
Director of Experiment Station,
Auburn, Alabama.

Dear Sir:

In preparing our bulletins for bindings we find that the following numbers from your station are missing:—Nos. 146 and 147.

If you can furnish us with these numbers, you will greatly oblige us.

Yours very truly,
Dear Sir:

Enclosed I send you a slip containing the names of all the members of the station staff of the Alabama Experiment Station to whom bulletins should be sent. It seems necessary to enter these names on your ordinary mailing list, inasmuch as we have received notice that the Office of Experiment Stations at Washington has discontinued the publication of its official mailing list, which was doubtless heretofore used by your Station.

Yours very truly,

[Signature]

J. F. Duggar

Director

February 2, 1911

Auburn, Alabama
Oct. 10, 1913.

Director J. F. Duggar,
Auburn, Ala.

My dear Dr. Duggar:

We are very anxious to get the following publications of your station:

Reports: 1-2-3-5-6-10-11-13-18

to enable us to complete our binding. I note that we have no reports of your station after the 19th. Can you not supply us? We have only the 11th and 13th reports of your Cambrake Branch. Can you supply us with any others? Anything that you can do to help us complete our files will be very greatly appreciated. I find we also have missing Circulars 1-4 inclusive, 9-13 inclusive, 15th and 16th and all after 17th, which we would like to have if possible.

Very truly yours,
Oct. 10, 1913.

Director G. W. Carver,
Tuskegee, Ala.

Dear Sir:---

We are endeavoring to complete our files of publications, and I find that we only have bulletins #17, #19 and #20 of your institute. I should be very glad to have our files completed and to have our name on your permanent mailing list. I believe you are already receiving our publications.

Very truly yours,
Mr. E. H. Jenkins,
5 Adams, Conn.

Dear Sir:

A pertinent editorial in the April number of the Expt. Sta. Record for 1919 calls attention to the need for judicious criticism of agricultural experimentation. I am interested in the extent to which this is being done in the several Experiment Stations and will thank you to kindly return the enclosed questionnaire with such comment as your experience warrants.

Very truly yours,
