The College Boy's Letter Home.

DEAR MOTHER :- I am not making so much progress as I expected in my studies. because there's a great deal else to attend to here. But we have lively times. I have ust returned from the funeral of Billy Cook. He was shot last Tursday night because he wouldn't allow the Sophs to take off his pantaleons and paint his legs red and green, barber-pole fashion. This is the last de gree conferred on the Freshmen by the Sophs. I wish you would send me a sixshooter, one hundred cartridges, and a double borr I shot gue. We ain't a going to stend any more non-sense from the Sophs. After prayers this morning our class were all busy making sand hars. We're putting up a bar ricade on the east end of our building, and intend to mount it with a six pound carronade. The losses in our class have been pretty heavy this week. John Hilton is very low with a bullet in his stomach, and S-war. Livingston is n 4 expected to recover from the stab in the side. Jack Rhanelender is lamed for life by a bull-t in the knee, and Sam Aster has lost the sight of one eye from a brickfut. There isn't a whole window left in our college building. But you wait, m ther! Von just wait a few days and you will hear something We're undermining the Sophs' quarters. We're working day and night. The tunnel is now 120 yards long. It goes straight over the campus and under old Prex's building. We've established a communication with his cellar, and I tell you a drop of claret or Burgundy is very nice to have after a fellow's handled a pick and shovel half the night. We shall use dynamite. Keep shady, mether. There won't be a Soph left by this time next week. Your affectionate see,

PARTY BLINDNESS.

The Democrats in Congress are fulfilling their destiny i.e. by their efforts to promote their party's interest they not only injure them but endanger the peace and prosperity of the country. The passage of the Potter resolution is revolutionary in its character, and cannot fail to excite the disgust and contempt of every patriot. The people are satisfied that there is no constitutional authority to question Mr. Hayes' title, they are satisfied with his course, and if the blind and malicious party movement is puraued by the political tricksters in Congress to an issue that shall make it necessary for the President to conform to his oath "to faithfully execute the office of President of the United States," in preserving, protecting and defending the constitution, he is man equagh to do it, and the people of both parties will come to his rescue as they did to Lincoln's at the firing on Sumter. We de not know why some things are permitted, nor probably never shall, but there may be the Democrats in Congress are manifesting the most alarming symptoms of political insanity, and they will find that the very element that they are aiming to influence in their favor, will be the one to destroy them. What this country wants is place and presperity, and it will not sanction any movement that has for its object the removal of one and an interference with the other.

The very fact of the good feeling which prevails is the prime cause for this last me ve by the D moere's in Congress. They don't want peace. A country satisfied with a Republican executive is not what they consider the best for the Democratic party, and to make political capital and disturb the social and financial : flairs of the namon they have begun the farce of investigating the title of President Hayes, -a title given him by a commission proposed by and composed of what the Democratic party thought would not confer it upon him, but would bestow it upon their candidate, Somuel J. Tilden, and give them central of the patron age of the government.

What good can come out of this investigation at this time? Surely the party can got be so blind but they must see that no material gain can accrue to them. Haves has been declared President, and has qualified, and there is no power to cause his temoval, even if he is declared to have been placed in authority without a majuity of the votes of the country, except by revolution, and that power is not with the Democratic party to-day, nor will the demagogery which is now being used bring it to it, but The Democrats, however, have no expec-

tation of bringing about a revolution of this kand, but have begun this movement to make political capital for the next presidential campaign, and they are not prophetic enough to see that their action is premature, | graves to be decorated: and will react to their damage before this contest begins. It is the old story of the "off year," of the past eighteen years, in Of Col. Fowler, Charles E. Merri which the rebukes administered to the R . | Wilbur Nash, publican party have been construed into an James Gill, endorsement of the Democratic party, and John L. Byington, the latter have again been led thereby into a disposition that is not in accordance with Goeld J. Jennings, the sentiment of the country.

And it is not to be wondered at that the M. J. M. A. Hill, Democratic leaders are incapable of under Owen Murphy, standing the situation and appreciating the H. A. Weton te, estimation in which they are held by the in- W. W. Westlake, telligent elements of this country, because

Smith cannot see in this present movement a party spirit, although it has been attempted to disguise it by a showing of principle and a cry of "fraud." If Hayes was elected by frau! John Brown, the Democratic party is equally re-possible James McGory, with the Republican party, yea, and more so, because the electoral commission was a Domocratic measure and from which Republicans expected but little favorable to Francis Jones, them, but, nevertheless, agreed to it in good faith, and would have abided by its decision if it had east them the very existence of C. A summer hotel is about to be erected on Pine Point near Roton Point. The sloop Mary Enolia brought a cargo of lumber there this week for that purpose. After she was unloaded she floated at nigh tide on the top of one of the many sunten rocks in that vicinity. When the tide fell the sloop stood up at an angle of forty-five degrees, and was so badly demaged that she had to be hauled out at Gregory's Point for repairs. The manufacture of blick pavement for The manufacture of black pavement for New York City has commenced again with renewed enterprise. Two or three years since a genteeman by the name of Audrews purchased about eighteen acres of the rocky blaff on the shore of Wilson's Cove from the cetate of Charles L. Baymond, and has been working these rocks to a great disadvantage by usant labor, but last week a schooner loaded with boilers, neam drills, coal, and powerful manninery for cutting stone in blocks landed her cargo at the base of one

of these high bluffs, where it is to be erected for the purpose of cutting up these rocks and drilling in the quarry. The boilers are unright tubular, 60 horse power, the stone cutter has a stroke of 46,000 lbs., and cuts on both sides of the stone at one stroke. Nine of our unemployed cystermen are there now at work. They expect to employ fifty or sixty men when fully prepared. fifty or sixty men when fully prepared. They have brought an experienced miner who works at the base. They formerly worked at the top of the bluff.

A Campaign Slander,

When Dr. R. V. Pierce was a candidate for State Senator, his political opponent published a pretended analysis of his popu lar medicines, hoping thereby to prejudice the people against him. His election by an overwhelming majority severely rebuked his traducers, who sought to impeach his busi ness integrity. No notice would have been taken of these campaign lies were it not that some of his enemies (and every successful business man has his full quota of envious rival) are republishing these bogus analyses. hern published, purporting to come from high authority; and it is a significant fact that no two have been at all alike-conclu-

ing the stomach and bowels, and even the blood. In small doses of one pill a day, they stimulate the digestive organs and promote vigorous health.

AYER'S PILLS have been known for more than a quarter of a century, and have obtained a world-wide reputation for their virtues. They correct diseased action in the several assimilative organs of the body, and are so composed that obstruc-

tions within their range can rarely withstand or evade them. Not only do they cure the every-day complaints of every-body, but also formidable and dangerous diseases that have baffled the best of human skill. While they produce powerful effects, they are, at the same time, the safest and best physic for children. By their aperient action they gripe much less than the common purgatives, and never give pain when the bowels are not inflamed. They reach the vital fountains of the blood, and strengthen the system by freeing it
