THE MYSTERY OF PALERMO.

REASONS THAT ACCOUNT FOR THEM. The Cabmen of Palermo and the Mode of Getting to Town. CEMETERY OF PRESERVED MONKS.

An American correspondent traveling in Europe writes as follows: Few tourists in Italy visit Palermo. The visit involves a sea voyage of at least seventeen hours from Naples to Palermo, which ordinarily involves seventeen times as much seasickness as the passage of the British Channel. The Mediterranean is a most delusive element. To the passenger who embarks at Naples the Mediterranean is as profuse in pleasant promises as a Neapolitan hackman who insists that a rainy day is virtually dry, and in all respects the very day for a long excursion; but no sooner does the steamer pass the islands of Ischia and Capri than the passengers wish they had never been born. Fifteen minutes of the open sea usually rolls all the passengers into their berths, and if it so happens that there is one man of such purity of heart and nobility of character that he escapes seasickness he is filled with such self-righteousness that even the most wretched of his fellow-passengers yearns to get up and

kill him. Palermo is really an extremely pictur esque place, although the average passenger after seventeen hours of the Mediterranean would regard any port as an earthly paradise. The city has been built by Saracens, Normans, Germans, Spaniards, Frenchmen, and Italians, and the architecture is decidedly mixed. Over a stratum of Saracenic arches are superimposed strata of Gothic and of Spanish Renaissance and here and there crop out veius of other architectural styles. There is cer-tainly a great deal of interesting archi-

fecture in the place. Two broad streets crossing one anothe at right angles in the heart of the city divide it into four quarters, intersected by miles of extremely narrow streets devoted chiefly to the display of freshly washed underclothing. I have no idea to whom this underclothing belongs, but if it belongs to the residents of Palermo they are certainly well supplied. I estimate from the appearance of the clothes lines that every adult resident of Palermo sends weekly to the wash 36 shirts, (male and female,) 29 pairs of drawers, of assorted sizes,) and 51 pairs of stockings, with say 300 (in round numbers) collars, cuffs, and cor-

There is a Lincoln-street in Palermo. A Palermitan gentleman has published a little "Dictionary of Palermo," and under the caption "Via Lincoln" he furnishes some novel and important information. He informs his readers that "Samuele Lincoln" was at one time President of America. European monarchical ideas of the most reprehensible character had at that time diffused themselves in South America, and when Samuele Lincoln abolished slavery South America made this a pretext for rebelling against him, doubtless in the hope of carrying out its nefarious mon-archical ideas; Lincoln, however, conquered South America, and fell by the hand of an assassin. To this brief his-tory of Mr. Lincoln the captious critic might, perhaps, take exception on the ground that Lincoln's Christian name was not Samuele, but Ciovanni, and that he failed to conquer the whole of South America, inasmuch as Patagonia and Alaska, with the aid of their powerful fleets, succeeded in resisting him I am sure, however, that the Palermitan writer, now that his attention has been called to these errors, will correct them in the next edition of his book.

Philologists speak of a "Sicilian dialect." which they allege to be the language spoken by Sicilians. This is a mistake. What the philologist imagines to be a language is simply a game. The Sicilians, who are a childish lighthearted people, constantly play at a little game in which each player talks a formless and meaningless jargon and accompanies it with incessant gestures. Each player must make his meaning known to his opponent by gestures, and must not hesitate a moment in his duent utterance. If he fails in either of these respects his opponent scores one against him. Ten points usually constitute a game, but the Sicilians are such skilful players that a single game between two or three contestants will last an entire evening. Just as in the game of "morra," which is so popular all over Italy, no stakes are publicly displayed while the game is in progress, but judging from the enormous extent to which the Sicilian game is daily played, enormous amounts of money must be won and lost. Of course, when a Sicilian really talks

he speaks Italian. It may not be the very purest Italian, but it is at all events There are some grave philologists who will be a little astonished to learn that the so-called Sicilian dialect is no more a language than is the "aina maina mona mike" jargon of the American

On reflection, I believe the prevalence of washed underclothing in Palermo is a religious rite. If we assume, for example, that to wash clothes and to hang them out is regarded by the Sicilians as an expiatory sacrifice, we can suppose that all religious Palermitans daily offer up washed sacrifices of shirts and collars-the former for some large sin, such as failing to over-charge a tourist, and the latter for some peccadillo, such as stabbing a fellow-Sicilian. And yet how can poor people afford such

costly sacrifices? I do not intend to write a new and original description of Palermo. I could do it easily, for I have two guide books lying on my desk, but I restrain myself. There are people-notably the readers of religious weekly newspapers | Islanders in days gone by. The Fact of the Matter.

Mr. Hunt returned in his slow, sleek, insinuative fashion.

ssessing, with his chunky frame, his

liking for him; she hated the sound of his grandiloquent and unnaturally smooth tones; she detested the sight of his bloodless and Ishmaelitish visage. She did not know precisely how much authority he really had in the manufactory; he was always shambling and prying about the building when the superintendent chanced away, and she had decided that he must be a moneyed member of the new firm. He did not come infrequently to that department, and he always came with the air of a master-with an air of superior disorimination and absolute authority which was obviously meant to be very

impressive. "I try not to be remiss at all," Josie said somewhat impatiently and with a prompt motion to change the spools of her braiding machine.

he stepped back, seemed profoundly occupied with the animadverted Jersey, and awaited her response.

But the girl looked neither flattered

neffahle scorn. "I can maintain myself-and else where," said she, abruptly putting down her spools, and hastily arising from her

autocratic air.

As he shambled away, she became conscious of another presence—the presence of a stalwart and plainly dressed young fellow, who occasionally came there and who always had a genial smile or a bit of courteous commendation for the pale little braider.

There he stood, beside a great square column, his hands full of orders, his pen thrust bekind his natty cloth cap. his steady blue eyes fixed somewhat knowingly upon her agitated coun-

"He will be sorry I have gone-I am certain he will," she thought. And at the instant the steady and familiar footstep sounded behind her, and the vigorous and plainly dressed

figure was beside her. "What was the trouble?" he inquired in his gentle and direct way. "Did that Hunt make himself offensive?" "He has never made himself anything else," said Josie, ready to cry. And then with girlish diffidence, and in

a pathetically deprecatory way, she narrated what he had already sufficiently comprehended. "You are a brave little working girl," Mr. Kamaron commented with a peculiar smile. "You would never profess

Josie fancied he looked oddly amused and provokingly mysterious, but she ventured no questions. She was gratified to feel that she was really going back to the noisy old shop and to the pleasant companionship of the considerate young fellow who was always so merry and gentle, and who wore his unpretentious working garb with such royal dignity and kingly grace.

of that."

And so she went back to the factorybut not to resume the irksome braiding. Half-way down the work-room she was confronted by a chunky personage, resplendent with a gorgeous cravat, a wonderful pin and a conspicuously immense watch-guard.

"We have filled your place," Mr. Hunt grandiloquently announced, with his shifting eyes wandering to every-thing except the attentive face before "The fact of the matter is, we want only skilled labor. hands full of papers, the familiar pen thrust beneath the natty cloth capauthority whatever here. When our superintendent wishes a holiday henceforth, he must employ a less presumptuous substitute. We have had quite enough of your officious instructions and unauthorized ordering. We do not want you in the building, sir! Is that sufficient?" The substitute superintendent sham-

bled backward, and so obsequiously that the irreverent Josie actually and unblushingly laughed, despite her sore bewilderment. And Mr. Kamaron, noting the troubled

"Your mistake was not so singular, though," he explained. "The name of the firm has not yet been altered, although the firm itself was dissolved some time ago. OUR IGNORANCE OF MEXICO. Although geographically near, and having been in commercial relations with the rest of the world for over 350 Mexican "Central" and Mexican "National" Railroads, or virtually prior to the year 1883, the exploration of Mexico—owing to the almost total

absence of roads and of comfortable hospicia for man and beast, the utter insecurity for life and property, the intervention of vast sterile and waterless tracts, and the inhospitality and almost savagery of no small proportion of its people—was so difficult and dangerous that exploration has rarely been attempted, and those who have attempted it have generally imperiled their lives, to say nothing of their health and property. Mexico, furthermore, is not fully known even to the Mexicans themselves. Thus, a large part of the country on the Pacific coast has scarcely been penetrated outside of the roads or "trails" which lead from the seaports to the interior. There are hundreds of square miles in Southern Mexico, especially in the States of Michoacan and Guerrero, and also in Sonora, that have never been explored,

NEVADA'S GREAT SALT BED. In Lincoln county, on the Rio Vir-

gin, is one of the most remarkable deposits of rock salt on the continent. It is found in hills 500 feet above the level of the valley, and chemically pure. Blocks of it over a foot square are so transparent that one may read a paper through them. So solid is this salt that it must be blasted out the same as if it were rock. This deposit of salt lies about three quarters of a mile west of the Rio Virgin and three miles south of the Mormon village of St. Thomas. There body of this salt is exposed for a length GEO. WARD SELLECK, of nearly two miles, which is about half a mile wide and of unknown depth. The deposit runs north and south, and is seen on the surface for a distance of over nine miles. In places the canyons have cut through it to a depth of sixty feet. At these points the Hiko company formerly blasted out the salt required in working their ores. This great deposit of salt is situated at an altitude of 1,100 feet above the level of the sea. It is undoubtedly very ancient, as in one place it has been covered by a flow of basaltic rock. In other places it is covered to a depth of from one to five eet with volcanic trifa. At Sand Springs, in Churchill county, besides the salt that may be shovelled up from the surface, there is found a deposit of rock salt fourteen feet in depth. This salt is as transparent as the clearest ice, and does not contain a particle of any foreign or deleterious substance. It may be quarried the same as if it were marble. It is said that one man can quarry and wheel out five tons a day of this salt. It is only necessary to grind it to render it fit for dairy or table use. Sixty or seventy miles north of this, at the eastern base of the Dun Glen range of mountains, is the great Humboldt salt field. This is about fifteen miles long and six wide. In the summer when the surface water has evaporated, salt to the depth of three or four inches can be scraped up from the surface. Beneath the surface is a stratum of pure rock salt of unknown depth. This rock salt is so hard that in order to get it out rapidly it is necessary to blast it. Were a branch railroad to run one of these deposits, salt would soon be a cheap article in the United States. As there are in the same localities great quantities of sods, borax and other valuable minerals, it is probable that the day is not far distant when some of them will be tapped by branch railroads which could be cheaply laid down through the evel districts.

WARNING TO BEER DRINKERS.

For some years a decided inclination has been apparent over the country to give up the use of whiskey and other strong alcohols, using as a substitute beer and other compounds. This is evidently founded on the idea that beer is not harmful and contains a large amount of nutriment; also, that bitters may have some medical quality which will neutralize the alcohol which it conceals, etc. These theories are without confirmation in the observation of physicians. The use of beer is found to produce a species of degeneration of all the organs; profound and deceptive fatty deposits, diminished circulation, condition of congestion and perversion of functional activities, local inflammations of both the liver and the kidneys. are constantly present. Intellectually, a stupor amounting almost to paralysis arrests the reason, changing all the higher faculties into a mere animalism, sensual, selfish, sluggish, varied only with paroxysms of anger that are senseless and brutal. In appearance the beer drinker may be the picture of health, but in reality he is most incapable of esisting disease. A slight injury, a severe cold, or a shock to the body or mind will commonly provoke acute dis-

ease, ending fatally. Compared with inebriates who use lifferent kinds of alcohol, he is more ncurable, and more generally diseased. The constant use of beer every day gives the system no recuperation, but steadily lowers the vital forces. It is our obserration that beer drinking in this country produces the very lowest kind of inebriety, closely allied to criminal insanity. The most dangerous class of rufflans in

Sir John Lubbock's list of "one hundred best books" has created wide comment and induced several other persons to prepare a little list. means general. I have, however, while in Palermo, indulged in a little description, and this is the way it came about I took a cab one day to ride to the cathedral. Suddenly a local guide saw me, and marked me as his prey. He came to the cab, and, running along by

its side offered to show me the cathedral. I told him that I had seen it constantly from my earliest youth; that I didn't want to see it; that my physician had strictly forbidden me to indulge in cathedrals in any circumstances; that I was stone blind, having lost both eyes while fighting under Samuele Lincoln. but nothing could discourage that guide. He climbed up to the driver's seat, and began to point out to me every object of interest along the street. I thought he was the kindest man I had

ever known. Ashamed to be outdone in kindness by a guide, I tried to enlighten and interest him. I pointed out the animal that was drawing the cab and told him it was a horse. I showed him a cab and explained that it was a cab. I pointed out a girl and explained her at some length, so that the next time he might see a girl he could promptly identify her. I simply filled that guide up with valuable and accurate information by the time we reached the cathedral.

And there he disappointed me. found that he was mercenary. He asked me to pay him for taking me to the cathedral and showing me the city on the way. I felt hurt, but I told him that while I could not conscientiously pay him for doing what I had begged him not to do I would reduce my own price for information furnished to 5f. I presume I shall not be believed when I say that he went away without paying

me and in a towering rage. After all, the prevalence of washed underclothing in Palermo may not have any connection with religion. It may be a way of displaying political enthusiasm. Where other people hang out flags, the Palermitans may hang out washed clothing. A man's shirt is nearer and more important to him than any mere banner, and when he spreads it to the breeze he may mean to display his intense love for some political object. As an emblem of love for freedom and political purity what could be more striking than an unsullied shirt waving in the breeze? Why, we have all seen what powerful political work has been done in America by the mere

There is a good deal of enthusiasm in Palermo, for there are many new houses going up. In every city in Italy patriotic men are building new houses. Apparently no one wants to live in them, but still they are built. The meaning of this is that when an Italian has talked over the magnificent achievements of the Italian people during the last 25 years until his enthusiasm is at white heat he rushes out and builds s house to the glory of Italy. Probably he bankrupts himself, but he is happy, for he has visibly demonstrated that Italy is prosperous.

though I could do so with perfect impartiality, since I do not visit it. Still. I will remind the reader that in this cemetery, or rather catacomb, there are hundreds of dead monks dressed as in life and propped up in full sight of the Now, in view of the fact that the Italian Government has broken up nine-tenths of the monasteries and has forbidden any one to take monastic vows, it will not be long before live monks will become extinct in Italy. Hence, it is evident that the value of the preserved monks of Palermo will steadily increase. I venture to say that within ten years they will rise in

fabulous rates. Some far-seeing speculator ought to buy up the Capuchin cemetery of Palermo and the smaller one at Rome, and thus, cornering the market, hold the preserved monks for a cloud of washed underclothing, and the more I think of it the more it seems possible that the real object of this method of ornamenting the streets is for the purpose of shading them. Trees are, of course, impossible in the narrow streets and what would better take their place than the branching lines of underclothing? The sunlight Altered through

the rifts in shirts and the spaces between stockings falls gently and harmlessly on the pavements below. Yes, this does seem to be a plausible interpretation of the mystery of Palermo. In one respect an American feels at home in Palermo. The Palermitans have an unlimited admiration for Garibaldi, as, indeed, they ought to have, but they have not yet erected a respect able monument to him. Doubtles they have had committees and called for subscriptions, and raised money for their monument to Garibaldi, but somehow it is not built. Perhaps, knowing

that Garibaldi was an American citizen.

they fancied that to follow the American

custom as to monuments would be to

pay him a delicate compliment. The climate of Palermo is delightful -that is, when the south wind or the north wind does not blow. The former scorches and the latter freezes. Unfortunately the city is so situated that no other winds can reach it, and without a breeze of some kind it is, of course, warm and stifling. But still I know the climate is a delightful one. for innumerable guide books say so. I wish somebody—say, Prof. Hark-ness—would grapple with the mystery of the innumerable and groaning clothes lines of Palermo. I cannot form any theory concerning it that is satisfactory. and it is a reproach to science that no one can explain why 500,000 Palermi-

tans, rich and poor, should apparently

send to the wash seven days in a week,

200,000,000 shirts and other garments in A FIELD FOR MISSIONABIES.

The Pellew Islanders have but a vague idea of a future state, for they believe that only those men who have chiefs will be admitted to it. Every tribe has its own god, to whom all questions of moment are referred, the medium of communication in nearly every case being a woman known as the "Kaleeth," or God's wife. These women, by a rude sort of ventriloquism, manage to deceive the people, and have a great deal of influence in their councils. The natives have a currency among themselves of which they are very jealous, and foreigners can rarely procure specimens of it. It consists of heads of various descriptions, and of which no account as to their manufacture, nor of the origin of the material of which they are composed, can be found, and the only way in which the natives account for them is that they come from the heavens. The most probable conjecture is that they were brought by the Arabs, who

There is no member of society to whom The Science of Life would not be useful, whether youth, parent, guardian, instructor or clergymen—Argoyears, there is probably less known today about Mexico than of almost any other country claiming to be civilized; certainly not as much as concerning Egypt, Palestine, or the leading states of British India, and not any more than concerning the outlying provinces of Turkey, the states of Northern Africa, or the seaport districts of China and Japan. It is doubtful, furthermore, if as large a proportion as one in a thousand of the fairly educated men of the United States or of Europe could at once, and without reference to an encyclopædia, locate and name the 27 States or political divisions into which the Republic of Mexico is divided, or so many of its towns and cities as have a population in excess of 15,000 or 20,000. To some such the hurrying across the ocean of his future bride, scurrying her about New York harbor in a tug so as to escape detection, keeping her imprisoned in a New York hotel like a caged bird, then hustling her on here by a midnight train to be received at the depot by his clerk, while the to be husband prolonged his rest in bed and let his physical and intellectual energies expand in the genial influences of a procy in New York to succeed "Sunset" Cox, longed morning nap; then to rush her in on his own arm, unattended by man or maiden, and halt her abruptly before the good Dr. Sunderland to be married, and last, but not least, as soon as the champaigne, which flowed like a sparkling river, was quaffed, to hustle her off on a twelve-hour rail trip by night to the topmost crag of the Alleghanies, following upon her sea voyage and previous allnight's unrest, is criticised as just like an inexperienced, incorrigible and unfeeling old bachelor's lack of consideration and brutal treatment of a young and timid maiden, whose limited knowledge of the world and of men and things would not permit her to interpose an objection. On the other hand those whe view the situation calmly, and from a practical and common sense standpoint, it was the most natural thing in the world that these plain people, all unused in their past history to the flummeries of "society" life, should feel a justifiable ambition in making the event historical by solemnizing their marriage vows in the executive mansion rather than at Dr. Beecher's Plymouth church, where many had supposed it would take place on Memorial day. Then, too, the omission of the "giving away of the bride," and the custom of "best man" and maiden attendants, all tended to the beauty of simplicity, and it is said that Dr. riage ceremony with more heartfelt solemnity of manner and utterance. The slyly slipping out of the back door of the White House to escape the waiting train at the outskirts of the city is also censured by some, but to others it seems well planned and justified by the fact that a great mass of people, from the legions of darkey gutter snipes to scores of congressmen, attracted by the music and the general interest of the occasion, had choked up the main drive way to the White House so that egress would have been very uncomfortable if not impossible. Speaking with an earnest and one of the ablest republicans in congress the other day as to the political prospects in Connecticut, he remarked that the people of our state could hardly make a graver mistake or commit a greater folly than to fail to return our veteran congressman and father Norwich. It is most sincerely to be hoped that this is the intelligent view our republican friends in the Third district will take of the matter this fall. It is natural enough that Colonel Waite at his time of life, and after his long and arduous serthe comforts and quiet of private life, but such a public servant as he has proven should be forced to serve and, if need be, 'die in the harness" for the public good.

Hon. Frank H. Hurd, ex-congressma of the Toledo district, left here last week for New Haven to make a free trade speech before going home. Last Thursday Mr. S. P. Tuttle's carpost near Hill's lumber yard took fright at the cracking of whips by the whip hucksters on the corner and attempted to break away. He plunged and floundered, straddled the post and twisted the carriage shafts and nearly walked over a couple of brave young men who struggled heroicly to quiet the annimal. The carriage sustained only slight injuries. The same afternoon a fractious horse on Main street attempted to run away and although he was promptly checked, he succeeded in frightening another horse into an attempt

to run away which was also unsuccessful. P. T. Barnum is a great card player. Whist is his favorite game and he indulges himself whenever friends are present and opportunity offers. He never allows a pack of cards to be used ever three or four times before it is thrown aside and a new pack substituted. This habit always insures crisp new cards to handle. Whether he changes cards so often because he is afraid some of his opponents will mark the deck on him, we are unable to say. Mr. Barnum is a skillful as well as a constant player. Those who know say he plays a scientific game. There is a rumor that he also knows how to play the fascinating game of poker, but a News reporter was unable to verify it .-Bridgeport News.

Searles and son, of South Norwalk, were driving along side the New England railroad on their return from Roxbury, they discovered that a train was coming up behind them rapidly. Mrs. Searles, supposing that the horse would be badly frightened, jumped out of the wagon and fractured one of her ribs. The horse showed no unusual fear, and had she remained in the wagon she would have suffered no harm .- W. A. Mr. Raymond has disposed of all his oyster grounds to Mr. Shaffer, of New York .- Sentinel.

Our South Norwalk Methodist friends desiring to impress and render more effective their church music, have concluded to repair their Organ and add to it a mechanical motor. The social circle of the church have the matter in charge and to meet the Expenses attendant upon it will present to the people an entirely new and novel entertainment which should receive the cordial approval and patronage of all lovers of music and art. Copies of a number of the most celebrated paintings in this country have been secured at much labor and expense, and having been photographed upon glass will be reproduced upon canvass by the "Lime Light." A. S. Gibson, Esq., having kindly consented to assist in this part of the entertainment, each painting will be appropriately accompanied by vocal and instrumental music and recitation by our best local talent.

Their stock is all new and could not be duplicated next season for the same money. During the next two weeks their store, especially in the carpet and cloak rooms, is sure to be filled in consequence of the closing out sale .-Bridgeport Farmer.

Frank W. Adams and Miss Edith E. Gray were married at the residence of the bride's parents on Day street, South Norwalk on Thursday evening, by Rev. Dr. Seward. A select party of invited guests attended and witnessed the felicitous ceremony. Miss Nettie Noxon of Westport did the honors of bridesmaid with grace and dignity, and Harry S. Mosher was "best man." Prof. Gibson discoursed appropriate music on the organ. The display of gifts was elaborate and valua-

ble. A bounteous repast was spread after the wedding, and at 10:07 the bride and groom took the express train for New York where they remained until Saturday evening. On their return they took rooms with the bride's parents on Day street.

Colton's Portfolio File and Scrap Book is one of the best inventions for the filing of private or official papers we have ever seen. It consists of 31 manilla envelopes neatly bound in such a manner that they cannot be separated. Each envelope has on the back a place for memoranda of its contents. These are paged and on the back page of the book is an index to each envelope. The contrivance is simple and yet is valuable. It is adapted to anybody's use who has papers desired to be kept in good condition. We have one in use at this office and will be pleased to exhibit its conveniences to all who may call. Colton and Davis of 35 and 87 Fourth St. Milwaukee, Wis., are the manufacturers. They advertise in to-day's paper for agents.

F. W. Mitchell is the Connecticut repreentative of Buffalo Bill's Wild West, which, early in August will exhibit in Stamford, Danbury, New Britain, New Haven, Bridgeport and Norwalk under his personal management. Excursion rates will probably be arranged to enable Norwalkers to witness the exhibition at Stamford. Among the many new features of the show are the great chief Yellow Hand and Sixty Pinto ponies. The show is said to be more interesting and exciting than ever before. While exhibiting in Wheeling, West Virginia May 24th, Buffalo Bill was unfortunate in representing the duel between himself and Yellow Hand. In dismounting from his horse his left leg caught in the bridle of the animal and held him for several minutes. The leg was strained. He was assisted to the reporter's stand and two doctors called to attend him. His injury was such as to lay him

up for several days. The annual meeting of the Franklin street school district, city, was held last Tuesday evening. The clerk called the meeting to order and C. F. Hallock was elected chairman. The committee made an exhaustive report in which, among other things, it was recommended that the Franklin street school district be separated from the town because of the committee and the town authorities. On he ballot for first committeeman W. C. Quintard had 156 and John B. Bouton 80: scattering 25, The second ballot elected Abiathar Blanchard by 156 votes to J. B. Bouton's 6, John Shepard's 14, with 14 scattering. The third member of the ommittee was Franklin A. Smith, chosen by 152 out of 175 votes. The following officers were then unanimously elected clerk, Nelson Dickerman; collector, F. A. Tolles: treasurer, J. M. Layton; auditor, John W. Dake. Gen. Next week, Tuesday and Wednesday evenings, the Broad River Sunday school will give their third annual strawberry festival. The strawberries for the occasion will be furnished by local raisers, and, as there are several varieties and considable pardonable pride among the cultivators, the display will undoubtedly be very fine, and patrons will reap the benefit. Carryalls will leave the post office in Norwalk on both evenings at the usual intervals. Admission to the chapel ten cents.

An impudent fellow has been visiting families in South Norwalk, asserting that he has been sent to repair kerosene lamps, but would not give the name of his employer. Generally he has called when no male member of the family was at home. He made a miscalculation on visiting Mrs. Wm. O. Beard's recently. Ed. was at home, and, after putting up with much mpudence from the lamp trimmer, orhim away. Upon his refusal Ed. collared him, and, drawing him not very gently across his knee, gave him a "stern repri-

The milk traffic on the Housatonic railroad within the past few years shows a remarkable increase. The present average haul from all the milk stations along the line is 1,250 cans per day, or more than four double-deck carloads. Less than ten years ago the aggregate daily shipment was easily hauled in three single-floor cars. The principal increase has been within the past three years, and although all the milk stations have steadily increased their shipments, the greatest growth is shown at Falls Village and Cornwall Bridge.

James Means' \$8.00 shoes. Officer Lockwood was notified Saturday night that a trunk belonging to Mr, Fred. Belden's hired man had been stolen that evening. The trunk contained \$85 in money and a quantity of wearing apparel. The officer went to the Belden residence and procuring lights searched the adjoining locality but found nothing. The next morning a gentleman walking down the lane towards "Dublin" found the trunk bursted open. An examination showed that the thief who had evidently seen the officers searching for him, had hastily decamped taking a pocketbook which was in the trunk. As it happened there was no money in the pocketbook, the \$85 being in a writing book which was in the bottom of the trunk. This was not disturbed and the thief had only his labor for

\$1,440,000 The proposals were opened last Wednesday by Warden Hyatt and burgess J. G. Gregory and the following amounts were

Citizens' Savings Bank, Stamford, 5,000
Torrington Savings Bank, New London, 100,000
Jewett City Savings Bank, 10,000
Stamford Savings Banks, 10,000

The average bid was 1051 and the whole sum realized was \$184,165.50 making a premium of \$9,165.50. A letter from W. T. Hatch & Son, the New York, bankers, to Warden Hyatt, compliments him very highly on the successful placing of the bonds and states that the price realized is greater than ever received by any town city or borough in the state for bonds of a similar rate.

The greater part of the premium received will probably be put into the sinking fund, the balance being used for paying the floating debt. This interesting problem is advanced by Mr. John S. Seymour: If nothing occurs to raise the rate on money in the next ten years, as these bonds have a ten years option, what is to hinder us from refunding them again at the end of that time and getting \$9,000 more premium. In this way our sinking fund is largely increased) and if everything should continue favorable the extinction of the entire debt is only a matter of time and premiums.

The expenses of issuing the bonds amounted to \$255.53, as follows:amounted to \$200.00, as rollows.

Murder in Bridgenort

Last Friday morning William H. Adams of Bridgeport, was shot through the head and killed by Charles W. Whipple on account of jealousy. Adams had a wife and family living in Stepney whom he had practically deserted, and he was boarding at Whipple's house. His intimacy with Mrs. Whipple was for some time the subject of remark among the people of the neighborhood and Whipple asserts that he has undeniable proof of his wife's infidelity, which had become too open and deflant to be patiently tolerated, and in desperation he armed himself with a Smith & Wesson revolver and met Adams as he was coming down stairs and fired at him, with fatal results. He says his intention was not to kill Adams, but to cripple him by shooting him in the shoulder, but that his wife struck the pistol as he pulled the trigger and diverted his aim so that the bullet went higher than was intended. Adams was 50 years old and was a veteran of the Seventeenth regiment. Whipple is also a veteran of the late war, and much sympathy is expressed for him, the provocation for his crime being considered very powerful. He was taken to jail and has a hearing in the city court to-day.

Burglars Around. The residence of St. John Merrill, on the Newtown road, near Betts' sawmill, was entered by burglars last night and wearing apparel taken to; the amount of \$60. The thieves gained an entrance through a window on the ground floor and ransacked two rooms. They had not completed their work when they were frightened by the barking of a pet dog. Mrs. Merrill heard the dog and spoke to him and this probably scared the burglars who made off.

About an hour later an attempt was made to enter Wallace Dann's house on the same road. Mr. Dann heard a noise at the window but thought "it was the cat." The thieves did not gain an entrance. It behooves our citizens to keep a sharp lookout as these parties are undoubtedly the same ones who have been doing so much thieving in Wilton and

A Great Mistake. On Saturday without the least justifiable explanation, the entire tramway system of New York and Brooklyn was crippled by a "tie-up" which involved every line in the two cities excepting the Third Avenue line in New York which is being run by non-union men. After lying idle

for several hours the men were ordered back to work as mysteriously as they were ordered to strike. Nothing was gained. And no one knows what gain was sought. Such trifling and wanton abuse of power is a great mistake on the part of the leaders of the workingmen. And it is a mistake which, if often indulged in, will result in the final overthrow of the Knights of Labor. Coercion and intimidation may do for Ireland. It never will survive

Advertise.

Newspaper advertising is the most energetic and vigilant of salesmen, addressing thousands each day, always in the advertiser's interest, and ceaselessly at work seeking customers from all classes. One would hardly expect a manufacturer of ombstones to advertise in a funny paper like the Judge, but one has been doing so regularly and the other day received an \$8,000 order from New Mexico. This proves that you never know when and where advertising will get in its work, but it strikingly demonstrates the fact that it does, and its results are beneficial to the advertiger _ Angonia Sentinel

A collection of photographs of American arms has been compiled by an officer attached to the Springfield armory for the Sultan of Turkey. This collection is made at the Sultan's request, and the photographs include the exterior appearance and details of construction of the rifles and pistols of every prominent manufacturer in the country. A duplicate set of the forty large photographs will be kept at Washington.

To remove a particle from the eye take a horse-hair and double it, leaving a loop. If the object can be seen, lay the loop over it, close the eye, and the mote will come out as the hair is withdrawn. If the irritating object cannot be seen, raise the lid as high as possible, and of plants. place the loop as far as you can, close the eye and roll the ball around a few times, draw out the hair, and the substance which caused the pain will be sure to come with it. This method is practiced by axmakers and other workers

The once mighty Euphrates seems likely to disappear altogether. For some years past the river banks below Babylon have been giving way, so that the stream spread out into a marsh, until steamers could not pass, and only a narrow channel remained for the native boats. Now this passage is becoming obliterated, and unless matters improve, the towns on the banks will be ruined, and the famous river itself will be swallowed up by the desert.

A Brazilian woman never goes shopping. Servants are sent for samples, and, if it is a bonnet the senorita wants to buy, a basket or box containing all the latest Parisian styles, is sent up for her inspection. Most of the purchasing is done in this way, and a woman is seldom seen in a shop. But in this remark the negroes are excepted. The streets swarm day and night with gorgeouslydressed Dinahs, wearing turbans that would shame a passion-flower for color, and usually yellow gowns. They chatter like magpies, and seldom seem to be going anywhere, or to have any object in life beyond gossiping with the friends they meet.

A Henry country farmer came to Clinton on the late cold wave wearing a coonskin overcoat. A west side grocer inquired: "Why don't you wear the hairy side in instead of out?" "I reckon the coon knew which side was the warmest when he wore it, didn't he?"

replied the farmer. Mr. Jenkins playfully remarked to his wife that in her he possessed five fulls. "Name them, my love." "You are beautiful, dutiful, youthful, faithful and an arm full." "You have the advantage of me, my dear." "How so, my precious?" "I have but one fool." Mr. Jenkins made no further inquiry.

Chorus of children—"From hell."

"You say the officer arrested you while you were quietly minding your own business?"—"Yes, your honor. He caught me suddenly by the coat collar and threatened to strike me with his staff unless I accompanied him to the station promptly."—"You were quietly attending to your own business; making no noise or disturbance of any kind whatever?"—"None, sir."—"It seems very strange indeed. What is your business?"—"I'm a burglar."

"We feel "a Western editor is greated."

"We feel," a Western editor is quoted as writing, "that an apology is due to widow Grimes. In our issue of last week we stated that she had eloped with an eighteen-year old man. The truth is that she was thrown from an eight-year-old mare, which she was riding in a lope, and which slipped and fell. Mistakes will happen in the best regulated newspaper-offices, and we are confident that when we state the item was sent over a telephone wire, no other apology will be needed."

Not long ago, as an elderly couple were out walking, a lady on the opposite side of the street slipped and fell down. An analysis of the contents of the principal grenades, tubes and other patent devices for the extinction of incipient conflagrations has recently been made by Prof. Kedzie, chemist of the agricultural college at Lansing, Mich. He finds that the only active ingredient in all that he analyzed is common salt, and his investigations go to prove what is generally known, namely, that salt water is better than fresh water for putting out fires.

A new preservative lubricant which promises to be of great value in the arts is called pedro-vaseline. It is a clear liquid hydro-carbon, obtained from petrolatum by depriving it of twentyfive per cent. of solid paraffine. It is insoluble in water and does not grease, vet it lubrifies all bodies and preserves them from oxidation. It is endowed with the properties of water, alcohol, glycerine and the fixed oils. For preserving bright steel articles, and probably as a watchmaker's lubricant, it will prove valuable.

Franklin Institute tests indicate that one pound of coal burned under a good boiler yields a light of about twenty candles by the incandescent electric system. The same weight of coal gives him by the citizens of South Carolina from the naked are light about 158 candles, only eighty candles being ordinarily available, on account of the mounted. The hilt and scabbard are | shading of are lights. The gas from one pound of bituminous coal yields from fourteen to seventeen candles. The greater economy of fuel in electric lighting is offset by the increased expense for machinery and attention.

> The adaptations with which plants are provided for making the most of the water that comes to them in the form of rain or dew are thus classified by Lundstrom, who has made them a subject of special investigation: Depressions, in the form of leaf-cups or of grooves in the epidermis; hair formations, in tufts or borders; hydroscopic membranes, as spots or stripes on the epidermis; and anatomical adaptations, such as water-absorbing textures and swelling glands. The strip of emery cloth is laid on to one set of the studs, and the file, as it is called, closed, which fixes the strip on one side. It is then similarly fixed on the other side, and thus constitutes what is called an emery file, and which is a handy and convenient arrangement for

> After a study of nearly 12,000 cases, Dr. Hermann Brehmer, an able German physician, rejects the theory of contagiousness of pulmonary consumption. He finds the disease to be due to deficient nutrition of the lungs, which may result from various antecedent causes, such as inherited defects of constitution, and vital organs impaired by disease, injury or mode of living. He believes that the operation of all the causes may produce such changes that it may be possible years, even decades, in advance to predict with great probability which members of a given family will be afflicted with pulmenary consumption, and which will remain healthy.

Last year Lieut. Moxie and some friends accidentally found a food plant while visiting the South American province of "Matto Grosso," that has the most remarkable effect on tired nerves imaginable. Simple, harmless as gruel, neither medicine, stimulant, tonio or alterative, it makes you feel solid, vigorous, hungry and capable of great endurance, leaving no reaction, but as permanent results as beefsteak. It recovers from nervousness nevous exhaustion, or any result of overwork at once, even bilindness, insanity and paralysis. It breaks up intoxication and liquor thirst at once, and makes the drinkers feel better than stimulants. It has already stopped half the liquor traffic in Lowell, and is creating an immense sensation in New England and the Middle States. A gigantic company has been formed for its manufacture and sale all over the world. The physicians say it is the best nerve food yet discovered, and will supersede stimulants and tonics. In honor of its discoverer, it is called the "Moxie Neve Food." It already crops out in the druggists windows almost everywhere. The wholesalers says its sale has never been equalled. For a wonder it is very cheap, considering its reputation.—Courier.
