn. Mr. C. S. Vidon has been engaged to teach the fall term of school and will commence his labors the first week in September. Mr. Case passed through the place Tuesday with four busses containing the Poquonnock Sabbath-school of about two hundred persons. Thirteen busses passed through our village for Southwick, under the management of Mr. R. D. Case, last Saturday, carrying about three hundred persons, headed by the Windsor Cornet band which played "Marching through Georgia" while passing. It gave our street a lively appearance for a little while. WINDSOR LOCKS. Have you been to the trot? S. M. Anley lost a valuable horse last Monday. Charles Parker had a valuable bird dog poisoned yesterday. James Edwards, who has been in the employ of T. B. Perse, has left town. A. W. Parsons and family have gone to Easthampton to spend a week with friends. The work on the new machine shop progresses finely. The walls are laid to the first floor. Martin Tracey, who has been section master on this division of the railroad, is now at work as a day laborer. F. L. Mather's drug store is nearly completed and we think it is one of the prettiest drug stores that can be found in a country place. Call and see it. Someone broke in the window of Silney's barber shop the other night and stole quite a quantity of tobacco that lay near. An attempt was made last night to break into Sherwood's saloon but Mrs. Sherwood hearing them, frightened them away, when they went to Lanhart's with the same result. Where are the police? The M. E. Sunday-school picnicked at Warehouse Point, yesterday, in a grove north of the depot. A splendid time was enjoyed by all. Swings, games, confectionery and refreshments in abundance. Miss Julia Wallace will not remove her millinery rooms from Burnap's block as was stated in our last issue but there will be a dress-making room opened in Mather's block, in the room vacated by S. B. Parmelee. There was quite a lively runaway yesterday afternoon. McCabe's team got frightened near the depot and ran, throwing out the driver and nearly demolishing a new buggy. The horse was finally caught near the lower end of the town. This place was the scene of quite an excitement Tuesday evening on account of a foot race between Wm. Cotter and Benjamin Gardner who were to run from Grove St. to Elm St. and back, a distance of one mile, for a purse of \$10., which was easily won by Gardner, Cotter giving out before he had gone quarter of the way. Time 4 minutes and 45 seconds. About Marble Quarries. Editor of Thompsonville Press: Last week I went with a Sunday-school excursion to East Dorset, Vt. I made the search for information my principal object, and, to avoid being too long delayed by dinner and such other formalities as were to my subordinate, I took some dinner in my pocket and spent most of the day among the marble quarries about half way up the eastern slope of Mt. Eolis, which is a little more than 3100 feet above the sea. Thinking that perhaps some of your readers might be interested to hear about the marble quarries and mills I will send a few notes upon the subject which I took for my own information and pleasure. The chief wealth of the town is its marble, and a large proportion of its people are engaged in preparing it for market. The quarries vary from 100 to 200 acres in extent. The oldest one was opened in 1808. The strata are usually horizontal and from 1 to 6 ft. thick. From 5 to 20 strata occur together. It is found on both slopes of the mountain, extending from near the base to an elevation of 1400 ft. The principal quarries are (in a straight line) a mile west of the Bennington & Rutland R. R., and one of them, which is owned by J. K. Freedley & Son of Philadelphia, Penn., is connected with the R. R. by a gravity railway up the mountain, at I should think, an angle of 45 degrees. The loaded car with 10 or 15 tons of marble, in descending, draws up the empty car ready for another load. Most of the marble from this quarry is saved into building stone at their mill and shipped to Philadelphia. Those who have never seen a marble mill may be interested to know that the saws are plain pieces of not very hard iron, about as thick as a common large cross-cut saw, and the marble is cut by the sand which is kept supplied upon the block which is being cut. It is constantly kept wet by water dripping from above. I was told by the men in attendance that blocks which I judged to be some 4 feet thick could be cut through in 24 hours. The

saws are put side by side in a frame called a gang, and vary in distance apart to whatever width they wish the block to be. Without having noticed particularly the width of a gang I should say it is 6 or 8 feet, and the number of saws vary according to the width of the blocks which are being cut. One mill that runs 10 gangs of saws employs 11 men and an 80 horse power engine. Beside the saws, one mill had 13 lathes for turning marble and polishing it. One company that employ 125 men sell annually \$150,000 worth. In getting the marble from the quarry they cut a channel along the side of the block and split off with wedges driven under; blasting would cause too much waste. The steam diamond drill which is used will cut a channel 25 ft. long and 4 ft. deep in 10 hours, thus doing the work of 25 men. Besides the marble work there are several cheese factories in the town of Dorset, one of which makes 125,000 lbs. of cheese from some 450 cows, and at one of the saw mills they make from 17,000 to 20,000 cheese boxes per annum. A cider mill there makes 500 bbls. of cider per annum. Among the smaller vegetation of the mountain side I noticed particularly great quantities of wormwood and it suggested to me the thought that life in that region must be a bitter experience. C. E. BRECKENRIDGE. Newspaper Writing. The majority of people imagine that it is the simplest thing in the world to edit a newspaper. A man may have grave doubts about his talents for public speaking; may freely admit that he cannot turn a tune or recognize one when turned by anybody else; may confess that he is no poet, not much of a scholar, and nothing of an artist; but there is no creature so poor-spirited as to avow his incapacity to edit a newspaper. On the contrary, this is work of which every man has a manifest call. No matter what his actual business may be—preacher, lawyer, physician, butcher, baker or candlestick maker—he has a secret fancy that if he only had a chance he could make a newspaper a little bit spicier and livelier than any thing in the shape of a public journal that has ever come in his way. This is one of the most amusing and universal weaknesses of modern times. The number of people who are infected by it are known only to druggists and physicians. The drawers and waste baskets of every newspaper office in the country overflow with evidences of the ambition and harness vanity of the vast public who scribble by stealth, and patiently toil over reams of composition which nobody can be induced to print. It must be admitted that there is something enticing and enviable in editorial life as it appears to the outside world. The delight of getting into print for the first time is one of the keenest enjoyments. What, therefore, both men and women reason to themselves, must be the pleasures of that happy man who daily feasts the public with his wisdom, and whose smallest scribbles finds its way into type without criticism or delay? But this reasoning is altogether unsound. The editor does not look at things exactly in the same rosy light. The bright colors seen by other eyes have become to him a dull cloud. The business, the exquisite charm of seeing his reflections in print has long since vanished. He writes sometimes painfully and under pressure, often harassed by a thousand petty vexations, and not infrequently with aching head and weary hand. His work is, of all work, the most wearying the most exhausting both to body and mind. The call of copy is inexorable and cannot be refused. He must write; he must also endure the most contemptible and continued criticisms, but bear patiently "to be esteemed dull when he cannot be witty, and to be applauded for what he knows he has been dull." Every blockhead who buys his paper feels that he has purchased a right to dictate the manner in which it shall be conducted, to criticize sharply everything that appears in it, and to "elevate its tone" with his own carping leucubrations, fairly written out and inclosed in a note for immediate publication, signed "A Subscriber," "An Old Patron," or "An Earnest Well Wisher." If you were to ask this modest friend to cut you a coat, or measure you for a pair of boots, he would indignantly reply that that was not his trade; that he knew nothing about it and would not attempt it. But the diffidence which shrinks from the shears and coyly draws back from the awl and the lapstone boldly grasps the pen and undertakes to so illuminate and instruct the world. Breeches and shoes require art, experience, reflection, in their making; political essays flow spontaneously from the most added pate, or can be pumped out of it by sheer hand labor, without the vulgar appliances of study, thought and knowledge. Such is life!

Congregational Church. Rev. J. H. Goodell, Pastor. Sunday services at 10.30 a. m. Sunday-school at 12 m. Young people's prayer meeting at 6.30 p. m. Prayer meeting, Thursday, at 7.30 p. m. THE T. PEASE & SONS CO. LUMBER AND Building Materials! LIME AND CEMENT, Nails, Sheathing Papers, Door & Window Glass, Window Pulleys and Weights, Sash Cords, Paints, Oils, Etc. MANUFACTURERS OF Doors, Windows, Blinds, Window Frames, MOULDINGS, Casings, Mantels, Jambs, Brackets, Thresholds, Turned Work, Bread Boards, Ironing Boards, Etc. We have ready for market a fine lot of Extension Step Ladders, made strong and durable. These ladders are pronounced by all who have used them to be the Best Step Ladder for out door use. ALSO BIDWELL'S IMPROVED COMBINED STEP LADDER & WASH BENCH. AS A STEP LADDER it is the best offered to the public. It possesses many advantages over others, both in use and construction. The shelf is acknowledged by all to be a very important feature. It is indispensable to the housekeeper in cleaning house, to the farmer in picking fruit, to the painter and mason while working on walls and ceilings. It is easily converted into a strong Wash Bench, holding two large tubs, or three small ones. It is not a complicated article, but so simple that anyone can operate it with perfect ease. TEAL WATER DRAWER. No water is sweeter or purer than that drawn by "The old oak bucket, the iron bound bucket, The moss covered bucket, that hung in the well." There have been numerous attempts during the last few years to imitate or substitute something in place of this well known WATER DRAWER, but it is confidently believed none has yet been found, which for simplicity of construction, cheapness in price and durability, compares with this in general favor and convenience. It would seem that its long use and approval would be sufficient guarantee of its superiority. Lumber Yard and Planing Mill at Thompsonville. Branch Yard at Windsor Locks. Connected by Telephone. GRAND CENTRAL DEPOT! THE THOMPSONVILLE PRESS. ENFIELD STREET. Published every Thursday Evening, by The Parsons Printing Company, LINDSEY'S BLOCK, MAIN STREET. The THOMPSONVILLE PRESS is a large folio weekly of thirty-two columns, filled with interesting reading—New England, local and general news, and well-selected miscellany. Papers are forwarded until an explicit order is received by the publishers for their discontinuance and until payment of all arrearages is made, as required by law. No notice will be taken of anonymous communications. Whatever is intended for insertion must be authenticated by the name and address of the writer; not necessarily for publication, but as a guarantee of good faith. We do not hold ourselves responsible for any views or opinions expressed in the communications of our correspondents. RATES OF ADVERTISING. Nine lines of Brevier type, or one inch space, constitute a square. Cards of one inch type or less, per year, \$5.00. Local Notices, 10 cents a line. Ordinary advertising per inch, one week, 75 cents. Each subsequent insertion, 25 cents. Special rates to large advertisers made known on application. Transient advertisements to be paid in advance. Births, Marriages, and Deaths inserted free. All communications should be addressed to THE THOMPSONVILLE PRESS, Thompsonville, Conn.

BEHOLD!

"I Bring You Glad Tidings of Great Joy."

JOY TO THE AFFLICTED.

"Still They Come!"

Flattering endorsements of Dr. Sweet's Methods of treatment by Samuel Snell, Esq., the well-known Cement Pipe manufacturer of Holyoke.

The irrefragable testimony of responsible and incorruptible business men is respectfully submitted.

Severe and Dangerous Diseases of the Kidneys Cured in only Three Months.

Dr. Preston Sweet—Dear Sir: Having suffered for several years from a variety of complaints, notable among which was kidney disease, and having seen assistance from numerous quacks without any benefit, I was induced to try your medicine, and to my great surprise, I found it to be the only one that has cured me.

PURE PREPARED PAINTS

Comparative cost of painting a dwelling or other building with strictly Pure White Lead and Linseed Oil, and OUR PURE PREPARED PAINTS.

A building having a total surface of 2,000 square feet to be painted would require, under ordinary circumstances, as follows:

480 lbs. Strictly Pure White Lead, at say 10c per lb. \$48.00

24 gallons Linseed Oil, at 75c per gallon, 18.00

Time, mixing and preparing paint, drying, and application, at say 2c per lb., 9.60

24 gallons Pure Prepared Paint, at say \$2.50, 60.00

3 gallons Linseed Oil, at say 75c, 2.25

27 gallons paint, costing per gallon about \$1.86, 50.22

Saving effected by use of our paint, 20.55

The relative value of these two paints is always the same; and, whatever the price of White Lead may be, the price of OUR PAINT will correspond.

FOR SALE BY—

GENTLEMEN, Your Coats are faded, nor worn; have them cleaned, color restored, or dyed in elegant good as new again. A year's wear saved—Economy is worth.

Bring your goods yourself or send them. A SLOAN & SONS Agents for Thompsonville and vicinity.

RESUED FROM DEATH.

The following statement of William J. Conghlin, of Somerville, Mass., is so remarkable that we beg to ask for its attention of our readers. He says: "In the fall of 1876 I was taken with a violent bleeding of the lungs followed by a severe cough. I soon began to lose my appetite and flesh. I was so weak at one time that I could hardly leave my bed. In the summer of 1877 I was admitted to the City Hospital. While there the doctors said I had a hole in my left lung as big as a half dollar. I expended over a hundred dollars in doctors and medicines. I was so far gone at one time a report was given that I was incurable. I gave up hope, but a friend told me of DR. Wm. Hall's Balsam FOR THE LUNGS. I laughed at my friends, thinking that my case was incurable but I got a bottle to satisfy them, when to my surprise and gratification it cured me. My cough, my appetite, my strength, my health, my hope, one dead, began to revive, and to-day I feel in better spirits than I have for the past three years.

"I write this hoping you will publish it, so that every one who is afflicted with Consumptive Lung, will be induced to take DR. Wm. Hall's Balsam FOR THE LUNGS, and be convinced that CONSUMPTION CAN BE CURED. I have taken two bottles and can positively say that it has done me more good than all the other medicines I have taken since my sickness. My cough has almost entirely disappeared and I shall soon be able to go to work." Sold by druggists.

Let the soil be turned as strenuously toward gold as it usually is toward evil, and you will find that the simple love of goodness will give incredible responses to the spirit in the search after truth. Love, with intellect, will perform miracles.

CURED AT DR. SWEET'S

Stiff Knee Joint and Dyspepsia.

Cured in Three Months by Dr. Preston Sweet.

Almost two years ago I was attacked by a violent dyspepsia, which interfered with my health. I was markedly weakened. Soon after I found the cause of my trouble, and by the use of Dr. Preston Sweet's medicine, I was cured in three months.

Dr. Preston Sweet—Dear Sir: Having suffered for several years from a variety of complaints, notable among which was kidney disease, and having seen assistance from numerous quacks without any benefit, I was induced to try your medicine, and to my great surprise, I found it to be the only one that has cured me.

HOUSEHOLD.

Breakfast toast: Mix two tablespoonfuls of sugar, a little salt, and a well-beaten egg, in half a pint of milk. Into this mixture dip slices of bread, and fry them on a buttered griddle till they are light brown on each side.

To keep dried fruit from becoming wormy, after being prepared, as it should always be before putting away, by sealing, as you put it in sacks scatter amongst it pieces of sassafras bark from the root. To close; it will keep years.

Bride cake: A cupful and a half of sugar, half a cupful of butter, the whites of four eggs, two cupfuls of flour well mixed with two tea-spoonfuls of yeast powder, a tea-spoonful of extract of lemon, and half a cupful of milk. Frost.

Breaded eggs: Boil hard and cut in round, thick slices; pepper and salt and dip each in beaten raw egg, then in fine bread crumbs or powdered cracker crumbs and fry in butter, hissing hot. Drain off every drop of grease and serve hot.

Plain omelet: Six eggs, one tablespoonful of flour, one cup of milk, a pinch of salt. Beat the white and yolk separately. Mix the flour and milk and add the yolks, then add beaten whites. Have a buttered spider very hot; put in. Bake in a quick oven five minutes.

Prune pie: Take a pound of prunes and soak them overnight, so that the stones will slip out easily; stew in some water with as many raisins as you wish, and sweeten; use less water than for sauce; when both are soft grate in the rind of two lemons and fill the pie, allowing two crusts.

For crump: Take a knife or grater, and grate or shave in small particles about a tea-spoonful of alum; mix it with about twice its quantity of sugar, to make it palatable, and administer it as quickly as possible. Its effects will be truly magical, as almost instantaneous relief will be afforded.

Cabbage salad: A quarter of very finely cut cabbage, two-thirds of a cupful of sour cream, two well-beaten eggs; season to taste with sugar, salt, pepper and mustard. If you have no celery to chop with your cabbage, put in a tablespoonful of celery-seed. Add a little vinegar. This is very fine. It will keep well for several days, and is excellent for picnics.

Caramel for coloring: Half a pound of brown sugar; one tea-spoonful of water; put into a frying-pan, and stir steadily over the fire till it becomes a deep, dark brown in color; then add one cup of boiling water and one tea-spoonful of salt; boil a minute longer, bottle, and keep corked. One table-spoonful will color a clear soup, and it can be used for jellies, gravies and sauces.

To preserve pears: Parboil the pears until a straw can be darted through them. Set them on dishes to cool. Meanwhile for each pound of fruit allow one pound of white sugar, and when clarified put in the pears—in the blossom end of each should be stuck a clove—and boil until clear jam. Pear jam is made precisely like peach jam, only pears must always be parboiled in the first instance.

Queen pudding: Take half a pound of apples, weighed after they are peeled and cored; chop them very fine; the juice of two lemons; the thick cream of two eggs; six well-beaten eggs, the yolks and whites separate, the whites not to be added till the pudding is ready for the oven; line your baking-dish with thin slices of stale sponge cake or lady fingers; bake in a quick oven.

Bleached flannels: A solution of one and one-quarter of a pound of white soap and three-eighths of an ounce of spirits of ammonia, dissolved in twelve gallons of soft water, will impart a beautiful and lasting whiteness to any flannels dipped in it, no matter how yellow they have been previous to their immersion. After being well stirred round for a short time the articles should be taken out and well washed in clean, cold water.

Orange cake: Mix two cups of sugar with the yolks of two eggs, then add the whites beaten to a stiff froth; next, add a large table-spoonful of butter, then one cup of milk and flour to make as stiff as cup-cake; flavor to taste; bake in jelly-pans. Filling: One lemon, two oranges, grate the rinds, add the juice, one cup of sugar, one table-spoonful of corn-starch, one cup of water; boil until smooth; cool before putting between cakes.

Onion ragout: Fry a pint of young onions and three or four large ones, finely minced, in butter or dripping in a larder, until they become rich brown. Add a quarter of a pint of good stock, and season with pepper, salt, and mustard, and some good table sauce. Thicken with ground rice or wheat flour; simmer for fifteen or twenty minutes, and serve garnished with triangular pieces of toast. This makes an excellent supper dish.

German peach pickle: Boil together one gallon of good vinegar, seven and a half pounds of brown sugar, two ounces of mace, two ounces of allspice, one ounce of cloves, with a little scraped horseradish. All the spices must be beaten. After these have boiled well, put in fifteen pounds of peeled clingstone peaches, and boil well together till the peaches are done enough to stick a straw through to the stone; if they are boiled too much, they will fall from the stone. If the pickle should begin to work, pour out all the liquor from the fruit, boil it well, and pour it boiling hot over the fruit.
