THE LIMITS OF VISION.

H. S. BYINGTON,

It has been asserted that the eye of the common house fly is capable of discerning on object the five-millionth of an inch in diameter. Prof. Rogers of Cambridge says he can distinguish lines ruled in glass which are only 1-50,000 of an inch apart, simply by unaided vision. Prof. J. Le Conte, however, places the limit of human vision for good eyes at the 1-1,000 inch as the smallest distance at which To appreciate the perfection of the eye

two objects can be seen apart. as an instrument, it may be interesting to notice how the other senses would perform the same work. For instance, if we take a pair of divi-

ders and stick on each point a mustard seed, so that the impression on the skin shall not be too pungent, and then try on another person, whose eyes are shut, the least distance apart at which two distinct impressions can be perceived, it will be found that on the middle of the back it is about three inches; on the arm or back of the hand, about 1 to 3 of an inch; on the palm, about 1 of an inch; on the linger tips about 1-12 or 1-16 of an inch; and on the tip of the tongue, about 1-20 of an inch or less.

Combining hum n vision with the powers of the most powerful and perfect compound microscope, it is found that the limit of vision is reached when lines 146,528 to the inch are separated, and that the theoretical limit of the power to discern a single object is about 1-113,000 of an inch. This limit has been nearly but not quite reached by most perfect

When, therefore, the maximum power of human vision, backed by the most powerful and perfect microscopes, does not reach much over about one hundred thousandth of an inch, the absurdity of attributing a limit of one five millionth of an inch to any kind of unaided vision is apparent. The eyes of many insects are indeed extraordinary organs, and what we generally designate as the eye of a fly is really a compound eye, made up of hundreds and even thousands of separate lenses called occellites. Of these the common house fly has 4,000 in the two eyes. The structure of these occellites is well known, the optical part of each consisting of two lenses, which combined form a double convex lens. That each occellite acts as a separate eye can be easily proved by detaching the whole of the front of the compound eye. and by manipulation with a microscope it is not difficult to examine a photograph or other object through it. When this is done a distinct image is seen in each occellite. Dr. W. B. Carpenter has shown that each occellite reflects but a small portion of the image looked at, and that it requires the combined action of the 4,000 lenses of the fly to produce the same effect as that seen by the one human eye. The human eye is, therefore, a far more perfect optical instru-

ment than the eye of the fly. compound eyes single eyes, called occili. The larve of insects have to depend on the single eyes, the compound arrangement appearing at the later stage. As to the limit of vision of such compound eyes of insects little is certainly known. The writer of this article, who is himself well acquainted with the anatomy of insects, consulted Mr. J. D. Hyatt of Morrisania, who is a great authority on

such questions, and who says: "I have given considerable attention to the investigation of compound eyes, but have made no discovery that would lead to the conclusion that their power of vision with respect to small objects exceeds that of the simple eyes of the higher animals. The images of objects formed in the separate lenses composing the compound eye are proportionally small, and the question whether insects can see smaller objects than animals furnished with single eyes is not a question of optics, but of the sensitiveness of the optic nerve, and consequently, in the present condition of our knowledge, a matter of mere conjecture."

HOW BEDOUINS CONQUER THIRST. In an article on "The Rescue of Chinese Gordon," to be found in "Open Letters" in the Century, General R. E. Colston, late of the Egyptian General Staff, says: "In the 'Waterless Land,' water is the paramount question. If it be asked how a large body of Bedouins like the ten thousand who nearly de- to be married, and to baptize their stroyed the British squares at Tamai manage to subsist, the reason is plain. In the first place, they do not need the the enormous trains required for a European army. The are the most abstemions of men. Each man carries a skin of water and a small bag of grain, procured by purchase or barter from caravans. Their camels and goats move with them, supplying them with milk and meat, and subsisting upon the scanty herbage and the foliage of the thorny mimosa, growing in secluded wadies. These people could live upon the increase of their flocks alone, which they exchange readily for other commodities; but being the exclusive carriers and guides for all the travel and commerce that cross their deserts, they realize yearly large amounts of money. As to the water, they know every nook and hollow in the few barrels of water collect in some skins. On my first expedition, near the some wells on which I was depending, Bedouin guides knew some natural reservoirs in the hills about six miles off. fall, and came back before daylight with

wonder they can subsist where invaders would quickly perish."

the water-skins filled. An invading

army would find it hard to obtain guides,

and even if they did, they must keep

together, and could not leave the line of

march to look for water. Besides, the

Bedouins, accustomed from infancy to

re, ard water as most precious and rare,

use it with wounderful economy. . Nei-

ther men nor animals drink more than

once in forty-eight hours. As to wash-

ing, they never indulge in such wasteful

nonsense. When Bedonins came to my

ing up the habit of abstemiousness. No

DEPRAVED TASTE OF A CODFISH. Among the curiosities exhibited at the headquarters of the Fish Commission in were found in the pouch of a cod cap tured by Capt. Cornwallis Swim, of the schooner Sophronia, last fall. Two of the cards, the Jack of clubs and ten of spades, are in a perfect condition; but the deuce of diamonds and deuce of hearts each have one spot obliterated and only a small part of the other card remains. It is thought that the chance of five cards remaining together in the water long enough to be swallowed by a fish, are rare, and the supposition is, that the cod must have had tastes for

DIVORCE LAWS OF THE WORLD.

The following particulars as to the methods of securing divorces in different countries may be useful: Australians-Divorces have never been

sanctioned in Augralia. discretionary power of divorcing their Javans-If the wife be dissatisfied she

can obtain a divorce by paying a certain lowed, unless with the consent of both parties-neither of whom can afterward

Moors-If the wife does not become the mother of a boy she may be divorced with the consent of the tribe, and she can marry again.

Abyssinians-No form of marriage is necessary. The connection may be dissolved and renewed as often as the par-Siberians-If the man be dissatisfied with the most trifling acts of his wife, he

tears her cap or vail from her head, and this constitutes a divorce. Corean-The husband can divorce his wife, or treasure, and leave her the charge of maintaining the children. If

she proved unfaithful he can put her to vorced, not sold, as the others may be. She may then claim the first, third, and

fifth child, and the alternate children are Arctic Region-When a man desires a divorce he leaves the house in anger and does not return for several days. The wife understands the hint, packs her

clothes, and leaves. Druse and Turkomen-Among these people, if a wife asks her hushand's permission to go out, and he says "go," without adding "but come back again," she is divorced. Though both parties

desire it, they cannot live together without being re-married. Cochin Chinese-If the parties choose to separate they break a pair of chopsticks or a copper coin in the presence of dissolved. The husband must restore to the wife the property belonging to her

the pieces of sticks given the witnesses of the marriage are burned as a sign of divorce. Usually new connections are formed without the old ones being dissolved. A man never divorces his wife

Tartars-The husband may put away his partner and seek another when it pleases him, and the wife may do the girl at the risk of bronchitis or laryngito the magistrate, who, attended by the principal people, accompanies her to the house, and pronounces a form of divorce. Chinese-Divorces are allowed in all cases of criminality, mutual dislikes. jealousy, incompatibility of temper, or too much loquacity on the part of the wife. The husband cannot sell his wife until she leaves him, and becomes a slave to him by action of the law for desertion. A son is bound to divorce his wife if she displeases his parents.

By the Hurons the moon is called the creator of the earth and the grandmother of the sun. In the myths of Ottawas it is an old woman with a pleasant white facethe sister of the day star. The Chiquitos call the moon their mother, and the Navajos make it a rider on a mule.

Where the planets are worshipped,

preference in honors is generally accorded to the brighter and more conspicuous star of the day. But the Botuendos of Brazil give the higher place to the moon and derive most of the phenomena of nature from it, and in Central America and Hayti are also people who hold the moon in no less honor. Curiously these people find their counterparts among tribes of Western, Southern and Central Africa, who rejoice with dancing and feasts at each appearance of the new moon, and expect an improvement of their condition from its beneficent influence, and they are not so far removed from the superstitious women of civilized Europe and America who wait for the increase of the moon to change their dwelling, to cut their hair,

A belief existed among the ancient Mexicans and Peruvians, the Natchez of the Mississippi, and the Apalachians of Florida, that the sun was the radiant

abode of dead chiefs and braves. To the Esquimaux of Labrador belongs the honor of having discovered that the moon was the paradise for the good, while the wicked were consigned to a hole in the earth; although some of the South American Indians and the Polynesians of Tokelau may be nearly abreast of them in the competition.

A SHINING TREE, Says the Tuscarora (Nev.) Times: A most remarkable tree or shrub grows in a gulch near some springs, about twelve mountains, away from the trails, where a miles north of Tuscarora. It is about six or seven feet in hight, with a trunk shaded ravine, and they can scatter, which, at its base, is three times the size every man for himself, to fill their water- of a man's wrist. It has innumerable branches and twigs, and resembles someclose of the three years' drouth, I reached | what the barberry tree. Its foliage at certain seasons of the year is so humiand found them entirely dry. It was nous that it can be plainly distinguished several days to the next wells. But my in the darkest night for a distance of more than a mile, while in its immediate vicinity it emits sufficient light to enable So they took the water camels at night- a person to read the finest print. Its foliage is extremely rank, and its leaves resemble somewhat, in size, shape, and color, those of the aromatic bay tree of California. The luminous property is evidently parasitic, which, upon being transferred by rubbing to a person's hand, imparts to it the same apparently phosphorescent light, while that on the leaf entirely disappears.

Women, especially those of the upper camp water was always offered them. thanks; I drank yesterday. They after middle age, sometimes earlier, a considerable amount of their height, not national prejudices against all that is by stooping, as men do, but by actual collapse, sinking down-mainly to be attributed to the perishing of the muscles that support the frame, in consequence of habitual and constant pressure of stays and dependence of the artificial support by them afforded. Every girl who wears Washington, are five playing cards that stays that press upon these muscles and restrict the free development of the fibres that from them, relieving them of their natural duties of supporting the spine, indeed incapacitating them from so doing, may feel sure she is preparing herself to be a dumpy woman.

A PRETTY HAT RACK.

A charming fancy for a hat rack is the trunk of a tree with the branches cut off of the limbs, and the limbs cut back to games beyond his usual prey, and de convenient length for pegs. It may be liberately and separately swallowed the varnished or not according to taste, but in either case it is very pretty, and novel. of what they omit to do for us.

AN OLD NEW ENGLAND CUSTOM, In early New England days, as far pack as the middle of the eighteenth century, when hospitality was a practice as houses only one large assembly room, and there the family and all the guests and chance callers gathered on Winter nights about the blazing fire of logs. We know that youth was youth and love was love, and young men were timid and maidens were shy, and courtship went on in those days. How was courtship possible in this common room, where every word was heard and every look taken notice of? We read in the admirable volume on the recent centennial of Long Meadow, Mass., by Professor Richard S. Storrs of that town, that in the Winter evenings, for the convenience of young lovers, since there was no "next room," courting sticks were used -that is, long wooden tubes that could convey from lip to ear sweet and secret whispers. Was this an invention peculiar to Long Meadow? It is a charming picture that this calls up of life in a Puritan household, this tubular lovemaking, the pretty girl (nearly every girl is pretty in the fire-light of long ago) seated in one stiff high-backed in another, handling the courting-stick, if not of true love. Would the young man dare to say, "I love you," through laughing tender eyes of the girl when she replied, through the same passage, "Do tell?" Did they have two sticks, so that one end could be at the ear and the end of the other at the mouth all the while? How convenient when the young man got more ardent than was seemly, as the flip went around, for the girl to put her thumb over the end of the tube, and stop the flow of soul! Did the young man bring his stick, and so announce his intention, or did the young lady always keep one or a pair on hand, and so reveal both willingness and expectation? It was so much more convenient than the telephone, with its "hello "and procelamation to all listeners at each end of the line. Lovers can make love with anything, even with s telaphone; the successful courting of a deaf person (for there is one word that nearly everybody likes to hear), as we know, can go on through a speakingtrumpet: but these courting-sticks seem to us the ne plus ultra of tender communication-when a third party is present. They would be very useful now at large parties, where there is such a din and bable that one can only court a pretty tis. Sometimes in the jam you cannot ing-stick you could wile her away from from her too near admirer. This invention seems to us worthy of revival for many reasons, and we should be glad of any further information in regard to it. Civilization in its progress drops a good

many things that ought to be retained. WOUNDS OF GENERALS IN ACTION.

A curious article might be written on the immunity from wounds in action of some generals, and the ill-fortune of others in becoming the billet for a bullet. No commander was ever more forward in the fighting line than Sheridan, yet he never got a scratch. Skobeleff. who many a time went at it with his own good sword, and in his white coat and on his white charger headed every charge with a recklessness that men called madness, had as complete an immunity as if he carried the charmed life that his soldiers ascribed, and was wounded only in the quiet trenches by a chance bullet fired into the air a mile away. Wellington was but once hit; the bullet that carcried away his boot-heel scarce gave him

a contusion. Grant was never struck: no more was Napoleon. Of Sir Neville Chamberlain, again, one of the most distinguished officers of the Indian army, the saying goes that he never went into action without receiving a wound, and the gallant old man has been fighting pretty steadily ever since the first Afghan war. Bazaine was a man to whom fortune was not stingy in the matter of wounds. At Borny there came to him the leaden reminder that he was mortal, though this time it was but a gentle hint. The fragment of a shell hit him on the left shoulder, but it had been well spent, and because of the protection of the epaulette gave him but a contusion, for which he had pain for several days, especially when on horseback.

FRENCH AND ENGLISH DETECTIVES.

In England we have a curious but very erroneous idea that if a policemar wears a suit of plain clothes instead of his regular uniform he is fully able to find out all about any crime that has ever been committed. A greater mistake never made. Not only to the "danger ous classes," but to almost every Londoner who is anything of an obser ver regarding his fellow-men, "plainclothes" officers, as our detectives are called, are actually as well known as if they wore the helmet, blue tunic, and black leather waist-belt of the regular policeman. It is quite otherwise in France. A French detective has nothing whatever to do with serving summonse or warrants. He never arrests a criminal, but he points out to the regular police where criminals are to found. It is only on very rare occasions that he even appears as witness against a prisoner, and when he does so he assumes for the future a dress and general appearance quite unlike what he has hitherto borne. A French detective who cannot disguise himself in such a manner that his oldest friend would not be able to recognize him is not deemed worth his salary. He takes the greatest professional pride in tives are the spies sent by the army of law and order to find out all about the the consequences? Why, that unless a murderer, burglar, or other offender is Sooner or later, notwithstanding our secret and underhand, we must adopt a system for the detection of crime on the plan that is found to work so well in

France, and the sooner we do so the

in general, and London in particular,

more than even it is now the happy

hunting-ground of all the scoundrels in

pegs in the round holes.

The two sciences which are progressing with almost startling rapidity are chemistry and surgery. These promise to distance all others, not excepting geology, which is a comparatively new branch of scientific investigation. The recent discoveries in chemistry are certainly very extensive and most important, but somehow the curative processes do not keep pace with the finding of new affinities by the chemists and the new compounds which result therefrom. The doctor is still hardly wiser than in the days when he discussed the merits of Brown, Rush, Chapman and Watson. Only the surgeon has advanced in his art to a degree that would amaze experts like John Hunter, Valentine Mott, Stone and Nott. Amoutation for trivial causes is growing more uncommon, and the hacking process yields to the bold and scientific methods of surgeons more dar-ing than Velpeau. Recently, at one of the New York hospitals, a patient with a fractured skull came away, while other portions were skillfully extracted, and result was that a part of the gray matter of the brain protruded several inches. The arteries running near the surface of the gray convolutious could be distinctly seen answering the pulsations of the heart. A rupture of one of those little rivers of blood would have been fatal, unless, indeed, it could have been quickly tied, a feat yet to be accomplished in that portion of the human system. The protruding brain was pushed gently which had been ruptured, was sewn up with catgut, which the absorbents will soon take up and scatter throughout the body. Injuries to the dura mater have heretofore been regarded as necessarily fatal, the membrane being thinner than tissue paper. The curative process of nature will cover the opening in the skull, first with a grizzly substance, and then with bone of sufficient thickness to protect the brain. In Louisville, Ky., not long since, a severe and dangerous experimental surgical operation was made on a patient while under mesmeric influence. That astonished the medical faculty, but the New York achievement lays it in the shade. There is no doubt surgeons hereafter reaching internal organs, so that organic lessons can be Dr. Allison, a London physician, has directly, and not indirectly, treated, as been making experiments on a monkey. now. COUNTRY ROAD MAKING. It is a matter of universal comment with travellers that country road making in the United States is either a lost art or a to-be-acquired science. The average selectman or road agent of a country town is usually deplorably ignorant of the first principles of making a good road. In England and most of its dependencies the roads are made directly by the state or under its supervision. As a result, the contrast between English roads and those of this country is much in favor of the former. A common this country is that an intelligent farmer must necessarily know how to make a good road, but the reverse is the fact. Road making is a subject requiring study and a knowledge of the nature of soils. A well made road even in our climate and with the wide difference in soil ingredients, will last for years, whereas ordinarily the items of repairs on our roads means an entirely changed thoroughfare, the pitch, watersheds and general character being more in the way of experiment than a scientific renovation. The country road maker commences by throwing out the big stones on to the side of the road, retaining the smaller ones, when by thoroughly bedding the big stones the best possible foundation is had, and with a covering of small stones mixed with gravel, or even with good loam carefully harrowed and scraped, a road bed is formed which will defy both rain and heavy teams. Generally the tyro devotes his time to heaping the material in the centre with such a slope as often to interfere with locomotion, and which heap the first heavy team resolves into deep ruts, vitiating its usefulness for any but a similarly heavy team, and for it only with constantly increasing strain on the horses. Yankee ingenuity has invented capital road making tools which need but intelligent application to develop such thoroughfares as would make them admired in place of being a reproach and shame. Our country is rich enough to place the roads in the hands of such government as will insure their perfection instead of leaving them to town officials without the education or experience necessary to an accomplishment of

FAINTING. It is surprising how everybody rushes at a fainting person and strives to raise him up, and especially to keep his head erect. There must be an instinctive apprehension that if a person seized with a fainting or other fit fall into a recumbent position death is more imminent. Always remember this fact, namely: Fainting is caused by a want of blood in the brain. The heart ceases to act with sufficient force to send the usual amount of blood to the brain, and hence the perperson recovers. Now, though the blood is propelled to all parts of the body by the action of the heart, yet is still under the influence of the laws of gravitation. enemy that is constantly waging war against life and property. In England we In the erect position the blood ascends to the head against gravitation, and the have no similar set of men, and what are supply to the brain is diminished as compared with the recumbent position, the heart's pulsation being equal. If, either taken red-handed, or leaves be- then, you place a person sitting whose hind him some very plain marks as to heart has nearly ceased to beat, his brain classes, who are not obliged to keep who he is or where he is to be found, will fail to receive the blood; while if Their answer would frequently be: 'No, themselves in condition by work, lose crime with us is, as a rule, undetected. you lay him down with the head lower the table in San Francisco. There were than the heart blood will run into the brain by mere force of gravity, and in fainting in sufficient quantity to restore consciousness. Indeed, nature teaches us how to manage fainting persons, for they always fall and frequently are at once restored by the recumbent position better, unless we want to make England into which they are thrown.

SNUFF IN CORNWALL

Says an English contemporary: The miners of Cornwall are the best customers of our snuff merchants, their consumption being enormous. Nearly hundred tons of snuff-what is known as "violet snuff" is their favorite "sneeze"-will go down to them in a year, all done up in one-pound packets. "Tom Buck" is a snuff which is sent in large quantities into Yorkshire, where it is extensively consumed by the mill-girls. The straw-plaiting girls in Bedfordshire also manifest a strong partiality for this snuff.

GERMAN SERVANTS

In their own country they are admirable, clean, obliging, and wonderfully hard working, but they lack the finish of good English servants. One great merit they certainly possess—though orderly in their work, yet if the daily routine is interrupted they are not utterly upset and demoralized. Our servant kept eight rooms clean, and very clean, never speck of dust to be seen, cooked for herself and the landlady, fetched our dinner from the restaurant, carried up to our etage (the second) all the wood and water that was required, scrubbed the stairs and passage every week, and yet was always ready to run a message or post a letter, and, dressed in her best, frequently went with me to the evening concert, and came back to fetch me at 10 o'clock. She was never in bed till 11. and was at work by 6, neat and smiling, with no shade of the weary, jaded look so sad to see in an English "slavery. I: is a mistake to suppose that wages are very low in Germany; £20 is a very usual sum for a cook, and one servant we had in our lodging when she married had £40 in the savings bank. The economy in a German household is that the servants live very plainly, and one does the work that with us would be divided between two or three. The feeling of attachment and interest in "the honor of the family," so observable in Scotch servants, is very general, and without undue familiarity German servants are allowed to share in the joys and sorrows of their employers. The men servants are strikingly free from the insolent swagger of "Jeames," and show the same simplicity of nature as their masters. I renember a trifling incident which greatly amused me. When I was going to an audience at a royal Schloss, as I got out in the door and was torn off. "Oh, what a pity, Gnadiges Fraulein!" exsisting me. "Never mind, I can pin it on!" and producing a pin, he carried out his promise with a neathandedness worthy of an old soldier, which no doubt

habits. He is about eighteen inches high, and tame. I feed him with the same food I take myself. He likes fruits struction through surgical art and best of all; raw grains and cooked vegeremedial agents is but a question of tables and potatoes next. He prefers his time. Not only will longevity be in- potatoes without salt, and his rice withcreased, but the general health of manout sugar. Peas and beans he will not eat unless very hungry. He always eats with his hands, the same as the Turks, and, as he does not wash them beforehand, he swallows much dirt. When I give him hot food he has to wait until it cools before he can eat it, or before he dare thrust his hands into it. I tried his plan a few times with my porridge and stews, and had to wait before I dare finger them. I thought that if mankind were forced, like my monkey, to eat with their fingers, that we should not damage our teeth and stomaches with hot foods. nor should we indulge in soups. Soups are very good for exhausted people, but not so good for persons in health, as they are not as easily digested as more solid articles; in fact, the superfluous fluid they contain must be absorbed before digestion goes on. Every food I offered him was first of all smelt of, and then, if the smell was agreeable, he ate it; if otherwise, he threw it down. If mankind would always be guided by the sense of smell we should eat less rotten cheese, high game, etc., than we do, and consume more delicious fruits, whose aroma naturally attracts us. He is also a nose breather, and I never saw him breathe once through his mouth—another good example which mankind might follow with benefit, as we naturally are nose-breathers."

THE WORSHIP OF GOLD.

The worship of gold can be shown to have descended to us from sun worship, which, in some form or other, has been almost universal. In plain words, men took to collecting gold and making gold trinkets, charms, and amulets, because gold was of the same color, and possibly of the same divine material, as the sun. The sacredness of gold seems indicated by Pindar, who, invoking Theia, the mythical mother of the sun god, exclaims, "Through thee it is that mortals esteem mighty gold above all things else!" Originating thus in the most absurd superstition, the supposed likeness of the yellow metal to the color of the sun god's face, the value of gold has prevailed over the world for so many ages that it has become a hereditary passion; and because of the value thus set on it, and for no other reason, gold has long been the highest metallic medium of exchange. Mr. Robert Brown, F. S. A., in his learned and interesting treatise, "The Myth of Kirke," remarks : "The links between gold and solar divinities are endless, and the circumstance supplied a natural basis for the commercial value of the metal." Elsewere the same writer observes: "The bright solar divinities are, of course rich in gold, a metal originally owing its importance to its yellow (sun) color, which made it at once semi-sacred and symbolic long ere it received an artificial commercial value."

The "blue cat" is the salmon of the West, the brook trout of the Missouri. Twenty odd years ago there was a period of wild excitement in San Franciso. Tall, muscular men met each other and spoke in hushed tones of intense excitement. Everybody knew that something of grave importance was about to transpire, but only a favored fifty or so were aware that a "blue cat" had been shipped overland, carefully kept in ice the entire journey, and that the sacred fish was to be served up to all loyal Missourians that day. The "cat" weighed about twenty-five pounds and it cost in the neighborhood of \$150 to place it on amount to secure a morsel of it, who had to revel in "blue cat" imagination that sorrowful day.

A PEN-PORTRAIT OF OUIDA.

My attention was attracted by a woman some forty years of age, who was gor-geously attired and seemed in her manner to feel that she was somebody and anxious to impress others with that fact. She was tall, well set up, with England's imestone formation in the way of bones. well covered with adipose rather coarse in tissue, garnished with light blue eyes and an abundance of yellow hair. There was something vulgar in this woman's

known novelist -Ex.

Absolutely Pure.

KENNEDY'S

FEARFULLY COMMON.

There is something startling in the rapid increase of Kidney diseases among the American people within a few year past. Many causes peculiar to certain classes tend to produce and aggravate these troubles—as, for example, careless living, overwork, and exposure. Dr. David Kennedy, of Rondout, N. Y., is often congratulated on the exceptional success of his medicine called FAVORITE REMEDY in arresting and radically curing these most painful and dangerous disorders. Proofs of this, like the following, are constantly brought to his attention, and are published by him for the sake of thousands of other sufferers whom he desires to reach and beneft. The letter, therefore, may be of vital importance to you or to some one whom you know. It is from one of the best known and popular druggists in the fine and growing city from which he writes—and doubtless where those may find Mr. Crawford at his place of business on the corner of Main and Union Streets:

DF. D. Remedy, Rondoud, N. Y.:

DEAR SIR: For ten years I had been afflicted with Kidney disease in its most acute form. What I suffered must be left to the imagination—for no one can appreciate it except who have gone through it. I resorted to many physicians and to many different kinds of treatment, and spent a great deal of money, only to find myself older and worse than ever. I may say that I used 25 bottles of a preparation widely advertised as a specific for this precise sort of troubles, and found it entirely useless—at least in my case.

Your FAVORITE REMEDY—I say it with a perfect recollection of all that was done for me besides is the only thing that did me the slightest good; and I am happy to admit that it gave me permanent FEARFULLY COMMON.

sides is the only thing that did me the slightest good; and I am happy to admit that it gave me permanent relief. I have recommended FAVORITE REMEDY to many people for Kidney disease, and they all agree with me in saying that DR. DAVID KENNEDY'S FAVORITE KEMEDY has not its equal in the wide world for this distressing and often fatal

for the working class. Send 10 cents for postage, and we will mail you free a royal, valuable box of sample goods that will put you in the way of making more money in a few days than you ever thought possible at any business. Capital not required. We will start you. You can work all the time or in spare time only. The work is universally adapted to both you. You can work all the time or in spare time only. The work is universally adapted to both sexes, young and old. You can easily earn from 50 cents to \$5 every evening. Grandly Above Them All. It was the writer's fortune to have of his life; to have listened to his enrapturing eloquence in public speech, and enjoy the still more wonderful charm of his social conversation and engaging manners in the privacy of his home. There are many others now living who had the same opportunities and who enjoy the rich legacy of personal recollections of their acquaintance with the most admirable man of his age, Mr. CLAY, and who

which characterize Mr. BLAINE. For a score of years we have known JAMES G. BLAINE as thoroughly as we president, and fired another with the unquestioned purpose of assassinating Mr. BLAINE. The long weeks of agony which followed, the whole world knows. The faith and confidence of the American people and of the dying president in the safety and stability of our government, as all well know, never wavered one moment,

American statesman, whose eloquence is as captivating and whose arguments are as convincing as was ever Mr. CLAY's. whose personal magnetism is far more irresistible, and whose alertness, marvelous memory, grand nobility of nature, and phenominal resources of statesmanship concededly surpass Mr. CLAY or any other American known to the living;-this man because he is so great and true an American, so magnificent a character, so worshipped a figure in our politics that all the professional manipulators of conventions could no longer prevent the people from selecting him as their presidential leader-because of this, what foul and and fiend-like malice has invented slander after slander, to befoul his name and becloud his fame; what deep and damning atrocities of cowardice and wickedness have outraged his pure, domestic life, sparing neither children, wife, mother and grandmother; yea, hyena-like, violating the grave of his dead babe, and despoiling the tablet record of "its innocent life." And do the promoters of such infamies believe that the American people

The Leaderless Army. With what feelings can those distinguished veterans of the democracy, who have long fought its battles and worn its honors, regard their extraordinary candidate of the present canvass? Although ostensibly the leader to whom all subordinate chiefs must look for guidance, who should inspire their efforts to reap for them all the fruits of victory, in Grover Cleveland they can see nothing but the merest figurehead.

He is confessedly incapable of leadership. His mind does not grasp that part of the responsibilities of his position.—

Soldiers Remember. house defeated the Mexican Pension Bill because it added the necessitous veterans of the last war.

Connecticut Independents. The New York Times of yesterday ssues an address from former Connecticut republicans who now prefer the election of Grover Cleveland to that of JAMES G. BLAINE. The only signatures to it from this section are the following: Alexander S. Gibson, Norwalk. A. M. Reed Cannon's Station.

Come Out!

What are you doing in that company—you who once were proud to be called a republican? To-day you are ashamed to be called a democrat, and stick to the name "republican" as if that could save you from unspeakable disgrace, and yet you are trying to elect a democratic ticket. What does that mean? It means to put into full charge of the government the very men and the very ideas you have been proud of fighting. It means to reward with victory the systematic murder, for ten years past, of the active republicans in southern states. You once called these political assassins the foes of self-government; do you love and honor them now? It means to crown with success the secondrels who have made majorities to order in a few corrupt northern cities for ten years past. You have said they ought to be in state prisons; why are you now working to put them into post offices, custom houses, and other places of trust and honor? It means to finish what Tilden and his cipher dispatches and offers of bribery tried to do in 1876; infamous then, shallit prevail now? It means to exalt and honorthe oreatures who crawled on pavements to write "392" four years ago, and tried to blacken with lies the name of Garfield. You despised them then, as creatures too low and vile for in honest man to know; why are you seen arm-an arm with them to day? They claim to be the same, and are the same; what are you?

Filthy they have been, and filthy they are The vile slanders about Mr. Blaine which they now utter have not more basis than the vile slanders against Mr. Garfield which you spat upon with scorn. The martyr President chose Mr. Blaine as his closest friend and chief adviser, and he knew him. You do not know him, and choose to believe those who lie about both. You join them in crying "Turn the Rascals out," and thus brand as rascals the true republicans, your neighbors and iriends, who are, you well know, as honorable and worthy as you are yourself. Do you really think your virtue so much finer than that of your republican pastor or Come Out!

have you, at fast, been caught by democratic skill in falsehood?

Are you a temperance man? Why are you helping the grog-shops? Are you an honest free-trader, or a sincere beliover in tariff for revenue? How manly you must feel, helping a party which has not the honesty to avow your convictions! Are you a business man? Fine practical sense you show, in helping the party which has disordered trade and industry every four years by trying to break down the banks, and the tariff; and the whole policy upon which capital has been invested for twenty years and labor organized!

Get out of that company! It is not fit for you. It disgraces any man to be seen with those who seek office by shooting their opponents. It disgraces any man to be seen with those who sent out a forgery and hired perjurers to defame Garfield. It disgraces any man to support, as a "reformer" the tool of Hubert O. Thompson. Come out and be clean!

— Iribune

The Probate Convention. The republican probate convention for this district convened at the office of B.J.

Sturges on Saturday. The convention was called to order by district committeeman, H. E. Chichester. Edwin Adams, of South Norwalk, was chosen chairman, and Edwin Hoyt, of New Canaan, secretary. The call for the convention was then read. Mr. John W. Scott, elected a a delegate from South Norwalk, was absent and E. J. Hill was appointed to the vacancy. A committee of credentials was appointed, consisting of E. J. Hill, of Norwalk, and R. L. Hall, of New Canaan. The same gentlemen were constituted a ommittee on resolutions. The committee on credentials reported the following delegates :- New Canaan, R. S. Hall, Edwin Hoyt; Wilton, H. E. Chichester, Charles A. Ambler; Norwalk, B. J. Sturges, J. W. Hubbell, Edwin Adams and J. W. Scott. nominated by acclamation as judge of probate, and the chairman and secretary were appointed a committee to wait on him and inform him of his nomination. The chairman and secretary were also appointed a committee to fill the vacancy in case of any occuring. H. E. Chichester, of Wilton, was then re-appointed district ommittee, and the convention adjourned. British Sentiment.

A personal friend who is temporarily stationed in Great Britain addresses the following letter to us under date of Sept. 25th. This direct and reliable testimony as to British feeling should arouse every American workingman and patriot:-"My DEAR BYINGTON :- At some early day, when you can get half an hour, please write me some news of the campaign. I don't get anything clear here, or from

which I can form an intelligent opinion as to how the thing is going. Everything here is anti-Blaine, and the old confederate sympathizers and blockade runners are mportuning all the gods for his defeat. You can give me sound views. If you were away off here I would do as much Sincerely yours, A. B. W---."

Vote for Coe! Mr. Coe, the republican candidate for congress in this district is a gentleman, manufacturer, and an earnest protect-

Mr. Seymour his opponent and the lemocratic nominee, is a gentleman also, and a lawyer, but last session he voted with the solid free trade phalanx in congress in the interest of the Morrison tariff reduction bill. Let every voter consider this most serions, this most important difference between these two candidates and cast their ballots for Coe who best represents the laborer's, and the manufacturers and all others business interests of

On What Principle Does it Differ ? Governor Buckingham, of blessed memory, while United States senator, purchased residence adjoining Mr. Blaine's. He subsequently sold it at a considerable advance upon what he had paid for it. The rise in value of that and other property, was mainly due to congressional legislation, looking to the improvement of the capital city. In what respect did Governor Buckingham's purely private business transaction in the above case differ from Mr. Blaine's purchase and sale of railroad

Political Temperance. A writer in the Boston Journal, who is

stated to be seventy years old and who for forty-seven years has been an active temperance worker, says :-Now the question comes, what is the best course for me to take to promote the temperance cause. We, as temperance men, have never looked for nor expected nor had any help from the democratic party. They have always been a rum party and opposed to temperance. They fill more paupers' graves than all the wars in the nation have filled. Our temperance assistance has come through the republi-can party. Now let us look at this affair just as it is. We, as a temperance organzation, have succeeded well notwithstanding the democratic party have thrown all the obstacles in the way possible, and nothing pleases them more than to have us vote a straight temperance ticket this as it draws votes from the republicans We as a temperance party are crossing a will permit such satanic outrages to go on without their indignant rebuke? No never!

If for no other reason than that outraged truth and justice and that spirit of "fair play," which every upright soul reveres, may be vindicated, the American people will triumphantly elect Mr. Blaine the successor of his ardent, trusting and loving friend, James A. Garfield.

The Leaderless Army.

Directly we have passed the centre of the bridge, public opinion has been with us, our cause never looked more prosperous, and now the question comes home to the head of every family. We must meet it, the responsibility rests upon us; our wives and children are looking and expect us to act wisely and for their interest. Now shall we turn as we are beyond the centre of the bridge and burn it and all be consumed and go down, never to have any more help from the republican party. You are dident the American flag catechism: You are inthe United States Constitution to-day. Who putyou there? The republican party. You are American editional rational region to day. Who made you such? The republican party. You are dident the Mead of every family. We must meet it, the responsibility rests upon us; our wives and children are looking and expect us to act wisely and for their interest. Now shall we turn as we are beyond the centre of the bridge and burn it and all be consumed and go down, never to have any more help from the republican party. You are American flag catechism: You are in the United States Constitution to day. Who putyou there? The republican party. You are digible to any office of honor or profit in the gift of the nation. Why made you so? The republican party. You are digible to any office of honor or profit in the gift of the nation. Why made you so? The republican party. You are digible to any office of honor or profit in the gift of the nation. Why made you so? The republican party. You are cligible to any office of honor or profit in the gift of the nation. Why made you so? The republican party. You are cligible to any office bridge; we have passed the centre of the bridge, public opinion has been with us, our cause never looked more prosperous, Thousands say, No. It re-echoes back, No, never. If we do, we never need to look for more aid from the republican

party. It will give us a set-back which will take a score of years to overcome. Men of my age never will live to see the temperance cause on so prosperous footing as it is to-day. Let us think this affair over carefully before we deposit our votes. Let us not say we want to punish our best friends in the republican party, and put both of our eyes out. Loss of a Valued Friend. An undertaker came into the house looking despondent, and presently tears

welled into his eyes. "What is the matter?" asked his wife. "Something gone wrong at the office?"
"You knew that Dr. B. had been sick for a day or two?"

"He died this morning." Cleveland as a Financier. \$650. The sum charged for hanging \$500. The sum Cleveland paid in

York Extra.

President James A. Garfield died at Elberon. The years that have intervened have been eventful ones, but the memory of the martyred president is yet green in the hearts of the millions of America. The time is not inappropriate for words to be recalled to mind, which were spoken by one who stood close to Garfield when

the fatal shot was fired, and closer still to him in spirit during his incumbency of the highest office of the land. [From James G. Blaine's Memorial Address.] Great in life, he was surpassingly great in death. For no cause, in the very frenzy of wantonness and wickedness, by the red hand of murder he was thrust from the full tide of this world's interest, from the full tide of this world's interest, from its hopes, its aspirations, its victories, into the visible presence of death—and he did not quail. Not only for one short moment in which, stunned and dazed, he could give up life, hardly aware of relin-quishment, but through days of deadly languor, through weeks of agony, that was not less agony because silently borne, with clear sight and calm courage he looked into his open grave. What blight and ruin met his anguished eyes, whose lips may tell—what brilliant broken plans, what baffled high ambitions, what sundering of strong, warm, manhood's friend-ships, what bitter rendering of sweet household ties. Behind him a proud expectant nation, a great host of sustaining friends, a cherished and happy mother, wearing the full rich honors of her early toil and tears; the wife of his youth, whose whole life lay in his, the little boys whose whole life lay in his, the little boys not yet emerged from childhood's days of frolic; the fair young daughter, the sturdy sons just springing into closest companion-ship claiming every day and every day rewarding a father's love and care, and in his heart the agent religious revent his heart the eager, rejoicing power to meet all demand. Before him, desolation

heaving billows, within sound of its manifold voices. With wan, fevered face tenderly lifted to the cooling breeze, he look-

Woman Goes to the Wall. Under the above heading a writer in the Winsted Herald says: Therefore if Cleveland is worthy to be elected, where would be the impropriety of her being, by unanimous consent, installed to preside at the White House. True, she "fell in a single instance which (he) fransly admits," and if it cannot be shown that her moral character is now at fault, let the wives and daughters of the land, should he be made President, join with

charges against Mr. Blaine.

The "New Home" specially recom-mends itself to purchasers on account of last three years, all of which are giving universal satisfaction. This unrivalled

OYSTERS FROM IRELAND. Twice Transported Across the Sea. A Novelty at Fulton Market.

I am willing to bet that you never saw American-Irish oysters before. In the spring of 1883 we sent to Ireland some barrels of seed oysters of the best class as Carlingford Lough, County Down, Ireland.
This is the result. Although small they have gained on an average about a half-inch of shell each, and they are in good condition. If they continue to improve in Mr. Shaffer's beds at the same rate, we shall have American-Irish oysters at the next St. Patrick's day dinner.

market.—Express. This is Fred Douglass's message to

colored men:

of Chicago, (Methodist) says: American sense of decency will, probably, not consent to this libel on American private character by electing a man who is the central figure in such an unchaste history. His election would do more to scandalize us throughout civilization than

Scott's Emulsion of Pure Cod Liver Oil, with Hypophosphites, for Pulmonary T. J. McFall, M. D., Anderson, S. C., says:—"I consider Scott's Emulsion one of the best preparations in the market for pulmonary troubles. Thave used it in my practice since 1876, and am well satisfied with it,"

No Room for Doubt. (Ex-President Woolsey.) There can be no doubt that Mr. Blaine ought to be supported.

ANOTHER DEMOCRAT FOR BLAINE. RALLY! RALLY! William T. Cutter, of Connecticut, Cannot Support Cleveland.

The republican state committee has received the following letter :-EAST LYNNE, Conn., Oct., 6, 1884. o the republican state committee.
Gentlemen:—After having been a voter in the democratic party for twenty-five years, and in 1876 the first democratic sen-

ator in twenty-three years to represent the 9th District in the state senate of Connecticut, I am now compelled to advocate the election of the Hon. James G. Blaine, in opposition to the candidate of the part with which I have been so long associated Mr. Blaine's letter of acceptance is i hearty accord with my views on the tariff. commerce, foreign policy, etc., and its meaning and import seem so plain and non-ambiguous that it must be satisfactory to the many democrats, who represent the minority in that party—the protectionists.

Mr. Blaine's twenty-five years of national experience, his ability as a statesman, as well as the manner in which he carried the government along during the weeks when the late President Garfield lay at death's door, are in themselves sufficient death's door, are in themselves sumcient to show his ability to manage the affairs of the government for the next four years, and no greater vindication against the calumny hurled at him will be needed than that which is to be accorded to him in Normhar next by three fourths of the in November next by three-fourths of the electoral votes of this country.

Yours very truly, WILLIAM T. CUTTER. Mr. Cutter's election in 1876, was hailed by the democratic press as a great event. He served with ability and was subsequently appointed state chemist by Gov. Hubbard. He is a man of character and influence. Other accessions to Blaine from the democracy are numerous in

Maud S. and Jay-Eye-See.

On Tuesday, at Hartford, Maud S. was sent the last half of a slow mile just to see if she had her speed, and she was timed by Mr. Crosby, Mr. Stryker, Mr. David Bonner and others, in 1:03\(^3_4\), the final quarter in 30\(^4_4\) seconds, a 2:01 gait. As she seems to be on edge and is moving so strong, an attempt will be made on Tuesday next, provided the weather is fine and the track is good, to drive her a faster mile than 2:09\(^3_4\), her present record.

The nervous chill which prostrated Jay-Eye-See at Kalamazoo was brought on by excessive travel in fluctuating weather. Maud S. and Jay-Eye-See. excessive travel in fluctuating weather. Prudence dictated that he should be given a chance to recover by rest, and he was carried to Cleveland. He has been moving well on that track, and at one time it was hoped to bring him back to an edge, but he did not improve as rapidly as was expected, and so he and Phallas will be expected, and so he and Finans will be shipped at once to Racine, the one retiring for the season with a six-year-old record of 2:10, and the other with a stallion record of 2:13\frac{3}{4}. When Jay-Eye-See went amiss the reign of Maud S. became absolute.—Turf, Field and Farm.

know any man in Norwalk. We saw him almost daily when on the floor of our national house of representatives and during the six years that he was its speaker. We saw him when United States senator, and when at the head of the Garfield administration as secretary of state. We saw him as an attentive and devout worshiper at the church of which he was an attendant, and of which he is an honored and worthy member. We have seen him at his own hospitable table, and at his sweet and happy home circle. Thousands now living know him as having enjoyed the warm affection of ABRAHAM LINCOLN; the esteem and confidence of GENERAL GRANT, and the admiring, ardent love of GARFIELD. Millions of Americans recall that fatal July morning, when arm in arm, BLAINE and GARFIELD entered the Washington depot and the murderous Giteau crept up behind the twain and, with pistol not a yard distant from their backs, sent one mortal shot into the body of the nation's

meet all demand. Before him, desolation and great darkness! and his soul was not shaken. His countrymen were thrilled with instant, profound and universal sympathy. Masterful in his mortal weakness, he became the center of a nation's love, applyinged in the previous of a world. But enshrined in the prayers of a world. But all the love and sympathy could not share with him his suffering. He trod the wine press alone. With unfaltering front he faced death. With unfaltering tenderness he took leave of life. Above the demoniac hiss of the assassin's bullet he heard the voice of God. With simple resignation he bowed to the divine decree. As the end bowed to the divine decree. As the end drew near, his early craving for the sea returned. The stately mansion of power had been to him the wearisome hospital of pain, and he begged to be taken from its prison walls, from its oppressive, stifling air, from its homelessness and its hopelessness. Gently, silently, the love of a great people bore the pale sufferer to the longed for healing of the sea to live or die, as God should will, within sight of its heaving billows, within sound of its mani-

ed out wistfully upon the ocean's changing wonders; on its fair sails whitening in the morning light; on its restless waves, rolling shoreward to break and die beneath its noonday sun; on the red clouds of evening, arching low to the horizon; on the serene and shining pathway of stars. Let us think that his dying eyes read a mystic meaning which only the rapt and parting soul may know. Let us believe that in the silence of the receding world he heard the great waves breaking on a farther shore, and felt already upon his wasted brow the breath of the eternal

In Mr. Beecher's reply to a letter which he In Mr. Beecher's reply to a letter which had received from a young man asking his advice in regard to voting for Cleveland who was accused of immorality, he uses this language in the Brooklyn Eagle of September 21st: "Who told you that Cleveland is a libertine? Not a larticle of evidence has been adduced to prove that Cleveland is now an immoral man. That he fell in one instance, twelve years ago, the frankly admits."

If twelve years time absolves an offender and cleanses a person's character, why not open the doors of the state's prison to all convicts who have been confined for twelve years? who have been confined for twelve years? When we have judgment and execution against a man for a common debt, twelve years does not wipe out the responsibility. If twelve years has bleached the character of Cleveland, why not relieve Maria Halpin from censure and disgrace? Not a particle of evidence has been adduced to prove that she is now immoral." Therefore if Cleveland is worthy to be elected, whore would be the impropriety of her being

land, should be be made-resident, join white their husbands and brothers in doing honor to Grover as the first gentleman, and Maria as the first lady of the nation. For the first transgression man was regarded as equally guilty with the woman, and they were driven from the garden together. Why should there be a difference new? The crime was common, common be the pain." The writer might also have asked the question why Mr. Beecher's statute of limitation could not be applied to the

Our lady readers can hardly fail to have their attention called this week to the latest combination of improvements in that most useful of all domestic implements, the "sewing machine."

As we understand it, a machine for family use should meet first of all these requirements:-It should be simple in its mechanism; it should run easily; it should do a wide range of work; it should be as nearly noiseless as possible; it should be light, handsome, durable, and as cheap as consistent with excellence throughout. These conditions the "Light-Running New Home" certainly meets. It has also

its superior mechanical construction, ease of management and reasonable price. machine is manufactured by the New Home Sewing Machine Co., Orange, Mass., and 30 Union Square, New York.

Mr. Wilson, the superintendent of Dorlon & Shaffer's establishment in Fulton Market, gazed fondly on a large plate which was heaped up with queer-looking oysters. Around the plate stood Fish Commissioner Blackford, Professor Rice, Hen. Baxter, and other authorities on the I don't desire to make a joke," said Dr. Wilson with a smile, "but while you have all heard of Irish-American citizens, an experiment planted in oyster beds pur-chased by Mr. Geo. our county fair has just come to our knowledge. Miss Hattie Nash of Westport, had two very meritorious oil paintwithout knowing they were executed by the same person, awarded the first and second premiums for best and second best paintings to Miss Nash.

The crime of John Cody, of New Rochelle, criminal assault on Kate Falzman, was particularly brutal, and his senlight enough. Candidate Governor Cleveland's pardon of this miserable fellow rouses deep indignation in New Rochelle. A good many of the pardons issued by Governor Cleveland have been to persons convicted of crimes similar to Cody's .-

"Lotta" played as "Nitouche" to a well filled house at the Opera House Saturday evening. Her support was excellent, and Lotta herself-well, she is always good. It must be said, however, that "Nitouche" is a play in no wise calculated to increase the popularity of the charming little actress. In the first place many parts are decidedly vulgar and liable to shock sensitive ears. Again, it lacks point and moral, and is little more than a variety is not a success. Lotta should stick to to be repaired. Whatever is done by him 'Little Nell," in which she can exhibit her | will be well done, and fair and honest charming powers in a totally unobjection-

The Ladies Missionary Societies of Fairfield county, auxiliary to the New character. Madame Laryah Barakat, a wonderful story, and relates it in a very graphic manner. Other speakers will be ican Foreign Missionary society from the the meeting next Thursday. He will also attend the Thursday evening lecture and prayer meeting. We very warmly recommend everybody to attend both meetings as we are very sure everybody will feel amply repaid for doing so.

Tooker, of Darien, came to this port this morning with the sloop Sarah F. Tooker, having on board some of the finest oysters caught since the letter "r" was on. He church and this whole community, will be more than fortunate if so able, earnest and eloquent a preacher can be secured.

The church whose artistic work is well known to many prominent citizens of Norwalk, has recently added new laurels to her well deserved fame, by furnishing several very before lighting. This will make a blaze catering specially for the amusement of caught since the letter "r" was on. He quent a preacher can be secured. was off Point-no-Point at 3 o'clock yesterday when the wind freshened and the sea rose, and he saw two boats which were overturned. One was an ovster sloop from Stamford, the other a small boat loaded with oyster seed. Both were seeking to land at Five Mile River. The sloop lowered her gaff, and at that mo-Norwalk, was driving a horse belonging ment the wind caught the sail with such force that the boom was carried into the water, as the helm was turned for her to come into the wind, and the weight of the water which the slackened sail scooped. prevented her righting again. The other boat shifted her seed load with the first wind whiff and was over in a jiffy. The situation for both crews was perilous, as great seas were rolling. The men, however, were rescued by friends in boats

which were sailing near. The blow con-

tinued into night, Captain Tocker says,

and things howled between the hours of

1 and 3 o'clock this morning. The Sarah
F. looks at her bows as if she had done some wave pounding."

at court in a single year, from October 1, 1871, to September 80, 1872. He must have worked very hard while he was at it.—Philadelphia Call.

Thursday's Bridgeport Standard conains the following:-"Captain E. E.

Gen. Hawley is to speak at Music Hall, Levi C. Hanford and wife left for Wash

ngton this morning. Hon. E. W. Seymour speaks at the Opera House Friday evening. Oliver Doud Byron will fnrnish fun for everybody at the Opera House, Saturday

"Across the Continent" Saturday night at the Opera House. A fine play and fine Linus Weed, formerly a Norwalk mer-

Mrs. Judge Sidney B. Beardsley and her daughter, Mrs. Wood, were visiting in town recently. President Woolsey resigns as a member

town yesterday.

of Yale college corporation on account of Mr. Sylvester VanHoosear we regret to learn, is still confined to his room by his

recent severe illness. -School Desks.-Fifteen School Desks for sale dirt cheap. Call on Benj. J. Sturges, Room 4, GAZETTE building, Norwalk.

Lotta has come and gone, but it cost Manager Mitchell \$175 to find out that Norwalk people could not appreciate her. Hon, William W. Eaton said in congress that protection "has cheapened everything under God's heavens that man, women and children use in this land."

Gen. N. P. Banks is expected to speak at Ridgefield, Saturday night. Hon. P. C. Lounsbury speaks at Winsted, to-morrow and New Haven, Oct. 23d. It's saying little for Norwalk theatre going people when negro minstrels draw

'ull houses and "Lotta" causes the local nanager to lose nearly \$200. Mr. Tilden has written his letter at last, ont alas, he makes no illusion to Cleveland. The venerable sage probably does not consider him in the presidential race. He could not have made his contempt for him

Lotta had the exceptional compliment paid her Saturday evening of a visit from ex-Governor and Judge William T. Minor and daughter, who came from Stamford to pay their respects to their esteemed

little actress friend. The fine music at the Opera House last vening on the occasion of the production of "The Midnight Marriage," was produced by the Wheeler & Wilson orchestra of Bridgeport, Manager Mitchell having telegraphed them to come over.

"Peck's Bad Boy" will hold forth at the pera House next week Thursday evening. All who omitted to see this laughafarce at South Norwalk, recently, should not fail to attend it here. Leave surplus buttons at home or you'll laugh

The twenty-third annual sociable of St. oseph's Benevolent Society will be held at Lockwood's Hall, Norwalk, on Wednesday evening, Nov. 26, 1884. The sociables given by this society are always enjoyable and this coming one will probably be no exception to the rule.

The Olymphia Association will give their first grand ball at the Opera House, Thursday evening of this week. The affair a glowing success and promise to all who attend a most enjoyable evening. requisites for furnishing pleasure for those attending have peen procured. Tickets admitting gentleman and ladies fifty cents.

At the Opera House last evening by far the finest play which has appeared here this season, was greeted by a startling a hundred people in the house. Notwi hstanding this the actors did their best and for persons desiring to be made voters to | played the piece without a "cut" for audience, small though it was. The play itself is somewhat handicapped by its name "A Midnight Marriage" which led many here to think it some trashy romance of a trifling order. On the contrary,

> cast. The costumes were simply elegant and the stage setting unusually fine. actress, and all the parts were played with equall skill and power. William Redmund de Guise" displayed wonderful care and fidelity in the portrayal of their respective parts, as did also the gentleman representing the "Count de Arne." In short the whole cast was excellent, and those who stayed away from the Opera House last

A New Furniture Dealer. Mr. JOSEPH B. ELLS, who for more connected with this office, has bought out the Quintard's Furniture business and stand near the foot of Mill Hill. He will put new life and energy in the business and not only bring up and keep up the stock of this old and favorably known estab-

honesty itself. There will be no romancing and no fictitious stories and statein order to promote a salc. It is a great in the world. We bespeak for Mr. Ells a liberal share of the public's favors, when new furniture is to be purchased or old dealing will characterize all his business relations with the public. Give him a call.

Dancing Academy. Mrs. G. O. Tinsdale, of New York city is in town making arrangements for the opening of a dancing school here this winter. Mrs. T. comes strongly recommended Norwalk, on Thursday, Oct. 16, beginning | and already has secured pupils from the best families. She is a cousin of Professor Gould well and favorably known Norwalk this year, Mrs. Treadwell taking his place. The latter will give her opening lesson at Mrs. N. F. Baird's school next week Wednesday at three p. m. Next month she expects to secure the Athanæum. The lessons will occur weekly. Terms payable on subscribing. Any further information may be had by adzation. He has promised to be present at | dressing Mrs. G. O. Tinsdale 121 West 22d street, New York city.

A Pastor Called. The venerable First Congregational church and society of Norwalk, at a full that purpose and held last night, voted unanimously to extend a call to Rev. Mr. Anderson, of Columbus, Ohio, to become the pastor of said church. The church

The Gazette's Ballot Printing In next week's GAZETTE we shall devote part of our space to the treatment of a number of malicious lies which are peing industriously circulated with the evident purpose of injuring our business concerning a certain split republican ticket, which appeared on election day. And we promise the article to be interesting reading to certain political renegades,

Senatorial Election. The special election of a senator for this, the 18th, district, to fill the vacancy caused by Mr. Hyatt's resignation, has been called by Governor Waller to take place at the general election, November 4. Nominations are now in order. AnOverworked Administrative Reformer,

Grover Cleveland, while sheriff of Eric

County, charged for 863 days' attendance

Danbury Fair. The Danbury fair was immense in its magnitude rather than its quality. The most wonderful thing about it was the forty-one thousand two hundred and ninety-

three paid admissions! The weather was admirable. Every day was a golden, benediction of atmospheric beauty and delight. Had our county fair people had half as agreeable weather, their exhibition would have resulted far differently financially, and in the popular estimation, for the inside show here, far exceeded in artistic nicities the exhibits at Danbury. The ladies industrial there chant but now of Norfolk, Va., was in was much larger, but no such work as the dog wood blooms by Miss Josephine Jennings and pond lillies by Miss Edna Hoyt were to be seen at Danbury. Indeed the most really artistic piece of ladies decorative work shown at Danbury, was the thistles on Mrs. Wm. Buxton's bannerette, and the oil painted and decorated crazy quilt of Miss Nina Comstock, both of which were previously shown at the county fair. Mrs. James K. Hyatt and Miss Dora Wilcox, both of Norwalk, had very attractive specimens of their beautiful handiwork. The former n Kensington, arrasene and cruel, the

latter, exquisite oil paintings of pond lillies on ebonized panels. The dog-show was an attractive success. Capt. Fred Comstock, of the Norwalk Light, contributed his bird dog "Dan," there were others of all breeds from far

The horse feature was of course on the nost liberal scale and doubtless drew the major part of the crowd. If there is now or ever was anything on the earth in the shape of a "side-show" that they did not have, we would be glad to hear of it. The propagating tanks, filled with carp and the Greeley Artic Expedițion exhibits were genuine attractions. The "skin" wheel game was not admitted to fleece the rural innocents as it was here. although the liberal proprietor is said to have offered \$2,500 for the privilege, and all intoxicants were designed to have been excluded, but evidences of the near or remote presence of John Barleycorn, were abundant. All in all, this Danbury fair has proved the largest and most successful of any held this year in all New England.

Republican Rally. Hon. Joseph L. Barbour, of Hartford vill speak at the Opera House to-morrow Wednesday night. A good meeting may be expected. Galleries reserved for ladies. Mr. Barbour has been speaking in New Jersey and of his address at Trenton, Wednesday night, the State Gazette savs editorially: "The speech of the Hon. Joseph L. Barbour, in the Opera House last evening, was one of the most brilliant political addresses ever delivered in this city. It was not only solid with argument and facts, impressive and masterful oratory, and convincing and irresistible logic, but flashing with gems of eloquence and wit. It kept the audience in a continuous state of breathless attention, shouts of laughter and roars of applause. No candid person could listen to that convincing

presentation of political facts without acknowledging that every consideration of patriotism and good sense dictates the nance in power of the republica party. We trust Mr. Barbour may be secured for another speech in this city before the campaign closes." Across the Continent. Oliver Doud Byron will appear at the

Opera House, on Saturday, in his well known play, "Across the Continent." Mr. Byron has been in Norwalk before and has never failed to draw crowded houses and this year will probably be no excepthrilling and powerful one and carries interest from rise to fall of curtain. It abounds in startling situations giving opof the finest plays of the day. Mr. Byron is supported by Miss Kate Byrou who is a powerful and painstaking actress and never fails of a warm reception. The scenic effects are fine, the snow storm, the scene being realistic and thrilling. Everyone should go to the Opera House Saturday evening and take a trip "Across the

Correction. In pagan countries human sacrifices are wont to signalize kingly marriages, but in republican America it is not well to introour mature friend, John Jarvis, and we happy event. It is not the bride's father, Captain Henry Lamb, but his wife, one of mothers, who is deceased. The error has developed the singular incident, however, of the existence of a wide spread impression that the father was also deceased. This has grown out of the fact no doubt that because of increasing years the captain does not mingle in public as much now as in former years.

More Millinery Mrs. Wilmot Fawectt elsewhere an nounces a special opening of fall and winter millinery to take place at her store on Water street on Thursday, Friday and Saturday of this week. She has a large and well selected stock amongst which Norwalk ladies will find many good bar-

gains. Don't forget the dates. Mrs. H. Krieger, of South Norwalk, also announces a new and enlarged stock of fancy and staple millinery, etc. Her store under the Mahackemo Hotel contains a large assortment of fancy goods and other necessities of a lady's toilet, which makes

it a very desirable place for trade. Manager Knapp announces a great card for next Thursday evening, it being none less than the world-renowned Aimee in her play of "Mam'zelle." Aimee is a star of the first magnitude and the Troy Times but voices popular sentiment when it says:

Aimee in English comedy is a novelty and, while it is a universally conceded fact that the bewitching actress stands unequalled in the several parts she has so successfully impersonated for years past, the audience assembled at the opera house last evening was unpropared for the agreeable surprise with which it was treated by the dashing Parisian's clever acting in a language other than her own. This was Aimee's second appearance in English comedy but every word was clearly enunciated and understood, and there was just enough of foreign accent to her pronunciation to add interest to the part and to the impersonator. Every move of the body, every gesture was graceful, while her dancing was the height of artistic skill: The company supporting "Mam'zelle" is excellent, and the play itself is ingenious. of the first magnitude and the Troy Times

A Novel Book. Miss Esther L. Smith, of Hartford, unique art sketches to illustrate the novel book tittled, "Wheels and Whims." The story is that of the trip of four ladies down the Connecticut River on tricycles. The Literary World of August 9th says of book and sketches : "Not the least attractive feature of this

illustrated. They are not shop-work, but come from the same fun-loving nature as the book itself. Whoeverthe authors are, of book and pictures, they have done well with a pleasant subject." Notice to Advertisers. From and after to-day changes in adertisements now running in the GAZETTE nust be handed in at the office by Saturday morning of each week. Unless this is done advertisements cannot be changed till the following week. New advertise-

right and entertaining story is the series f home-made sketches with which it is

ments will be received up to 11 a. m., on Tuesday of each week. The safety of the democracy requires the defeat of Grover Cleveland.—New

The Grand Army Fair. The public have been left no room for doubt as to the Grand Army Fair having been a social success, and there will be no little pleasure caused by the fact that it was also a flattering financial success, the net amount cleared being between five and eight hundred dollars. This result is a fitting reward to the strenuous efforts made by the individual members of the post, aided by the kind labors of their lady friends. Everyone connected with the affair worked hard, and they can but feel proud of the success of the measure. The hall was filled to overflowing on each evening and it was hard work engineering one's way to the various points of interest in the building. Young ladies soliciting chances in this, that and t'other, were busy everywhere, and were unusually successful. It seemed as if everyone

tried their luck, and the small change ooured into the coffers of the fair like rain nto a cistern. In the voting for the fireman's badge seemed to center the greatest interest, the contestants being Messrs. A. A. Chinnery, jr., and J. T. Prowitt. The friends of these two gentlemen worked like beavers and the vote polled for each was heavy. Considerable interest was also manifested in the inkstand for the most popular clergyman. This, the parishioners of the Rev. Father Slocum succeeded in carrying off, Rev. S. B. S. Bissell being second, with Rev. H. S. Clapp a close third. Mr. A. A. Chinery, r., succeeded in carrying off the fireman's badge, the announcement of which was received with applause. Mr. Chinery nounted the stage and though greatly embarassed thanked his friends for their

efforts in his behalf. The prizes which were announced

he last evening were as follows:-PRIZES ON SEASON TICKETS. Portable range, C. D. Cleveland; china ea set, Dr. W. C. Glines; suit of clothes, Miss L. Collins; photograph album, Sydney Smith; extension lounge, J. S. Gilmore; barrel flour, David Sheehan; box David's soap, Austin Cockefur; on of coal, Geo. H. Olmstead; fruit picture, Mrs. James Schofield; order for pair of ladies' shoes, Mrs. Dr. John Hill; order for gent's hat, Mrs. A. Cole; trunk, E. M. Merritt; toilet ushion, Charles Wheeler; GAZETTE 1 year, Miss Addie Hyatt; carving knife and fork, Miss Minnie Schofield; order for \$5 worth of groceries, Mrs. W. J. Gorham; shaving cup and brush, James Toner; 3 cabinet photos, Frank Street; barrel of potatoes, Captain J. P. Hanford; 5 lbs. of tea, H.

Fancy cake pyramid, A. R. Malkin Fancy cake pyramid, A. R. Malkin; pants pattern unmade, F. Pierce; Roger's statue, Mrs. C. M. Littell; pants pattern and making, Jarvis Kellogg; tea sett, Farron Betts; pair blankets, J. Burr Betts; plush album, John Beers; gent's dressing case, F. McKeon, jr.; flower basket and scarf pin, Harry H. Hall; patent rocker, Theo. Brush; revolver, Victor Selleck; fur mat Chris E. Miller: banging Selleck; fur mat, Chris E. Miller; hanging lamp, C. H. Gehrnan; pants pattern and making, J. H. Kinney; Webster's dictionary, Jas. T. Hubbell; Wheeler & Wilson No. 8 sewing machine, Geo. H. Raymond; inkstand, G. Gerrish; black silk, 16 yards, Miss C. J. Hatch.

PRIZES DRAWN BY GUESSING Weight of stick of candy, won by J. I Ambler, weight 5 lbs. 7 oz.; guess 5lbs. 8 oz. Pins in cushion, won by Edward B. Taylor, number 653; guess, 653. There were no hitches in the programme and everything passed off smoothly. The Grand Army have every reason to congratulate themselves upon the success of

Propeller City of Norwalk. The fall business for freight seems to b greatly increasing if the quantities of mis cellaneous goods brought up from New York by the propeller "City of Norwalk" are any indications. Fair week the boat was loaded with articles for that exhibition, and was hardly able to accommodate the unprecedented rush of business. The business during September and, in event of its continuing, are contemplating the walk" has made very regular trips all summer, Captain Peck not having lost a of the boat having to depend on the tides to reach Norwalk dock. The managers of the line seem to be seizing every opportunity to serve the public, and their efforts are being appreciated.

A Beer Barrier. It is reported the railroad commissioners will order the Consolidated road to erect a fence on the cast side of the track in front of the South Norwalk depot. There are track on that side, and people are in the habit of going into the saloons while wait ng for trains, and when these stop at the depot, run out to jump on, often doing so after trains have started. Several persons fence, if put up as proposed, four feet high, will cause the liquor men to howl, to get a drink they will have to travel up the other, a distance of over 500 feet should the fence be erected it will be the biggest joke of the season—on the liquor men, who are dreadfully worried, and fear the report may have basis of truth Some satirical sympathizers have suggest ed that the saloon men erect pipes simila to locomotive watering pipes, one end to be in a beer barrel—the other reaching down on the track side far enough t Should holes for passing change be cut in the fence, it is thought the proposed barrier will not cause much suffering or greatly interfere with the channels of trade. The action of the commissioners and response of the company is awaited with interest.— Bridgeport Standard.

A Fortune for the Cunninghams. The sum of \$75,000 awaits the prope members of the Cunningham family John P. Jane, the old claim lawyer of

years, including 1884:-2.13 1878 8.44 J879 2.51 1880 7.21 1881 2.51 1882 5.24 1883

1.33 1884 Mr. George W. Cram informs us that during the month there were twenty-six working days, every hour of which was so free from storm that his gang of outdoor workmen did not lose a minute of time; a thing unprecedented within his knowledge or experience.

WESTPORT. Mr. and Mrs. A. T. Burr, of Nyack, N.

Y., are visiting at their old home. Capt. John F. Bulkley discharged cargo of coal at Filley's foundry last week. Misses Martha and Eliza Renoud, of New Rochelle, are visiting Mr. Jarvis

The Greens Farms Farmers' Club met at the residence of Wm. J. Jennings, on Monday evening. A number of persons in this place are

taking advantage of the continued dry weather to dig wells. The Blaine and Logan club have accepted an invitation to participate in a parade at Milford, on Friday evening. tf F. ST. JOHN LOCKWOOD A large number from this place attended

The exhibition is very highly spoken of, and they say the crowd was simply im-John T. Doyle, Esq., chief clerk and stenographer to the civil service commission arrived home on Saturday and will spend his vacation with his uncle Judge

the Danbury fair during the past week.

Mr. Samuel Mills, ("Uncle Sammy") had his pocket picked at the Danbury fair last Friday, of his pocket book, containing one hundred dollars. The loss to him is The new church is beginning to assume very fine appearance. The roof is nearly

and perhaps by this time entirely slated

and the brick walls of the spire nearly

finished. The question now being discuss-

ed is whether a chime of bells shall be placed in the new edifice or not. The Board of School Visitors at a recent meeting voted to furnish the books required in the public schools, and appointed Talcott Hall as their agent to handle the books. The books will be procured at special rates, and furnished at a trifling advance to pay expense of

freight, etc. On Thursday evening a company of relatives and friends assembled at the esidence of Mr. McKay to witness the narriage of Mr. Samuel E. Banks to Miss Mamie McKay. The ceremony was performed by Rev. Mr. Tuttle. The wedding presents were numerous and costly, among them many useful articles.

The time for entering names on the list to be made" by the registrars, expires on Thursday of this week, at five o'clock. By a misunderstanding it has been reported that names could be put on the list on Friday, but Thursday is the last day. Do not fail to see that your name is on, if you have just become of age, or moved

Chief Engineer John S. Jones of this place, visited Nyack, last Wednesday on the occasion of a firemans parade at that place, as the guest of Chief Engineer Gerdiner, of Bridgeport. A company of welve men from the Bridgeport Fire Department, commanded by Capt. Birdsall preceded by the Howe Band, acted as es cort to Chief Gerdiner and his guest. Last Saturday morning as Ebenezer

about to start with the oxen and cart for a load of apples, while attempting to get pon the tongue of the cart, the exen started and threw him to the ground, the cart passing over his body, breaking one rib and otherwise severely injuring him. The uniforms for the Blaine and Logan llub arrived last week, and the boys were out for the first time, on Thursday evening, and presented a fine appearance. After a short march through the principal streets of the village, they repaired to National Hall and listened to a stirring

Mulligan" letters and of the transactions about which they were written. On Monday night after the result of the election was announced, the saloon keepers celebrated their victory (?) by hiring the Westport Band. After a number of selections had been rendered in the street the members were invited into one of the saloons to play. Three, however, refused to go, for which, at a subsequent meeting of the band, they were expelled. We think the respectable part of the commun ity will sustain the action of the expelled

The annual consumption of imported and domestic cigars is about sixty for every man, woman and child in the United States.

A Milwaukee druggist advertises that the way a porous plaster acts is to retain the back firmly in place while the pain crawls out between the holes.

One of Davy Crockett's old hunting knives has been presented to the Tennessee Historical Society. It has a fourinch wooden handle and a six-inch blade, Deadly weapons are taken from men who carry them into one of Galveston's

gambling and drinking houses, an employee gives checks for them, and they are returned on their owners' departure. The wealthiest man in the world is the Chinese banker Han-Qua of Canton. He pays taxes upon an estate of \$450,-000,000, and is estimated to be worth a billion tales, which, in our money, would be about fourteen hundred million dol-

The largest room in the world, under one roof, and unbroken by pillars, is at St. Petersburg. Its dimensions are six hundred and twenty feet long by one hundred and fifty feet wide. Twenty thousand wax tapers are required to

Explorers have discovered petroleum in Formosa, about twenty miles to the south of Ke-Lung. At the latter place are the richest mines of bituminious coal in the Chinese empire. Thus far the Government has refused permits for the sinking of wells.

It is the custom of really stylish New York shop girls to carry to their fields of labor bundles of school books, in order to convey the impression that they are completing their education at some fashionable institution of learning, instead of working for their daily bread.

Uranium photography is becoming popular in France. The salts of the metal are gold, green, and greenishbrown, and in thin layers produce very delicate tints. For photographing forests and landscapes they are-superior, giving pictures that are nearly perfect reproductions of nature.

On Lake Derwentwater, in England, a floating island has made its appearance. It is now of comparatively small area, though gradually enlarging. For years ago the island was first seen, and as it only appears during exceptionally hot summers, it is locally regarded as the forerunner of continued fine weather.

Miss Bertha Higgins has been investigating samples of American and foreign iodide of potassium, as sold in New York, and finds that none of the specimens is up to the requirements of the Pharmacopœia. It is an important matter, both from a commercial and a medical point of view, as enormous quantities of the drug ase consumed. It might be going too far to affirm

that the pre-historic lake dwellers wore shirts and employed laundresses; but it is a fact that there have been found at Mocrigen bronze studs exactly like the studs which now adorn the fronts of men's shirts, and double buttons in no way distinguishable from the solitairs used for fastening wristbands.

Wood pavement is to be given up in London, and the old McAdam system restored. The former is said to have not only failed to realize the expected advantages, but has led, according to Prof. Tyndall's report, to serious affections of the eyes and lungs; that is by continual watering, the wood became saturated with street filth, and then, under the influence of the hot sun gave forth a pernicious species of dust.

The San Bernardino (Cal.) Index, says: A mammoth bee hive has been discovered in the bosom of the noted peak commonly called "Old Paldy." The bees at work in this wild mountain hive are almost innumerable, and they have in store a gigantic mountain of pure honey, which is estimated to be 150 feet deep and 200 feet wide, and contains more than 500 barrels of the genuine article. This is enough honey to supply San Bernardino and Los Angeles counties for several years.

Perhaps the largest prune orchard in the world is situated one mile south from Saratoga, Cal., and contains 16,000 trees. It is situated on a gentle slope from the foot of the mountain to the Los Gatos road, and can be taken in at a glance. Near by is the famous Rice orchard, containing fruit and nut trees of almost every known variety; also the O'Banion and Kent orchard of eighty acres, for which \$110,000 advance has been offered

Paris tradesmen begin to utilize science for advertising purposes. A late notice reads: "Tea and coffee contain tannic acid, the essential part of oak and hemloek; milk contains albumen and fibrin in the same manner as flesh and skin. Add milk to coffee and a turbidity ensues, of which each particle is a tannate of fibrin, i. e., an atom of leather. In a lifetime a man thus consumes a hundred pair of boots, but no man could thus consume the elegant and scientific footwear only to be found at 5 Rue de-

WHAT SHALL IT BE?

The three words commonly applied, in the English language, to the members of the female sex of the animal Man, vary in their significance, "Female" is opprobrious. It refers solely to sex, and is no more applicable to a woman than it is to a cat or a hen. It ought to be expunged entirely from print and conversation, except in cases and places where it is used in contradistinction to male, to express the sex of homo, which is spoken or written about. "Lady suggests a dainty, delicate creature, possessed of much superficial propriety and pride, perhaps also of culture, but it says nothing of character. Once it was an honorable title, but now that it is commonly applied to every member of the sex who can more or less follow the fashion, it has become lowered without elevating those on whom it is so freely showered. "Woman" is best. The word suggests all that is feminine-human, instead of the feminine only. It brings to mind the "perfect woman, nobly planned, to warm, to comfort, to command" of Wordsworth. It is the true title of man's partner in life, the sharer in his joys and sorrows. Yet if a man calls his wife "woman" the result is not

WHY BOTTLES SHOULD BE LABELED. The findings of coroners' juries are luckily of more value, as a general rule, than their recommendations. Recently one of them "sat upond" the body of a child who had met with its death from drinking carbolic acid. It seems that the unfortunate infant, whose age was something over two years, was in the habit of finishing of the dregs in the ginger beer bottles opened for its mother's customers. This in itself one would have thought a sufficient cause of death; but the little child appears to have one day got hold of a bottle containing, not ginger beer, but carbolic acid. The jury naturally brought in a verdict of accidental death, but added a rider to the effect that the bottles ought to have been properly labeled. Our school boards have done a good deal. but I fear it will be some time before they get as far as teaching two-year-olds to Legg.

Euticura F.J. Curtis& Co.,

"Why Did They Dig Ma's Grave so Deep?" is the title of a new song. It was probably done to keep her from hearing taken to save so small an annual It is always unfortunate to have no

music in one's soul. Only imagine the unfortunate plight of a man just now who is a-verse to a campaign song. Mr. Smith: "Jones, I don't object to music, but when that dog of yours barks all night I think it a little too much." Then you don't appreciate Offenbach? A New York traveling salesman has married a Hoboken dressmaker. A drum-mer and a fluter in one family ought to make it rather lively for the neighbors. "The hand that rocks the cradle is the hand that moves the world." Perhaps that's so, but it can't stone a hen out of

Most of the cheap daily newspaper cuts of great men nowadays look like they had been knocked out by a prize fighter after the subject had umpired a

the garden with any overshadowing suc-

Lightning struck a whiskey distillery in Kentucky last week and then ran along a telegraph wire. The result was that all the telegraph operators on that line are still howling drunk. A Harlem girl fainted right in front of

an ice cream saloon, and has gone clear back on her lover because he had her carried to a drug store across the street instead of into the saloon. A man out in Miles City, Montana

having a balky mare, put a dynamite cartridge under her one day and blew her up. The fiend was promptly arrest-ed on the charge of being a filly-buster. Somewhere in the world there must be great and good men who are positively without sin; but they are never heard of

in a political convention, except they go there to make the opening prayer. "Will you have salt on your eggs?" asked the hotel waiter of the guest. "Oh, no, thanks. They are not at all fresh."
Then the waiter went out to consult the landlord to see if the hotel had been in-

"The soft little cheek of the precious newcomer is dearer to me than all roses, I ween!" sings Ella Wheeler, the poet-ess, imaginatively. Well, Ella, you may be able to wean the newcomer, but we doubt if you ever did wean a rose.

"Ain't you almost boiled?" inquired a kid of a gentleman calling on her father and mother. "No, little one, I can't say that I am. Why do you ask, Daisy?" "Oh, because I heard mamma say your wife kept you in hot water all the time." "Why, Allie, dear, is that the way to begin your dinner?" asked a mother of her little daughter, as she began with the pie instead of the bread and butter. "Well, I declare, mamma, I was going to eat my dinuer upside down, wasn't I?"

"James," said Mrs. Peterby to her husband; "how about Blaine's chances?" "He may be the next President and he may be defeated," responded Peterby, who was not in a good humor. "Humbug! You got that idea from the newspapers. You can't believe a word that's in them."

A vigorous old fellow who had lately buried his fourth wife was accosted by an acquaintance, who, unaware of his bereavement, asked: "How is your wife, Cap'n Norrris?" To which the captain replied, with a perfectly grave face, "Waal, to tell ye the trewth, I'm a

Bill Nye tells a pretty amusing story of a lecturer who in discoursing on the subject of "Health" inquired, "What use can a man make of his time while waiting for a doctor?" Before he could begin his answer to his own inquiry, some one in the audience called out, "He can worke his will." An enthusiastic professor of physics, while discussing the organic and inor-ganic kingdoms, said: "Now, if I should

shut my eyes—so—and drop my head—so—and should not move, you would say I was a clod. But I move, I leap, I run; then what do you call me?" Voice from the rear: "A clod-hopper." He was giving her an account of the origin of secret societies while she sewed a button on his coat preparatory to his

going out. "And now, my dear," he concluded, "do you know why we call our section of the society a lodge?" "I suppose it is because you lodge their all the time evenings," she answered. He said

"No," said Mrs. Briny to an inquiring stranger, "we haven't got any malaria here, I admit, but my daughter Sally makes lemon pies that can't be beat round these parts." When the visitor had gone, Mrs. Briny said to her daughters, "Well, I guess we'll have to lay in a stock of that er malary, for all of 'em as comes here keeps askin' for it." "What was all that scuffling about down stairs?" asked Mrs. Hilberts, as her lord and master strode into the room.

"Nothing, except that masher asking for Sarah Ann. "What did he say?" "Oh, he began by saying he was speaking from the bottom of his heart, and so on." "And what answer did you give?" "I grew spasmodic, too," answered Hilboots, gently tapping his little angelic number twelve shoe; "and I gave him an answer from the bottom of my sole."

Local Notices. TRIED AND TRUE

Friends are scarce, but if you are suffering with that horrible disease scrofula, you wil find Sulphur Bitters will cure you as it did me, after suffering eight years and paying out hundreds of dollars to doctors and druggists.—
Jeannette Hanscom, Troy, N. Y. 2441 COME THOU WITH US AND WE WILL

DO THEE GOOD."

Can be appropriately quoted by the manufacturers of the Wilsonia Magnetic Appliances. Thousands of men and women are to-day living that were given up by the physicians to die, but who are now able, thanks to Wilsonia, to endorse the above quotation. The potency of these appliances in grappling with and overcoming all forms of diseases, is becoming one of the best established facts of the day. In all diseases where the nervous system, the digestive organs, the liver or kidneys are concerned the effect of Wilsonia is simply marvellous. No medicine required. No shock given. The gentle action of constant, vitalizing, magnetic currents is sufficient to relieve the most obstinate cases. Pamphlot and tull information given, and appliances for sale by G. B. Plaisted Druggist, Norwalk and So. Norwalk, Conn. 121 DO THEE GOOD."

A JAPANESE LEGEND.

There is a romantic love story told of a monk named Au-Chin, who lived in the neighborhood of Osaka, and was celebrated as a leech as well as noted for for piety. It happened that the wife of the principal man of a village near Osaka fell sick and Au-Chin was asked to visit her. Her life was saved, though it was long before she regained health. When her restoration to health was complete, he announced his intention of taking up his abode in a distant monastery. To his dismay he was told by the recovered woman that where he went she would go too, as she loved him so much that she could not live except in his presence. He reasoned with her upon the wickedness of such a procedure, but she would not listen. Au-Chin departed secretly, and hid himself for a while in the Dojo-ii Temple devoted to the worship of the thousand handed Kwannon. When he neared the temple be found that a great bell belonging to the monastery was lying on the ground, while the belfry was undergoing repairs. He thought it would be a good place to hide in, so he asked the brethren at the monastery

The infatuated woman, as soon as his flight became known to her, pursued him. When she came to the river Hidaka-gawa she found it had become a raging torrent, that no boatman would attempt to cross. Her jealous rage was so strong that she wished she might be changed into a dragon, that she might swim the swollen river. She became a dragon, and passed under the raging flood. When she came to the temple of Do-jo-ji she searched everywhere without fluding the monk, and thought it might be possible that he had taken refuge under the bell. As it was so heavy and she could not overturn it she coiled herself about it and lashed it so furiously with her tail that it became red hot, and when the monks from the monastery came to bring the prisoner food the next day, they found nothing but a mass of charred bones to tell that their brother had ever been there. This story has been dramatized, and is told in song and prose. There is no temple or shrine throughout the length and breadth of Japan that has not attached to it some story of fabulous origin.

to place the bell over him, which they

WHAT THE MOON'S FACE TELLS.

The moon's face, says Prof. Proctor, tells us of a remote youth—a time of fiery activity, when volcanic action even more effective (though not probably more energetic) than any which has ever taken place on this globe, upheaved the moon's crust. But so soon as we consider carefully the features of her surface we see that there must surely have been three well marked ears of vulcanian activity. Look at the multitudinous craters, for example, around the metropolitan crater Tycho. They tell us of century after century of volcanic disturbance-but they tells us more. They mark a surface which varies in texture. and therefore in light-reflecting power in such a way as to show that the variations were produced long before the volcanic action began by which the craters were formed. For the variations of texture are such as to mark a series of streakssome of them two thousand or three thousand miles in length, and many miles in breadth, extending radially from Tycho. Craters lie indifferently on these bright streaks and on the intervening darker spaces, and some craters can be seen which lie right across a bright streak with parts of their ring on the darker regions on both sides of the streak. Of course, this proves that the craters were formed long after the great streaks. When the streaked surface was formed, it must have been tolerably smooth; for we see the streaks best under a full illumination, and there is no sign of any difference of elevation between them and the darker ground all around; they are neither long ridges nor long valleys, but mere surface markings. Yet they must have been formed by mighty vulcanian disturbance, such, indeed, as we may be certain went on at the early stage of the moon's history to which these radiating streaks must be referred. It seems clear that as Nasmith has illustrated by experiment, they beong to that stage of the moon's history when her still hot and plastic crust parted with its heat more rapidly than the nucleus of the planet, and so, contracting more quickly, was rent by the resistance of the internal matter, which, still hot and molten, flowed into the rents and spreading, formed the long, broad streaks of brighter suface.

WORKMEN IN CENTRAL MEXICO.

A carpenter in Central Mexico earns from sixty to seventy-five cents a day; a mason the same; a common day laborer from twenty-five to fifty cents; a farm laborer who works by the month, from two to five dollars a month and "found." They work from daylight to sunset, with half an hour at nine o'clock and again at three, for breakfast and supper. These hours are very long; but they take it easy, stopping every little while to smoke their cigarros, and accomplishing less than an American laborer will in six or seven hours' work. Their earnings are barely sufficient to keep them in food and clothes of the coarsest kind, with an occasional "real" over for the bull fight at Pulke, but they are the happiest

people on the face of the earth. ENGLISH MANNERS AT TABLE.

No guest ever passes a plate or serves anything; the servant does all that, Soup is taken from the side of the spoon, noiselessly. Soup and fish are not partaken of the second time; if there is a joint, and the host carves, it is proper to ask for a second cut. Bread is passed by the servant, and must be broken, never cut. It is considered gauche to be undecided whether one will take clear soup or thick soup; decide quickly. In refusing wine simply say, "Thanks," or better, "Thank you." The servants retire after handing the dessert, when the party at once launches in politics and gossip, with now and then (not often. alas!) a bit of gay badinage, or "chaff," until the lady of the house gives the signal, and the ladies retire to the drawing-room. Toasts and taking wine with the people have gone out of fashion, and TIMBER, the charms of the drawing-room have so far increase 1 in the last decade that it is only the more confirmed two-bottle men who "linger long across the walnuts and the wine," the juenesse doree usually pre-I.ATII, the wine, the juckesse the state of the ferring the cup of tea poured by some white hand and sweetened with a look from drooping eyes, which is to be obtained in the drawing-room. The Eng-SASII, lish woman appears in semigrand toilette. with open pompadour corsage and elbow sleeves, if not in low-necked, full dress attire, while her daughters are universally sleeveless and usually white, with MOLDING low-neck corsage, even in the depths of winter. A man is invariably in full dress for dinner, even if there is no one else
