THE CHEMIST of the BROOKLYN BOARD OF HEALTH
VERSUS
THE ROYAL BAKING POWDER.
From a chemical examination I have made of cans of CLEVELAND'S SUPERIOR BAKING POWDER and ROYAL BAKING POWDER, purchased by myself in open market, I arrive at the following results:
CLEVELAND'S BAKING POWDER is made of very pure materials, and is entirely free from Alum, Ammonia, Terra Alba, or any adulteration whatever, and I recommend it as a healthful, effective and perfectly reliable baking powder.
THE ROYAL BAKING POWDER CONTAINS AMMONIA, AND AS THIS DRUG IS NOT WHOLLY EXPELLED FROM THE DOUGH IN THE BAKING PROCESS, and as most medical authorities agree as to the injurious effects resulting from the continued use of Ammonia, its use in food should be strongly condemned. CLEVELAND'S BAKING POWDER evolves more carbonic acid gas than the ROYAL BAKING POWDER, and it is, in consequence, more economical to housekeepers.
