## Dr. Jorgensen Calls Meeting

### Peace Walkers Discuss Experiences In Russia

By Evelyn Marshak

In times gone by complainers were told "tell it to the Marines," but things have changed and now they are told to tell it to the Russians. When members of the Committee for Nonviolent Action were told to tell their message of disarmament to the Russians, they decided that possibly their feelings might be shared by others. Out of this idea grew the cross country and then cross Europe to Russian walks.

Speaking at a lecture sponsored by the International Relations Club, John Kruse, one of the walkers, told of warm and cold receptions in various European countries.

Kruse, who is a conscientious objector and was working in a mental institution before he joined the walk, said that most people feared a nuclear war, but the people of Poland were more

worried about the Nazis whom they said were in power in West Germany.

#### The Itinerary

The walk began in San Francisco and Kruse joined the walkers in Chicago. The team spent six months crossing the 4,000 miles of the United States. Then on the first of June, thirteen Americans plus two photographers flew to London. After a rally in London's Trafalgar Square they were joined by two other Americans, four British volunteers, two Swedish volunteers and one volunteer from Norway, Finland and West Germany.

The walkers had planned to make France their next stop but were refused admission even though they jumped overboard in Le Havre harbor to emphasize their plight.

#### Belgian Reception

Thwarted in their attempts to

enter France they went to Belgium where they were "well received." Kruse said, "The Belgians were interested in our message but said they were a small country; what could they do?" Belgium, a neutral country, was invaded during both World Wars though they were not fighting the Germans at the time.

After Belgium they went to West Germany. "In a country that is in the midst of the Berlin crisis, the people are very complacent and seem more anxious to have consumer goods than worry about wars." People who had helped the walkers had their phones tapped and were questioned by the police.

The German Democratic Republic was the next stop and the difference between the two Germanies was very much in evidence. "They did not seem unhappy about the situation. Even though they were mostly a peasant people they had TV aerials on almost every roof."

#### Walkers Policed

The people were extremely friendly but the walkers were strictly policed. The Peace Council of the Republic sent walkers to join the Committee and distribute its own literature. This conflict of interest lead to some difficulties but complaining didn't help since the laws of the country provide that anyone can distribute peace advocating literature. The only way to stop this was to sit in the middle of the road and refuse to move unless the Peace Council members stopped their actions.

While people fear the nuclear fallout and push-button wars, the Polish people expressed fears of the Nazis. While in Poland, the walkers visited Auschwitz and other concentration camps. At one of these camps there wasn't much to see but the depressions in the ground, and bones lying around hinted at the horrors of these camps which eliminated 20% of the Polish population. It had been Hitler's plan to wipe Poland off the map.

"There is more freedom in Poland than other Communist countries and the Church is very strong." How can we disarm while the West Germans rearm and Adenauer threatens a united Germany by force if necessary? "It was odd to speak with Stalin's picture in back of you but we were glad to reach Russia."

(Continued On Page 3)

### Administrators, Students Meet Over Controversy

A full-scale meeting between students and top administrators of Uconn has been set for Friday afternoon by Mr. Clark Bailey, assistant to the president. The purpose of the meeting is to try to clear up the student-administration controversies which have produced several demonstrations this fall.

"The basic cause of the student protests is the exercise of greater control by the administration over the spending of student activities fees. Since much of this income is spent on campus news media, some students claim the controls amount to censorship," according to the Associated Press news release.

#### Student Participants

Students were invited to the meeting by Mr. Clark Bailey on Tuesday afternoon. The five student spokesmen invited thus far are: The Editor of the Connecticut Daily Campus, Les Archambault; the Station Manager of WHUS, William Grimes; the Editor of the Nutmeg, Don Nierling; President of the Student Senate, Judy Vibert; and the Vice President of the Student Senate, Al Medeiros.

Both President Albert N. Jorgensen and Chairman John Budds of the Board of Trustees were to attend the meeting. Mr. Budds might not be able to attend, as he has another important function to attend before the 4 p.m. meeting.

#### Hope Expressed

The student leaders involved ex-

pressed the desire to come to a conclusion satisfactory to both students and administration. Bill Grimes of WHUS stated, "After several meetings with administrative representatives I have mixed emotions concerning the meeting Friday. All I can express at this moment is the hope that this meeting will be beneficial to both the students and the administration."

Editor Les Archambault stated, "It is my sincere hope that all of the members of the Board of Trustees that have been invited will be able to attend this meeting. This is the first meeting held where the students will have a chance to discuss the student problems with the people who have the authority to make the necessary adjustments. Even if no definite actions come out of this meeting, we will be able to explain our position to the Trustees and clear up any misunderstandings on the part of either party."

#### Understanding Needed

Editor of the Nutmeg, Don Nierling, stated, "I feel that if both parties at the meeting Friday approach the subject with open minds much can be accomplished."

Miss Judy Vibert, President of the Associated Student Government, said that the Senate would be formulating a definite proposal at Wednesday night's Student Senate meeting to bring before Friday's meeting with the administrators.

### Fall Rush Program Opens At IFC Smoker Monday

The fall rushing program will get under way Monday evening at 7:30 p.m. with the annual Interfraternity Council Smoker in the HUB Ballroom. All first semester Freshmen must register for rushing at this time.

### Debate Club To Host Trinity Men

The Trinity College Athenaeum Debating Society has accepted an invitation from the University of Connecticut Debate Council to participate in a pair of debates tonight at 8 p.m. in HUB 207 and 209.

This will be the first intercollegiate debate of the season for the Connecticut debaters. The two schools will argue the question, RESOLVED: That labor organizations should be under the jurisdiction of anti-trust legislation.

Debating the affirmative for Uconn will be the team of Jim Cornish and Larry Moore. The negative side of the proposition will be argued by Bill Desneski and Mike Ambrose. The Trinity debaters will also have two men on each side of the proposition against Uconn.

#### Open to Public

The debates are open to the public and all interested persons are invited to attend. Following the debates a critique will be presented in order to evaluate the debating done by each debater.

At a future date the Connecticut debaters will return the visit by traveling to Trinity for another pair of debates.

The regular business meeting of the Debate Council will begin at 7 p.m. in HUB 207 at which time practice debates will be scheduled and future debate trips will be discussed.

Failure to register at the Smoker may mean that the Freshman may not be allowed to pledge until the next regularly scheduled tapping period. Registration will take place in the HUB Ballroom annex both prior to and following the Smoker activities.

#### Activities

The rushing program will consist of an informal gathering of fraternity men and rushees during which time a film about the fraternity system will be shown. A speaker has also been scheduled to speak on rushing and a brief question and answer period will follow.

Open rush will officially begin following Monday night's smoker. A schedule of Round Robin parties has been planned for Wednesday and Thursday nights, November 8 and 9 and Tuesday and Wednesday nights, November 14 and 15, from 7:30 to 10 p.m.

#### Round Robins

Round Robins are held to insure interested freshmen the right to visit the houses of their choice. These parties consist of an informal get-together of brothers and rushees at which time individual houses explain their particular assets and offerings to rushees. The rush party also serves to let the brothers and rushees get to know each other. In addition, the parties provide an opportunity for rushees to observe fraternalism first hand and to find out just what a fraternity has to offer him.

Following the period of open rush, three invitational parties will be held. Invitational parties have been scheduled for Thursday, November 16 and Monday, November 20. An invitational brunch is slated for Saturday morning, November 18.

Following the three week period of active rushing, a formal tapping will be held in the HUB Ballroom on Tuesday, November 28. At this time bids will be presented to all men wishing to pledge and a formal reception for those accepting bids will follow.

### Inside Pages

The School of Engineering's magazine, "Connecticut Engineer," will be released soon to engineering students . . . see page 3.

The latest national and international happenings . . . see page 6.

The Uconn soccer team wins its fifth game of the season against Brown . . . see page 6.

Uconn's cross country team, and its achievements . . . see page 7.

**RUSHEES REGISTER** for fall semester rush at last year's I.F.C. Smoker. This year's smoker will be held in the HUB Ballroom on Monday evening at 7:30 p.m. All Freshmen interested in rushing are required to register at the smoker, or else they will not be allowed to rush until next semester. The smoker will officially open fall rush and will be followed by a three week period of rush, consisting of four open round robin parties and three invitational. Following the rush period, tapping ceremonies will be held in the HUB Ballroom on November 28. (Campus Photo—Howland)

THURSDAY, NOVEMBER 2, 1961

## The Struggle Against Communism

Although it is not the usual policy of the DAILY CAMPUS to frequently reprint information from other than student sources, we believe that the world situation is grave. The editorial in the Monday, October 30, edition of the CHRISTIAN SCIENCE MONITOR vividly expresses our opinions on the subject. It is re-printed below:

The most precious values known to men continue to be in danger.

These are, in essence, the right to work out one's destiny, under God, in a society where the individual is of primary importance. These values are protected by constitutional government. Individual opportunity is sought in the framework of the good of all.

Today the Communist bloc presents a vast threat to the independence of men and nations. Its aggressive thrust is manifest through military power, economic pressures, subversion, and infiltration. Communism also reaches deep within nations, striving to subvert, mesmerize, control. After 16 postwar years in which the United States has striven to seal off communism on the one hand, and aid recovering or growing nations on the other, it is no wonder that many Americans feel frustrated and alarmed as communism seems to be stronger than ever.

In such uncertain, disturbing times some Americans have felt that the greatest danger to the nation comes from inside. Only too often ardent and laudable patriotism has been disgracefully played upon and abused by a wide range of propagandists who make money and status by mongering hate and fear.

The reckless charges of such propagandists would have the effect of dividing loyal American from loyal American.

It is important that people should awaken to the sinister assault being made upon the sanity and common sense, indeed, upon the loyalty of their thinking. The charges circulated by leaflet and flysheet can be readily exposed as lies and distortions, though as usual there are sprinkled through them true facts upon which a false interpretation has been placed.

The best answer to communism, the best way to prevent and defeat any efforts to subvert American society—or any other—is in an action program. For long years, The Christian Science Monitor's position has been unequivocal:

This newspaper rejects and abhors communism in any form.

This newspaper also opposes many proposals for social or economic change which are sometimes inaccurately equated with communism, but which might lead to a statist system, or to excessively centralized government.

This newspaper does not support what is called "one worldism" if that means world government. It does support co-operation by sovereign nations to seek peace and order. Such co-operation now exists in the United Nations, a meeting place of sovereign nations, with its many disappointments and defects. This newspaper believes in salvaging, improving, not scrapping the United Nations.

This newspaper believes in exposing and extirpating any Communist subversion or penetration of American institutions.

This newspaper strives to fight communism with every weapon of integrity and truth.

This newspaper believes communism must be accurately and honestly identified. It should not be confused with whatever form of human thinking one happens to disagree with. Above all, those who would fight communism successfully must not take up communism's own weapons of slander and lies.

We have no doubt that authentic Communists have infiltrated some American institutions. We have a feeling that most of them are well concealed, not just the obvious soft thinkers. They can be rooted out through the vigorous work of qualified and responsible officers.

We have the abiding conviction that communism's

We have the abiding conviction that communism's threats inside America, and to freedom in the world, can best be fought by making free institutions work better. That means arousing individual citizens to their responsibilities and opportunities, sanely, vigorously, fearlessly.

## Washington Merry-Go-Round

By Drew Pearson

**DREW PEARSON SAYS:** Three-way setup created Albuquerque boom: Atomic energy, the desert, and New Mexico's Senators Chavez and Anderson; Latter long has cheated undertaker; Chavez has life job.

Albuquerque — Things have changed around this town since I used to come here to try to persuade a certain lady to change her name to Pearson.

The smell of the pinon wood from adobe chimneys which used to pervade the atmosphere on brisk fall days has given way to automobile exhaust fumes. The main street, once sleepy in the autumn sunlight is now as choked with traffic as 5th Avenue. And the Navajo Indians who used to sell beads and post cards at the Santa Fe railroad station now find that passenger traffic has shifted to the airport.

Albuquerque has grown up. From the complacent country metropolis of 30,000 25 years ago, it has bulged into 201,000 at the last census with 90,000 more overflowing into the suburbs. Few American cities have mushroomed so rapidly, and three things did it: atomic energy, the desert and the senators it sent to Washington.

When Franklin Roosevelt put Dr. Robert Oppenheimer in charge of building the first atomic bomb, he picked the top of a mesa, Los Alamos, where he once went to school, as the most secluded spot in America, and this began the trek of atomic energy to New Mexico. It has

continued ever since, aided and abetted by the fact that New Mexican deserts give plenty of room for testing and by the industry and potency of New Mexico's two senators.

Sen. Clinton Anderson, a member of the Joint Congressional Committee on Atomic Energy, knows more about the atom than the former AEC chairman, Adm. Lewis Strauss, whom he once blocked as Secretary of Commerce. Sen. Dennis Chavez, a power on the Appropriations Committee, puts across the money for atomic energy. So what New Mexico wants, between these two senators, New Mexico usually gets.

### Cheats Undertaker

Anderson came to New Mexico as a young newspaperman consumptive from South Dakota 40 years ago, expecting to die. He has been cheating the undertaker ever since. It was his inquisitive reporting which helped uncover the Albert Fall Teapot Dome scandal in the Harding Administration. Later, he came to the House of Representatives, became Secretary of Agriculture under Truman, in 1948 was elected to the Senate.

His colleague, Dennis Chavez, is the only Spanish-American ever elected to the U.S. Senate and is proud of the fact. Once, when asked about his nationality, he replied: "American since before Plymouth Rock." While visiting in Spain he also announced: "I'm a Catholic, a Spaniard, and a Yankee gentleman."

On another occasion while speaking in New Mexico, he announced: "Believe me: ladies and gentlemen, I am not of Anglo-Saxon origin." He said this as if someone had just accused him of committing a heinous crime.

### Senate Fixture

A wispy little man who looks as if he would blow away with his own cigar smoke, Chavez has been in the Senate 26 years which makes him among the four most senior senators. Various candidates have tried to defeat him, including the redoubtable and popular Johnny Walker of Santa Fe, now State Land Commissioner. All have failed. Chavez can remain in the Senate as long as he lives.

Not always consistent, the senior senator from New Mexico plays his politics according to his family, his friends, and personal whim. But usually he's to

be found on the side of the little guy. Though he urged the recognition of Dictator Franco of Spain, he introduced legislation to permit Spanish exiles from Franco to be admitted into the United States.

And when it was most unpopular to oppose the late Sen. Joe McCarthy he made a speech attacking one of McCarthy's star witnesses, Louis Budenz, ex-editor of the Communist Daily Worker, who supposedly had been reformed by the Jesuits. Chavez got all sorts of pressure from Jesuit leaders and was denounced by Archbishop Edward Byrne of New Mexico, but didn't retreat.

Speaking at San Antonio to Texas worshippers of the Alamo, Chavez paid his respects to those who retreat. "If there'd been a back door to the building," he said, "there wouldn't have been any Alamo."

The senior senator from New Mexico was almost lynched.

### Project Gnome

Things you may not know about the nuclear explosion 1,200 feet underground to which foreign observers are invited; though announced by President Kennedy Oct. 25, work on this project began in the spring of 1958 . . . salt beds in Michigan and Colorado and along the Gulf of Mexico were also explored for the test, but an area of 25 miles from Carlsbad, N.M., was picked because of the sparsity of population . . . A cement company from Wilmington, Del., came all the way to New Mexico to cement the 1,200-foot shaft, also the 1,116-foot tunnel which runs from the bottom of the shaft, horizontally, to the site of the explosion . . . this tunnel is eight feet by 12 and easy to walk through. The shaft extending down to the tunnel is 10 feet in diameter . . . when the bomb goes off, it will form a pool of about 6,000 tons of molten salt at a temperature of about 1,440 degrees Fahrenheit . . . about 120 tons of water will also be present in the form of superheated steam. One purpose of the experiment is to see whether heat generated from an A-explosion can be bottled up inside the earth, then released to create power . . . it will be about two weeks after the explosion before gases subside enough for observers to do any testing. Foreign visitors, including the Russians, may have to wait around a long time.

## Letters ToThe Editor

### To The Editor:

I must first of all apologize for a miscalculation; I have grossly underestimated the ignorance of man. He is, by far, more illogical and irrational than I had first supposed. His capacity for stupidity has far exceeded my wildest expectations. I don't know how I could have been so naive as to presume that man was a rational intelligent being, capable of shaping the future to his own desires. Please forgive me.

I must also apologize for a few misapprehensions. I was always under the impression that man was an end in himself, and that life and living it were untouchable sacred rights and that happiness was the goal of both. I have always assumed that men loved to live, to work, to achieve, to earn their right to the life they have, and to reject the unearned as morally worthless, void of value. I always thought that man chose the rational over the irrational, the intelligent over the emotional, the logical over the absurd. I have clearly been mistaken. Please forgive me.

It is now obvious to me that the way of the Bomb and the way of the Shelter are the correct views. It is obvious that Force and not the brain, Control and not freedom, Pull and not ability, Conformity and not creativity, are the eternal truths of the world. It is clear that tanks playing games at border points, or bombs poisoning atmospheres, or pseudo-politicians and quasi-intellectuals spouting the majestic qualities of Security, Sacrifice, and Society are all correct and proper concepts. It is obvious that the goal of life is death. Look around. I must have been mistaken before.

And yet sometimes I wonder, I wonder why I can't get the sunset or the stars out of my head. I wonder why men build cities and smile at small children, or why boys lie on grass under trees and look at the sky and feel good. I wonder that maybe the goal of life is joy and that . . . No. No. I must be wrong. This is theoretical, egotistical and anti-social. Please forgive me.

## 'Conn Engineer' Released Soon

The first issue of this year's Connecticut Engineer is scheduled for release shortly. The magazine which is distributed free to all students in the College of Engineering will be left in each dormitory.

In order that all deserving students may receive copies of the magazine, the staff has asked engineers who have changed their dormitory residences since September to send their new addresses along with their names and former addresses to: The Connecticut Engineer, Box U-37, Uconn.

### Commuters

Commuting students may pick up their copies in the Library of Engineering I. Others who are interested in the magazine can find copies of the April 1961 issue in the Engineering library.

Constructive criticism of the Connecticut Engineer is welcomed by the staff and may be submitted to the above address where it will receive due consideration and, where possible, be embodied in future issues of the publication.

## Peace Walkers . . .

(Continued From Page 1)

The Russians were enthusiastic but when they were told to complain about nuclear testing to the government, they replied how could they complain to the government if they were the government.

Speaking to a group of students from the University of Moscow they found the professors in back of the government, but the students were not.

### Mrs. Khrushchev

The walkers were invited to visit with Mrs. Khrushchev and some of the women walkers did. She told them that she leaves state problems to her husband.

In summing up the walk, Mr. Kruse felt that the present situation is dismal but the walk was an "experience." "If something isn't done we may not be here long," he said.

The floor was then open to discussion. In answering the questions he referred people to some materials that he was giving out.

The Committee for Nonviolent action asks the governments of the world to renounce military deterrence. Resolve and declare that they will under no circumstances threaten or undertake "massive retaliation" or prepare for "limited", "pre-emptive" or "preventive war", either with nuclear or conventional weapons.

### Nonviolent Programs

The governments should begin nonviolent resistance defense programs to take the place of military programs. These should operate on the principles similar to those which helped free India, were used to resist Nazi tyranny in Scandinavia and now guide "sit-ins" for racial equality and civil rights in the United States' South.

Nonviolent resistance training and research programs should be set up. Each nation should study the most effective forms of nonviolent resistance for its situation. Citizens needed to be trained in nonviolent resistance to possible invasions and other forms of tyranny. They must learn the art of noncooperation, which includes peaceful strikes and boycotts. People must be taught how violent antagonists can be changed to friends by the power of truth and love.

### Economic Readjustments

Nations must start economic readjustments programs now that will insure that disarmament will not disrupt the economy of any nation and that all people will have meaningful work and adequate incomes.

Governments should strive for initiative in disarmaments. They cannot wait for disarmament agreements or for other countries to start disarming. Each must take the initiative and act now. Doing so would give the world a moral example.

Governments should: 1. Stop all nuclear weapons tests, so that radioactivity will not contaminate the world and more frightful weapons will not be created. 2. Cease construction and development of missile and jet bomber

delivery systems, so that the chances of war through mechanical psychological accidents will be lessened. 3. End research and manufacture of chemical, biological, radiological and other weapons of mass extermination. 4. Refuse to give weapons of any kind to other governments or to assist them in arms programs; this will prevent additional nations from joining the "nuclear bomb club" and will discourage other explosive arms races. 5. End the draft. 6. Dismantle existing nuclear weapons and convert fissionable material from military to peaceful purposes. 7. Reduce all conventional military forces to the point where they cannot threaten other countries.

### Unilateral Disarmament

It is necessary to continue disarmament programs unilaterally, irrespective of other nations. This would help generate that thrust between peoples which successful negotiation of their disagreements requires.

Governments must stop all espionage activities. They must stop economic and nonmilitary pressures. These can become the causes of wars surely as military coercion.

Nations should negotiate and arbitrate all international disputes. The political causes of war must be removed. Nations must accept the principle of universality in the U.N. The governments of mainland China and other nations should be immediately recognized and given U.N. membership.

### Nonmilitary Assists

There should be massive U.N. nonmilitary social and technical assistance programs to the undeveloped nations of the world. People everywhere must see that through the practical goodwill of others they can come to live full and happy lives, free from the fear of disease and starvation.

Assist, by nonmilitary means, movements for independence in Africa, Europe and America. Whenever men long for political, economic and religious freedom they should be helped. Nations should support large scale student and cultural exchange programs with all nations and should guarantee civil rights to minority racial, political and religious groups within their own borders.

### Airline Crash

Recife, Brazil, Nov. 1—(AP.)—A company spokesman says 48 of the 85 persons aboard a Brazilian airliner perished when it crashed into a hillside near Recife, Brazil, today. There were no U.S. citizens aboard.

### Radioactive Cloud

Washington, D.C., Nov. 1—(AP.)—A Washington Weather Bureau fallout expert says the radioactive cloud from Russia's superbomb will pass over Siberia's Kamchatka peninsula tonight. Unless the winds change, Robert List expects the cloud to reach Alaska tomorrow, soar high over Canada and miss the United States after crossing Alaska.

## Child D's 5 Men Teachers Prove Times Have Changed

There may have been a day when the home and family was "the woman's world" and men concerned themselves with other things. There may have been a day when Home Economics was primarily "cookin' and sewin'". Not so today! Evidence of this change is the five male faculty membership the Department of change is the five male faculty Relations at Uconn.

Three of these men spend most of their time in the Preschool Laboratory working with three and four-year-old youngsters and with majors in the area of Child Development who are learning about what makes little people, as well as big people, tick. Dr. E. Duwayne Keller, coordinator of the Preschool Laboratory, has recently come from the Iowa Child Welfare Research Station to take over his responsibilities directing the training and research activities centered in the Preschool Laboratory.

### Creativity

Dr. Clyde Jones joined the staff this year as a specialist in charge of creative experience for preschool youngsters. An artist in his own right, Dr. Jones is presently investigating ways of developing all forms of creativity in children. Mr. Bruce Barton, recently of Brown University, is assisting with the Preschool Laboratory.

Mrs. Marjorie Tourville, headteacher, at the Preschool Laboratory believes that the children are as pleased with their men instructors as the men are pleased with the children. She says that because men are entering the field, we are fortunate to be able to provide masculine role models at the preschool level.

### Family Interests

Education for marriage and

parenthood is the primary concern of the remaining two men on the department staff. Both Dr. Albert Quade and Dr. Earl Goodman, Jr. believe that men should be as concerned with family relations as women. Dr. Goodman who recently came from Teach-

er's College, Columbia University, points out that is not only the ratio of men teachers that is increasing in the area of family interests, but that the proportion of men students has increased markedly in the last five years.

## On Campus with Max Shulman

(Author of "I Was a Teen-age Dwarf", "The Many Loves of Dobie Gillis", etc.)

### HUSBANDS, ANYONE?

It has been alleged that coeds go to college for the sole purpose of finding husbands. This is, of course, an infamous canard, and I give fair warning that, small and spongy as I am, anybody who says such a dastardly thing when I am around had better be prepared for a sound thrashing!

Girls go to college for precisely the same reasons as men do: to broaden their horizons, to lengthen their vistas, to drink at the fount of wisdom. But, if, by pure chance, while a girl is engaged in these meritorious pursuits, a likely looking husband should pop into view, why, what's wrong with that? Eh? What's wrong with that?

The question now arises, what should a girl look for in a husband. A great deal has been written on this subject. Some say character is most important, some say background, some say appearance, some say education. All are wrong.

The most important thing—bar none—in a husband is health. Though he be handsome as Apollo and rich as Midas, what good is he if he just lays around all day accumulating bedsores?

The very first thing to do upon meeting a man is to make sure he is sound of wind and limb. Before he has a chance to sweet-talk you, slap a thermometer in his mouth, roll back his eyelids, yank out his tongue, rap his patella, palpate his thorax, ask him to straighten out a horseshoe with his teeth. If he fails these simple tests, phone for an ambulance and go on to the next prospect.

If, however, he turns out to be physically fit, proceed to the second most important requirement in a husband. I refer to a sense of humor.

A man who can't take a joke is a man to be avoided. There are several simple tests to find out whether your prospect can take a joke or not. You can, for example, slash his tires. Or burn his "Mad" comics. Or steal his switchblade. Or turn loose his pet raccoon. Or shave his head.

After each of these good-natured pranks, laugh gaily and shout "April Fool! If he replies, "But this is February nineteenth," or something equally churlish, cross him off your list and give thanks you found out in time.

But if he laughs silverly and calls you "Little Minx!" put him to the next test. Find out whether he is kindly.

## What should a girl look for in a husband?

The quickest way to ascertain his kindness is, of course, to look at the cigarette he smokes. Is it mild? Is it clement? Is it humane? Does it minister tenderly to the psyche? Does it coddle the synapses? Is it a good companion? Is it genial? Is it bright and friendly and filtered and full of dulcet pleasure from cockerow till the heart of darkness?

Is it, in short, Marlboro?

If Marlboro it be, then clasp the man to your bosom with hoops of steel, for you may be sure that he is kindly as a summer breeze, kindly as a mother's kiss, kindly to his very marrow.

And now, having found a man who is kindly and healthy and blessed with a sense of humor, the only thing that remains is to make sure he will always earn a handsome living. That, fortunately, is easy. Just enroll him in engineering.

# Dominican Republic Breeds Infamous, Unknown Men

Current development in the Dominican Republic indicate that a man who is all but unknown outside his own country must be reckoned with in the event a new government is established.

The Caribbean nation's air force chief of staff—thirty-three-year-old Major General, Fernando Sanchez—is a lifelong friend of the armed forces chief, General Rafael Trujillo junior. Thus, Sanchez ranks just below the son of the slain Dominican Republic dictator in the military hierarchy.

The consensus among foreign and Dominican political observers is that Sanchez would be a formidable figure indeed in any struggle for military power resulting from the presently explosive political situation.

## Generalissimo

General Trujillo's father—the late Generalissimo—is said to have given the air force the shape of a personal tax force to meet any challenge to his authority from the other military branches.

The Generalissimo, who ruled the nation with an iron hand for 31 years, set up the armed forces in such a way as to make the air arm a virtually separate military establishment. The air force has its own infantry, artillery and tank corps. It has 150 aircraft—of which 30 are jets—but some do not possess full operational capacity due to a lack of spare parts.

The largest political opposition faction demanded temporary removal of 12 military leaders as a prerequisite to setting up a provisional government junta. The list included the name of Sanchez.

## Big Question

Consequently, one of the big questions confronting political analysts concerns just how Sanchez would use his strength in any military showdown. Another question is whether Sanchez would have the backing of the old generals and the younger officers—or those outside what is known as young Trujillo's clique. None challenge Sanchez' loyalty to the Trujillo family—a devotion not universally shared in the military establishment. This apparently stems from the fact that the plot that ended in the generalissimo's death actually originated in the army itself.

There is also known to be a

fear among the career officers of a Castro-type liquidation in the event extremist elements eventually gain control of a civilian government.

## Air Force General

The air force chief is described as overbearing and aloof and, according to those who claim to know him best, is not the most popular man in the military. Whether Sanchez will abide by opposition demands that he leave the country in the interests of said to prevail regardless of any other preferences, would very likely find these officers greatly

democratization remains to be seen.

Already, General Rafael Trujillo junior has decreed that the future of the military shall not be discussed in any civilian conference having to do with a proposed new government.

In a recent interview, Sanchez may have hinted how he feels about the situation. When asked if he would go along with Trujillo in the General's professed intention to resign if President Balaguer were forced to quit, Sanchez said emphatically that he would not.

# Designer Ceil Chapman Wants Feminine Women

Because American women have enough on their shoulders these days, designer Ceil Chapman apparently decided that the least she could do was take off their shoulders straps.

As a result, willowy, lamp-tanned models strutted before the fashion writers in New York today in spring dresses with little more to hold them up than a deep breath.

Miss Chapman's breezy, naked shoulder idea followed through a series of softly feminine dresses to be worn both under the sun and moon.

## Shelter Jackets

But knowing full well you can't ever count on weather to cooperate with fashion, Miss Chapman provided some ruffly cape and coat type coverings which she calls "shelter jackets," a term not meant to have atomic age connotations. Although these may halt a breeze, they are too diaphanous to halt the nude look.

Still some of Miss Chapman's costumes for spring have the personalities of a Dr. Jekyll and Mr. Hyde. One, done in black crepe, is decorous enough for a Sunday school picnic with the jacket on. But without it the bare shouldered dress is the uniform of a night club siren.

## Feminine Figure

A favorite couturiere of Hollywood and TV stars whose business it is to have an abundance of sex appeal, Miss Chapman always did do her best to dramatize the feminine, even when the rest of her industry was trying to disguise it.

Last year she accomplished this by draping and shaping chiffons in the Grecian manner until women were floating, uttering goddesses.

This year she is wrapping the figure of a woman the Egyptian way, nipping and tucking her favorite fabric, chiffon, horizontally and diagonally from hem to neck—or as close to the neck as her dresses get.

## Cleopatra

She tops off her ladies of the Nile with headgear designed originally by Cleopatra's ancestors.

Although the designer herself is a jet-haired woman, she is partial to blondes. With the exception of a few electric pastels, most of her fabrics are delicate hues. Often Miss Chapman combines two nearly matching chiffon pastels to create shadowy or sunbeam effects.

# More Evidence Against Smoking

A Veterans Administration medical official has told a Berlin audience he has yet to see a case of lung cancer in a person who doesn't smoke.

The statement was made by Dr. Oscar Auerbach, the senior medical investigator at the Veterans Administration in East Orange, New Jersey. Addressing the opening session of a conference on smoking and health called by the Connecticut Tuberculosis and Health Association, Auerbach said he has made this statement at numerous meetings of physicians and surgeons. The doctor said he challenged his colleagues to produce a lung cancer in a non-smoker, adding: "the challenge has never been taken up."

In a five-year study on the relationship between smoking and lung cancer, Auerbach said he examined 20,000 slices of tissue from the lungs of men who had died of various causes. Only one-fifth of one per cent of the slices from heavy smokers were normal, he said. Fifty-one percent of the slices from non-smokers, on the other hand, showed no abnormalities.

Auerbach was among a group of speakers at the kickoff campaign by the T-B and Health Association to induce teenagers and other young persons not to smoke.

# The Bridge Deck

By Florence Osborn

In the past thirteen years many of the nation's thirty-five million bridge players have asked this or other bridge columnists: "Is it true that the scoring (or laws) of contract bridge have

just been changed?" The answer every time has been: "No, there have been no changes in the scoring and laws since 1948." Well, we can finally report that some changes are soon due. Scoring has not been touched and there is nothing earth-shaking about the revisions of the laws, but, still, changes.

# Golden Topaz—November's Birth Stone

The November-born have a beautiful birthstone—The Golden Topaz. It sparkles brightly as a clear, glowing emblem of fidelity and true friendship. The word "Topaz" comes from the name of an island in the Red Sea called Topazos, meaning "to speak."

Nowadays, most of the stones we know as Topaz actually are members of the Quartz family. This type is found in a six-sided crystal and comes mainly from Brazil. Rare "precious Topaz" is different chemically from the Quartz variety and has been found in several colors. There is blue Topaz and pink Topaz, but the golden-brown variety is best known.

Quartz Topaz ranges in color from the palest yellow to deep sherry brown. Topaz is adaptable to many types of jewelry design for both men and women. And it is particularly effective when set in multi-colored gold mountings. A handsome ring stone, the Topaz can be carved into cameos and itaglios.

The flower-of-the-month for the November-born also features a wide variety of lovely colors. It's the chrysanthemum.

The Chrysanthemum long has been popular with gardeners—both professional and amateurs—as an exhibition flower because of its great size and variety of shape and color. Another reason it is favored is because varieties are extremely hardy permitting their use in the perennial garden.

The first official U.S. laws of contract were devised in 1927 by a Card Committee of New York's Whist Club. The first international laws of contract were issued in 1932 by the Whist Club, the Portland Club of London and the Commission Francaise du Bridge of Paris. Revisions were made in 1935, and in 1943 a separate code for America was put out jointly by the Whist Club and the National Laws Commission of the American Contract Bridge League.

In 1947 the task of representing this country in international revisions passed from The Whist Club to the National Laws Commission. The club, however, retained several members on the Commission.

The last revisions of the international code were made in 1948 by the National Laws Commission, the Portland Club, and the European Bridge League.

Changes have been in the works both here and in Europe for the past three years, the activity has been speeded up this month with the Commission several times meeting in New York. It is slow, exacting work, for to reword even one sentence in the old laws so as to make it clear, equitable and satisfactory to thirty-five million bridge players has taken the Commission as much as two hours.

Alvin Landy, executive secretary of the ACBL, tells us that the printing of the new laws should start by September and that they should be out by the end of the year.

## Communist Paradise To Swamp West

Khrushchev predicted today that his economic program will bring a Communist paradise on earth that will swamp the West with production, power and dynamism. At the end of 20 years, every Russian family can expect an apartment, free.

The 'rotund little baldheaded man', who bangs his shoes on desks when he gets mad and fires 50-megaton nuclear test bombs, again has been re-elected leader of the Soviet Communist party.

The twenty-second Party Congress in its closing session in Moscow today named Nikita Khrushchev as first secretary of the party. This is the top job in Russia and in the Communist world.

### Best Force

Khrushchev reiterated before some 5,000 cheering delegates that Communism is in his words, the most influential political force "of our time." Further, he asserted, "It determines today the principal direction of world development."

The Congress also endorsed a final resolution which called for a tightened party leadership under Khrushchev, and a 20-year plan designed to make Russia the world's leading economic power.

However, Western observers speculated Khrushchev missed by a fairly wide margin all he wanted from the Congress. For instance, he wanted all the so-called anti-party group people expelled from the party. But there was no such action in the Congress, at least publicly. The names of those dropped indicated some compromise at the top.

At the two-week-long Congress: Khrushchev's 20-year economic program was endorsed, the so-called anti-party group came under heavy and vicious criticism including a resolution calling for expulsion.

Stalin's body was ordered removed from its place beside Lenin in the tomb on Red Square.

The ruling presidium of the Communist party was cut from 14 to 11 members.

Little Albania was all but read out of the Soviet bloc for adhering to Stalinism.

Red China's Premier Chou En-Lai came to a defense of Albania.

Khrushchev said he would not insist on a December 31 deadline for a showdown on Berlin but warned a settlement cannot wait indefinitely.

### Change Of Mind

The Soviet leader dismissed as hysterical world clamor against testing a 50-megaton nuclear bomb, and then went ahead and did so.

And Defense Minister Rodion Malinovsky said Russia has developed an accurate defense against rockets supposedly an anti-missile pocket.

The final resolution called for the expulsion of former Foreign Minister V. M. Molotov, former Premier Georgi Malenkov, and former First Deputy Premier Lazar Kaganovich. They are three members of the anti-party group bitterly assailed as Stalinists since the Congress opened Oct. 17. They had sought and failed to wrest control of the party from Khrushchev in 1957.

Another member of the anti-party group, aging and ailing former President Klementi Voroshilov also was attacked. But he was forgiven by Khrushchev after writing a letter to the Congress saying he was repentant for having helped the anti-party group.

### Uncle Joe

Former Premier Joseph Stalin was reviled as a murderer.

Khrushchev said Stalin had sent thousands of innocent persons to their deaths in the notorious purges of the 30's. And it was decreed that Stalin's body no longer shall rest alongside that of Lenin in its Red Square tomb.

Albania came in for verbal brickbats from Khrushchev and other speakers for sticking with Stalinism. Red China's Chou En-Lai came to Albania's defense. Chou chided Khrushchev for the attack and said problems of that kind should be settled in private. Then Chou went home, a week early.

### Cuts Number

The cutting of the ruling Presidium from 14 to 11 members and the number of alternate members from seven to five apparently reflected a tightening up of the Kremlin's central control. A surprise was the dropping of the Presidium's only woman member Ekaterina Furtseva. She has been regarded as extremely close to Khrushchev and presumably will continue in her government position of Minister of Culture.

As for Berlin, Khrushchev said he wants only peace. But he accused "the Western powers of threatening war over the divided city. He reiterated he will not insist on a December 31 showdown on Berlin. But again he warned a German settlement cannot wait indefinitely and he said the West must show willingness to negotiate. He gave no hint of yielding on Soviet positions.

And as for military power, the Soviet boss said the Russian nuclear weapons arsenal is stronger than the American. And he attempted to dot the I's and cross the T's with the 50-megaton test blast yesterday.

## Issues Order

Montgomery, Ala., Nov. 1 — (AP)—A Federal judge in Alabama, Frank Johnson Junior, has issued an order in Montgomery prohibiting Alabama authorities from enforcing traditional racial barriers. The order coincided with barriers. The order coincided with tion practices on buses and in terminals throughout the country. The court action in Alabama came as Mississippi and Georgia police arrested negroes who entered white waiting rooms or sought service in restaurants previously used by white passengers at bus terminals.

## Stevenson Denies Charges Forwarded By Van Fleet

New York, Nov. 1. — (AP.) — Adlai Stevenson has denied charges reportedly made against him by retired Army General James Van Fleet, and has demanded that Van Fleet correct the statement he is reported to have made last night in Lakeland, Fla.

As quoted by the Tampa, Florida, Tribune, Van Fleet said among other things that he thinks Stevenson should have been fired as U.S. chief delegate to the UN after last April's ill-fated invasion of Cuba.

### Opposed Invaders

Van Fleet was quoted as saying Stevenson opposed direct armed U.S. support of the Cuban invaders when they hit the beaches at the Bay of Pigs, and were thrown back by Fidel Castro's forces. He said U.S. plans to give direct aid to the invaders were canceled after Stevenson took his stand.

In a telegram to Van Fleet

## Khrushchev Reelected Head Of USSR Communist Party

Moscow, Nov. 1.—(AP.)—Soviet Premier Khrushchev was re-elected first secretary, top man, of the Soviet Communist Party, by the Soviet Party congress in Moscow. And the congress adopted a strong, boastful resolution saying Communism is the most influential political force and it is not

capitalism, but socialism or communism, that now determines the principal direction of world development.

### Tight Leadership

The congress endorsed a tightened party leadership and a 20-year-plan aimed at making Russia the world's leading economic

power. A production capacity of 250 million tons of steel, twice the present U.S. capacity, was promised for the end of the 20-year plan. But Khrushchev emphasized that all of this will require, as he put it, "Work, work and more work."

The Soviet Communist resolution emphasizes military measures, saying the most burning issue today is war and peace. The resolution says, "We must be on our guard, keep the powder dry, perfect the defense of the socialist countries and their armed forces."

The final resolution also calls for expulsion from the Communist Party of such former leaders as V. M. Molotov, Georgi Malenkov and Lazar Kaganovich. All of them assailed as pro-Stalinist.

## America To Radio Superbomb News

Washington, Nov. 1.—(AP.)—The Voice of America has lined up all of its effective guns, 52 radio transmitters, for a massive 8-hour verbal bombardment of the Soviet Union Sunday, with the story of what Russian nuclear test explosions have done to pollute the world's atmosphere.

The Voice of America says the transmission power involved, well over four million watts, will be the equivalent of more than 86 of the strongest U.S. stations broadcasting at the same time.

The story of what fallout will mean to the Russians, and the world revulsion to the Soviet nuclear tests, will be told over nearly 80 different frequencies, mostly by shortwave, in eight languages, starting at 9 a.m. Sunday.

### Listeners Told

Information Agency Director Edward R. Murrow says the listeners behind the Iron Curtain have already been told the special broadcast is coming. Murrow says at best only 3 minutes of relatively free broadcasting could be expected by a surprise move before Russia's 2,000 interference trans-

mitters will start jamming. Since jamming is never completely successful, Murrow says there was a definite advantage in alerting the prospective audience that something special is coming.

## Finland On Spot—UN Nags Russia

Washington, Nov. 1.—(AP.)—The United States has accused the Soviet Union of trying to "cover its own aggressive policies" in asking neutral Finland to consult on defense against alleged military threats from the West. The State Department said the Soviet note delivered to Finland yesterday was "repugnant" and again accused the Soviet Union of being the source of present world tension.

### Soviet Call

The Soviet note called on Finland to join in blocking what the Soviets called a growing west German threat to use the Baltic Sea as a jumping off place for war.

The Russian note also accused Sweden of supplying West Germany with arms and said West German militarists were gaining a foothold in Sweden.

The Soviets claim the Scandinavian area now has been drawn into the orbit of dangerous military preparations. U.S. State Department experts privately stress that it's not the Atlantic community but the Soviet Union itself which introduced tension into the Baltic.

### Hectic Activity

The Soviet note touched off hectic activity in the capitals of northern Europe's Nordic countries. There were fears Russia might ask the Finns to permit Soviet troops to enter their country in a new phase of the Berlin crisis. There were also fears that Russia might apply pressure to get the Finns to recognize Communist East Germany.

The Soviet note requesting consultation was greeted in Helsinki with an icy calm. The Finnish cabinet met but made no statement. But President Urho Kekkonen is expected to make an important radio and television speech next Sunday after his return from a visit to the United States.

## US To Plan Ray Bomb?

New York, Nov. 1. — (AP.) — Published reports say the immediate goal of the United States in any resumption of nuclear tests would be development of a fantastic neutron death-ray bomb.

The New York Daily News quotes an unidentified Washington official as saying:

"It's a safe assumption that we will be testing the neutron bomb very soon."

The New York Journal-American reports it has learned the death-ray bomb is the prime goal in the resumption of nuclear tests by the United States, and not another H-bomb.

### Neutron Bomb

The neutron bomb is described as producing death without destruction by blasting out unseen, unfelt neutrons that could penetrate three feet of concrete. It could wipe out the populations of entire cities without major damage to the cities themselves.

Essentially, the difference between neutrons and other types of radiation is that they penetrate man-made structures and kill animal and human life inside without leaving the building or nearby ground saturated with the last, casualty-producing contamination.

## Auto Workers Set Strike Deadline

Detroit, Nov. 1.—(AP.)—The United Auto Workers Union has set a Thursday midnight strike deadline against Chrysler Corporation if no new contract is in hand at that time.

UAW President Walter Reuther shortly before midnight Tuesday gave Chrysler 48-hours notice that it will cancel the contract under which the union has been working.

Chrysler and the UAW have been operating on a 1958-61 contract, extended since August 31 with a provision that either side could cancel with 48 hours notice.

### Joint Meeting

Reuther's action came in the wake of a meeting of the UAW's international executive board which reviewed Chrysler contract bargaining at both the national and local levels.

The UAW made Chrysler a counter proposal to the company's economic offer that matched essentially that which the union previously negotiated with General Motors Corporation and Ford Motor Company.

Reuther, however, refused to disclose what the counter proposal contained, although he said it took into consideration "the economics at Chrysler," which lost 20 and one half million dollars in this year's first 9 months.

### Decline Comment

Chrysler Vice President John Leary also declined to disclose details of the Union's proposal or whether the company was prepared to accept it as top level negotiators went back to the bargaining table at 11:10 p.m.

The UAW made Chrysler a surprise secret economic proposal last night and the company recessed negotiations to study it. The company asked the UAW for Tuesday night's late session to discuss the new offer.

After a 45 minute session the negotiators recessed until 9 a.m. Wednesday.

Reuther said the company "needs to have a greater sense of urgency if a strike is to be avoided," but said he hopes a new contract can be reached without a strike.

The UAW executive board had been expected to set a strike deadline at Chrysler, the only one of the four Detroit-based auto companies which has not settled with the Union.

Stevenson says:

"You are quoted by the press as stating that the U. S. air cover for the Cuban invasion was called off at my insistence. You have apparently not familiarized yourself with public statements I issued on this long ago, denying even knowledge of the matter.

"The charge you have repeated is totally false. I will be obliged if you will correct your statement and if there is any doubt about this in your mind I suggest that you check the facts yourself."

The point was made that when he spoke in Lakeland last night, Van Fleet was not an active official of the U.S. Army. The retired general has been called back into active service by President Kennedy, to help train U.S. troops in anti-Guerrilla warfare. But his orders did not call for him to report until today at Fort Bragg, North Carolina.

**Intellectualism?****Parker's Pen**

By NEO PARKER

It seems that as soon as a team starts to lose the few anti-everything students that unfortunately every institution must have, begin to scream against the athletes that are losing, the coaches, athletics in general, and especially intercollegiate athletic recruiting policies. They cry that athletics are suppressing intellectualism and so forth. The really unfortunate thing is that these misguided radicals are basing their arguments on mere shreds of evidence. They are arguing only from the standpoint of what they feel and what they think would be good for the rest of the University.

**Misrepresentation**

They are representing themselves as spokesmen of the rest of the students without attempting to find out exactly what the students feel about the subject. In this way, by misrepresenting the truth and the facts these few students are doing far more harm to the intellectual atmosphere of the University than are a few innocent athletes.

Any idiot who can count to 53 could easily tell, from the football program sold at the home games, that only 13 out of 53 varsity football players are physical education majors. And of the 13 seniors on the team only three are PE majors. Further, only four of the 11 starters are PE majors. I think that these facts speak for themselves and when one looks at the majors of the rest of the team we find two pharmacy students, one education major, four engineers, three math majors, one physics major, three accounting majors, nine arts and sciences majors, 15 business majors, and two aggie majors.

**Representative Sample**

I feel that this is a fairly representative sampling of the schools at the University. Since the athletes must maintain the same standards as any other student in their classes I admire them. They work out each afternoon, spend a fairly large percentage of each weekend traveling and or playing, and it should be remembered that every football player who steps on that seemingly soft gridiron is risking his life. Every play he runs he has a chance of being hit by a 250 pound tackle or worse and then when he gets home then and only then does he find the time to study.

These critics of the Uconn athletes enjoy making nice sounding generalizations like, "When considering most of Uconn's athletes from an objective position it is obvious that they do little to enhance the scholastic caliber of the University," which have absolutely no basis of fact. They are purely figments of the imagination of the narrow minded critic. It would be very interesting to compile an average QPR for the athletes of this school. I think that we would find that the "jocks" have on the average, just as high an average as that of the rest of the other males in the school.

**No Effect**

Further I fail to see how a few athletes are going to have any effect on the few intellectuals. Perhaps the athletes are attracting some of the attention that the intellectuals think they deserve. Then it is the self-centeredness of these intellectuals that is causing most of the controversy.

Also these critics continually refer to the shameful behavior of some of the athletes. This argument, too, has absolutely no foundation. I have heard of far more violations of the law on the part of non-athletes than that of the athletes. Sure every once in a while an athlete gets a little out of hand and does something against the law, the trouble is that every time that an athlete breaks the law it reaches the papers. If every time that there was a law broken on this campus it got into the papers you would find that the athletes were involved in less than their share. I point to a scandal that happened several years ago where some students broke into an office and stole some exams in order to further their scholastics at the University.

**Athletics Place**

The arguments, then, of these few self-centered critics have no basis in fact. They are only rash generalizations and figments of their imaginations. True it would take a thorough study to make a firm stand on the other side, a thing that this column does not attempt to do. I only tried to show that these egotistic accusations actually do more to suppress intellectualism, by misleading the student body, than do a few athletes. Athletics have a definite place in university life which would be greatly missed by the majority of the student body, even if they won't admit it.

# Booters Top Brown As Strong, Ruch Score

By Dave Stiekney  
The injury ridden Uconn soccer team went to Providence for a victory by the score of 4-2.

## Frosh Gridders To Tackle New Hampshire On Friday

The Huskie Pups managed to wallop the Rhode Ramlets last Friday by the score of 36-20. However in registering the victory they were hit hard by injuries of a few key players.

Among them was the right half-back Doland who was injured in the first quarter and will not see any action this Friday against the New Hampshire kittens.

Also out is Foran, a fierce competitor on defense. Coach Rodis labled Foran as, "a tiger on defense." Hassit a standout end for the Pups thus far this season will be on the sideline with a sprained ankle.

**Praise**

Coach Rodis praised his squads spirit during the Rhode Island contest. Rodis said "this team is

not the best that I have ever coached, but it has as much spirit as any of the other squads."

Rodis heaped praise on Smith a rugged fullback and a stand-out end. Rod is said "they were best looking players on the field."

**QB Battle**

It looks like a fight for the quarterback with both Aceto and Redmond looking equally well against Ramlets. Rodis said D'Amato the third string quarterback is capable of taking-over anytime.

The next game will be against The New Hampshire frosh this Friday. The Cubs have lost games to both Rhode Island and Northeastern but still can be counted to put up a good fight.

Tuesday minus eight of the better men, but still beat Brown Uni-

**Hartwell Out**

The troubles of coach Squires were added to when he lost the use of fullback Bob Hartwell, just before the start of Tuesday's game, because of a former leg injury. Many of the reserves were used Tuesday because of the high mortality rate of the team. Tom Schwager was also lost during the game when he reinjured an knee.

**Ruch Scores**

Tom Strong and Irwin Ruch were the one point getters for the Huskies. In the first period there were three goals scored by the Uconn. Ruch got the first goal on a boot from the right side.

Strong made the second tally of the afternoon, halfway through the first period, on a shot from the right. The final goal of the period was made by Ruch on a shot from the right side. All the goals of the first period were made on shots from the right side.

The second and third periods held little action for the Huskies as the Bruins did all the scoring. Young of Brown, got the lone tally of the second period leaving the score 3-1 at the half. Charles Billo got Brown's final tally on a boot in the third period.

**Strong Boots One**

Tom Strong got the Huskies fourth goal of the day and his second on a long shot from the left side in the fourth period. Irwin Ruch took four shots at the goal and made two of them count while Strong had two goals with five shots at the goal.

Coach Squires said that "Defense is our chronic weakness." One aspect of defense which was outstanding was Goalie Ken Borsari. Borsari played the whole game and made 16 saves while letting only two scores go by him.

## Wrestling Team Works Out

The Uconn wrestling team has been working outdoors in preparation for its season opener with Wesleyan on Dec. 14. They have been running, doing calisthenics, and weight lifting in a conditioning program that started on Oct. 16.

**Went Inside**

This work continued till Oct. 30, then they went indoors and started the actual wrestling phase of their training.

This is the first season of formal competition for the Husky grapplers. Last year they competed informally.

**New Coach**

Coach Brent, who is spending his first year here at Uconn, says that he "is still looking for candidates." He also said that he is in need of a manager.

**Varsity Squad**

Some of the boys out for the varsity squad are: Earl Kurtz, James Fallon, and Kovacs, Harry Jensen, John Cappiali, David Perkins, Bob Ross, Jack Soares. Also, Bill Mac Earchern, Merrill Grand, Marlin Lugas, Victor Schachter, James Vose, and Bob Slown.

Expected to come out after football season are Fred Koury and Jim Cohen.

**Hockey Meeting**

Coach John Chapman has announced a meeting for all men interested in playing varsity or freshman hockey this year. The meeting, required for all interested, will be held Thursday evening at 7:30 in the men's gym classroom.

## SIC FLICS

"I don't know what the name of the course is, but I've repeated it for three years!"

21 GREAT TOBACCOS MAKE 20 WONDERFUL SMOKES!  
GET WITH THE GRAND PRIX . . . ENTER TODAY, ENTER INCESSANTLY!

Above is shown a point near the beginning of the Uconn-Rhody meet held last Tuesday. The Huskies in the picture are, from the left, Dick Seale, Carl Westberg, and Co-captain Al Cross. The Huskies lost the close meet 26-29

as they finish the season with a 3-4 record. On the right are Co-captains Bryce Roberts and Cross contemplating the close final score. (Campus Photo—Boglarski)

## Harriers Have 3-4 Season

By Dick Sherman

The Connecticut Cross country team split their last two meets of the season defeating Holy Cross while losing to Rhode Island. This ends the dual meet season for the Huskies who finished up with a 3-4 won-lost record.

### Up For Meet

The up and down Huskies were decidedly up for the meet with the Crusaders. Everyone ran well over the fast 3.6 mile course and the harriers came home with a well earned 23-32 victory.

The Cross' Bob Baker took advantage of his home course and nipped Uconn's Al Cross by seven seconds. The Uconn co-captain has come fast after a slow start this season and has proved he is one of the best distance runners in the school's history.

### Seale Third

Dick Seale was right in there again as he grabbed third place. The tall junior has been about the only consistent performer for the team this season.

Holy Cross' Ed Buchta took fourth place, but the Uconn's swept the next three places and wrapped up the win. Sophomore Carl Westberg found the roads to his liking and turned in his best race yet for the Blue and White.

### Husky Finishers

Close behind were Bruce Roberts and Dick Kosinski to put all of the Huskies five scoring

men in the top seven finishers.

Pat Fontane, Lou Durant and Paul Oberg also ran well and beat most of the Crusaders but could not catch their flying team mates.

### Pups Lost

The Husky Pups lost another very close meet to the Ntite Crusaders as their lack of depth left them on the short end of a 28-31 score. Uconn's John Keleher and Tom Neihart were again most of the show as they took one and two in the race. Art Hurd placed fifth in the meet but the Cross took all the rest of the places and the victory.

### Best Meet

Last Tuesday the Rhode Island Rams came to town and the best meet of the year resulted. Although the Huskies lost out 26-29 it was due to a bad break rather than bad running.

Al Cross and Rhody's Lund set out at a hot pace and never let up. Cross set the early pace and the two runners soon pulled away from the field. Lund took the lead from Cross just past the three mile mark and opened up a short lead.

The two men passed the three mile check point in 15.51, fastest ever timed for three miles here on Uconn's course. Cross closed the gap in the last half mile of the 4.6 mile race but could not catch up.

### Almost A Record

Lund's winning time of 23:53

was only 8 seconds off the great Lew Stieglitz's course record. This is the second fastest time ever run on the course and Cross' 24:01 is the third fastest.

Seale took 4th place to keep the Huskies alive but Westberg suffered a stomach cramp at the 3½ mile mark and was forced to drop out of the race. Westberg had been running in 5th or 6th position in the close shifting field and this unexpected bad break cost the meet.

### 3 Points Ahead

Co-captain Roberts and junior Kosinski moved up to the 6th and 7th place but the Rams came out ahead by three points. Fontane landed 10th place to score for the Uconn's.

Durant and Oberg were the other two finishers to round out the eight man varsity.

The frosh team came even closer as they dropped their meet to the Lambs by one point 28-29.

### Quite A Show

Keleher put on quite a show of his own as he missed the frosh course record by four seconds. Neihart came in second to give the pups another one-two finish. The Huskies third man, Hurd again ran well to grab 6th place but the rest of the Pups were far back.

The next meet will be the Yankon Championships to be held at Maine on this Saturday morning.

## Packers, Eagles Lead At Halfway Mark

By MARV SCHNEIDER

AP Sports Writer

It's seven games down and seven to go for all teams in the National Football League. The NFL has reached the halfway mark in its schedule, getting the same result that was achieved by playing a full schedule last season, the Green Bay Packers leading the Western Conference and the Philadelphia Eagles pacing the Eastern Conference.

One of the most significant facts of the first half of the season has been the fine job done by Philadelphia's quarterback, Sonny Jurgensen. The departure of Norm Van Brocklin and his golden passing arm was viewed in many quarters as a fatal blow to Philadelphia's hopes for another championship. The feeling was that Jurgensen did not have the ability to lead a team to the title. However the 27-year-old former Duke player has proven very capable indeed. He is the number one passer in the league, and has managed to keep Philadelphia atop the Conference even though the club's ground game has been exceptionally poor.

### Other Contenders

Regarding the other contenders in the conference... The Cleveland Browns and New York Giants are tied for second place, one game behind the Eagles. The Giants have been winning by alternating two of the oldest quarterbacks in the league, Y. A. Title and Charlie Conerly. This, plus the famed Giants defense and some surprisingly good running by veteran Alex Webster has kept New York in contention. The fact is, however, that New York's first seven games have been against the weakest teams in the league. After Sunday's game with Washington, the Giants will play two games each with Cleveland, Philadelphia and one with Green Bay.

### Cleveland's Success

Cleveland's success up to now has been due to the expected pattern, passing by Quarterback Milt Plum and running by Jimmy Brown and Bobby Mitchell, although all three have been operating below their performances of last season. The Browns will have to play the second half of the campaign without Mitchell, who goes into the army this week. Rookie Tom Watkins, however, may prove a capable replacement.

### Western Conference

In the Western Conference, the Packers have stayed on top through their one-two punch of Jim Taylor and Paul Hornung, two of the top rushers in the league. However, the army could turn out to be a key factor in the Western Conference race. Green Bay Linebackers Ray Nitschke leaves this week, Flanker Boyd Dowler in a couple of weeks, and Hornung has been examined to see if he is fit to go back in. Three such losses would be bound to have an effect on the club.

### Bears Loom Strong

The second place Chicago Bears suddenly loom as the strongest threat to the Packers. Billy Wade's passing plus some fine defense has played a big part in Chicago's resurgence.

# Scabbard and Blade Announces Names of New Initiates

Seven new men were initiated into the University of Connecticut chapter of Scabbard and Blade, national military honor society, last night.

New brothers initiated are: Edward Alling, Alpha Sigma Phi; Thomas Aylward, Kingston House; James Chatfield, Sigma Mortensen, Baldwin Hall; and Alpha Sigma Phi; Stephen Norcia, Sigma Chi Alpha; Ernest Mortensen, Baldwin Hall; and Gerald Reichardt, Alpha Sigma Phi.

## Purposes

The purpose of Scabbard and Blade is primarily to raise the standard of military education in American colleges and universities; to unite in closer relationship their various military departments; to encourage and foster the essential qualities of good and efficient officers; and to promote friendship and good fellowship among cadet officers.

To these ends the Uconn chapter carries out its purposes and programs. In addition to foster programs. In addition to foster-Blade, the Uconn Chapter participates in the co-sponsorship of the Military Ball and sponsors a spring dinner dance for its members and the cadre here at the University.

## History

Scabbard and Blade was founded in 1904 at the University of Wisconsin. Since that time it has established chapters at over 160 colleges and universities where ROTC has been established.

The officers for the current

year are Captain Francis Paul, Sherman House; First Lieutenant Gordon Tuthill, Tau Kappa Epsilon; Second Lieutenant Joe Krawczyk, Delta Chi; and First Sergeant John Fardall.

Committee heads for the year

are Social Chairman, William O'Connor, Tau Kappa Epsilon; Public Relations, Don Nierling, Chi Phi; and Initiation and Pledging, Richard Smith, Zeta Psi.

## Pi Phi "Adopts" Chinese Girl Through Parent Plan

In place of the girl in Greece financially "adopted" a few years ago and who no longer needs PLAN help, members of the Connecticut Alpha of Pi Beta Phi sorority have adopted Wong Lai Chun, a 12 year old Chinese girl in Hong Kong.

Through the Foster Parents' Plan, Inc., 352 Park Avenue South, New York City, the Foster Parents have promised to contribute \$15 a month toward the child's support for at least a year.

Foster Parents' Plan, which has rehabilitated more than 76,000 children on a personal basis since its founding in 1937, is now helping more than 22,000 youngsters in Greece, Italy, Korea, Viet Nam, Hong Kong and the Philippines. Over the past twenty-four years, more than 600,000 individuals and groups in America have helped needy children through the Foster Parents' Plan.

## Interested

"We are indeed grateful to these members for giving Wong Lai Chun this wonderful gift of

hope and help," declared Miss Gloria C. Matthews, executive director of Foster Parents' Plan, "and we prayerfully hope that many others who read this will also extend a helping hand to a distressed child. We shall be happy to send full information on how to become a Foster Parent to a child in Europe or the Far East to any individual, school or group writing Foster Parents' Plan," Miss Matthews added.

Foster Parents' Plan is a non-sectarian, non-profit, non-propaganda, independent, government-approved relief organization which provides children who are orphaned, distressed, or otherwise made destitute with the care, education and moral support they need.

"Adoption" through Plan is financial, not legal. The Foster Parent promises to contribute \$15 monthly for at least one year. Of this sum, the child receives \$8 each month as an outright cash grant. The remainder is used for periodic food and new clothing packages, translations of letters, medical services and education.

## Treated Individually

Because each child is treated as an individual, any special needs of the child or his family are taken care of by Plan from its General Fund.

To encourage a warm, personal relationship between the Foster Parent and child, the Foster Parent receives a history of the child and a photograph, and correspondence through the Plan office is translated both ways. This exchange bridges the gap between Foster Parent and child and gives the youngster the feeling of security and love he needs.
