11/23/97

Budapest, üt 9t.
1898. och 10th

Dear Prof. Atwater.

You have been kind enough to send me some volumes of the Reports of the Storrs Agricultural Experiment Station, and other publications of the U. S. Department of Agriculture.

Will you kindly excuse me if I am troubling you once more by asking you to be so very kind to send me the Tenth Annual Report — of the year 1897 — if it is already appeared.

Your admirable researches are full with the most important facts which I expect to use in an investigation of the Hungarian agricultural labourers what I have begun last year.

I am, dear Professor, very sincerly yours

E Farkas

Superintendent of Public Health.

Oct. 25, 1898.

Dr. Eugene Farkas,

Andrassy ut 94, Budapest,

Austria-Hungary.

Dear Dr. Farkas:-

We were rather late in publishing our Report for 1897 and copies have not yet been sent to our foreign mailing list. I take pleasure,however,in sending a copy by same mail with this. I also enclose a list of publications of the Office of Experiment Stations of the U.S.Department of Agriculture on the subject of food and nutrition. If you will let me know what ones of these you have not in your possession I will try and procure them for you. This list was published nearly a year ago and several publications have been issued since then, which I would also be glad to furnish you.

I am very much interested in your investigations and wish you the best success in conducting them.

Very truly yours,

W. O. Atwater

Magyaróvár, Apr. 20th 1912.

Mr. L.A. Clinton Director

Storos

Dear Sir:--

I propose to undertake in Spring 1913 a longer studying voyage for becoming acquainted with the experimental agricultural institutions of the United States of North-America. This trip I should like to execute for acquairing a thorough knowledge of the organisation and the complete labour-programm of these institutes serving to the agricultural scientific research, and therefore I should spend 1 eventually 2 years working under the direction of the assistents or professors of an experiment station.

With regard of the circumstance, that for the execution of this studying yourney only a small sum is at my disposal, and so that I am to cover the expenses of it rather by my own means, I request You kindly to let me know, if I could find an occupation at the experiment station being under your leading near theassistents and professors and what payment I can get for the work done under this thime. I heard from

some of my compatriots, who went for the same aim to America, that intelligent European Young people, eager for wisdom, were covering in the same manner the cost of their studies.

I am 26 years old speaking pretty well English and German; belonging to my studies, official activity and individuality I possess the best references and recommendations from the part of the government and other competent factors.

I should be very thankful to You, if You had the kindness of informing me about the admittance my offer found, but if You would make it possible to me finding employment at your institute in the upsayed manner.

Very respectfully yours

J. Szuromi

assistent of the Hungarian Plant Experiment Station. Magyaróvar, Hungary.

May 8, 1912.

Mr. J. Furaniji,

Magyarovar, Hungary.

Dear Sir:--

In reply to your letter of April 20, I would say that I do not know of any work which we could give you at our experiment station which would assist you in paying your expenses. I think it is probable that at some of our American experiment stations you may be able to get such employment, but we can promise nothing in that line at the present time.

Yours very truly,

Feb. 7, 1913.

Mr. E. Dansy,

Kolozsvar, Hungary.

Dear Sir:--

I have your interesting letter of December 6th, and should be glad in any way possible to assist your plans. This station has a full staff at present and is extremely limited in funds at our disposal so that we cannot as far as I can see at present make any further engagement for the coming season. It would not, therefore, be possible as far as I can now see to offer you a position where you would derive any income. The prospect of such a position is much more probably in larger institutions more abundantly supplied with funds.

Very truly yours,

M. KIR. GAZDASÁGI AKADÉMIA
KOLOZSVÁR

ÁLLATTENYÉSZTÉSI TANSZÉK.

Dear Sir!

I propose to undertake in Summer 1913 a longer studying voyage for becoming acquainted with the experimental agricultural institutions of the United States of North-America. This trip I should like to execute for acquiring a thorough knowledge of the organisation and the complete labour-programm of these institutes, serving to the agricultural scientific research and therefore I should spend one eventually two years working under the direction of the assistants or professors of an experiment station.

With regard of the circumstance, that for the execution of this studying journay only a small sum is as Governmental aid at my disposal and so that I am to cover the expenses of it rather by my own means, I request You kindly to let me know, if I could find an occupation at the experiment station being under Your leading near the assistants and professors and what payment I can get for the work, done under this time. I heard from some of my compatriots, who went the same aim to America, that intelligent

European young people, eager for wisdom, were co-
vering in the same manner the cost of their studies.

I am 22 years old, speaking pretty
well English and German; belonging to my studies, of-
ficial activity and individuality I possess the best re-
ferences and recommendations from the part of the
Government and other competent factors.

I should be very thankful to You,
if You had the kindness of informing me about the
admittance my offer found, but if You would make
it possible to me finding employment at your insti-
tute in the upsayed manner.

Very respectfully yours

E Dauer
